Oxford Handbook of Learning and Intellectual Disability Nursing Owen Barr,Bob Gates,2018-11-15 This new edition of the Oxford Handbook of Learning and Intellectual Disability Nursing has been fully updated, with a greater focus on older people with learning and intellectual disabilities and mental health issues, as well as bringing all recommendations in line with current guidelines. Since the first edition of this book was published, services for people with learning disabilities and their families have become more community-based, and the demography of the population of people with learning disabilities has changed to include many older people, and children and young adults with complex physical health needs. This handbook provides clear information for readers on practical steps that may be taken to actively engage with people who have learning disabilities, to enable effective care in which they are involved as much as possible with decisions that affect them. This book also covers differences in legislation and social policy across the constituent countries in the United Kingdom and Ireland, including changes that have been implemented since serious case reviews into institutional abuse. An emergencies section provides key information at critical times in practice. The chapter on practice resources has been fully revised to bring together the latest tools to support nurses, complete with links for easy access. Written by experienced practitioners who are recognised experts in their areas of speciality, the Oxford Handbook of Learning and Intellectual Disability Nursing is an invaluable guide for students, community and hospital based nurses, and all those who work with people with intellectual disabilities as part of a multidisciplinary team.

It offers broad coverage of a range of needs and disabilities, and how to effectively identify and support those young people who experience such needs. This revised fourth edition covers recent legislative changes across the UK, an expanded discussion of key areas such as social, emotional, and mental health, a new chapter on literacy difficulties, and further fair, balanced, and open discussion of up-to-date evidence that indicates how young people who experience barriers to their learning are affected by factors associated with such marketisation, for example competition between schools and the academies programme. Special Educational Needs and Disability serves as essential reading for trainee and practising teachers, members of governing boards in schools and colleges, policymakers, and all those working directly with learners and their families.

Understanding and Promoting Access for People with Learning Difficulties Jane Seale, Melanie Nind, 2009-09-10 The issue of access is at the forefront of the practical challenges facing people with learning difficulties and people working with or supporting them. This engaging text brings together evidence, narratives and discussions that question and advance our understanding of the concept of access for people with learning difficulties. Seale and Nind draw on their expertise to analyse a wide range of situations, including access to public spaces, citizenship education, community participation, and employment. Through a series of related chapters, key researchers in the field of inclusion and learning difficulties enrich the access debate by: considering what kind of access people with learning difficulties want; identifying effective practice in relation to facilitating and promoting access; revealing the capability of people with learning difficulties to seek and achieve access to potentially exclusionary communities; providing a space for a wide range of people to share access stories. With contributions from a variety of stakeholders including people with learning difficulties, *Understanding and Promoting Access for People with Learning Difficulties* clarifies the concept of access without over-simplifying what is involved. Through rigorous critique, this book provides a unique rationale for a new multi-dimensional model of access and ways of promoting it. Proposing a reconceptualisation of the risk associated with promoting access for people with learning difficulties, this book will be of immense interest to students, researchers and professionals involved in inclusion and disability issues.
