Learning to Change the World Charles Kane,Walter Bender,Jody Cornish,Neal Donahue,2012-12-11 UNESCO estimates that eleven percent of primary school-age children-seventy-two million worldwide-are not enrolled in or attending school. Children who do attend may find themselves in schools that lack adequate space, facilities, or resources-impossible situations for learning. It is against this backdrop of profound need that One Laptop per Child (OLPC) emerged in 2005. The mission of the organization is to empower the children of developing countries to learn. They created the first affordable netbook specifically built to withstand harsh climates and the handling of young children-the bright green and white XO. At the 2005 World Economic Forum, Nicholas Negroponte, the MIT researcher who co-founded the Media Lab and OLPC, introduced the XO laptop to the world and described a new approach to changing education in developing countries. First, children must have access to information (through low-cost data communications) and the tools to educate themselves (affordable computers and learning software). Secondly, the fundamental approach to education must shift from passive knowledge acquisition to active construction of knowledge (learning how to learn). Thirdly, OLPC planned to build an organization with the capability to deliver these computers and support these shifts globally. It was an audacious vision of how to bring about a massive educational change. Learning to Change the World is the story of One Laptop per Child-a story that will resonate with entrepreneurs and social innovators in any field. OLPC is an example of a non-profit organization with aspirations for systemic change on a global scale, yet wrestling with tough questions that will be familiar to any social entrepreneur: how to ensure market forces support the scale up of a social program; how to balance the need to repeat past successes but still leave room for innovation; how to leverage a network to expand impact beyond your original capabilities; and how to help people without creating dependence. The authors set out to tell the real story of their journey-both successes and failures. For both ardent supporters and critics alike, this book presents both an invitation and a challenge: to set aside preconceived notions about OLPC and read the inside story of the origins and evolution of the organization.

Management and Leadership in the 4th Industrial Revolution Stephen Wyatt,2020-11-03 LONGLISTED: CMI Management Book of the Year 2021 The business world is currently experiencing fundamental disruption, in part driven by the technology enabled Fourth Industrial Revolution. Corporate value is created and lost in breathtakingly short periods, and the rise of 'unicorns' against the demise of once-venerated organizations has shown that how firms compete has changed. Management and Leadership in the 4th Industrial Revolution presents a framework for managing and winning in the new accelerated world of business, focusing on the key capabilities organizations now need to achieve competitively superior performance. Building on the 'dynamic capabilities' approach already familiar to strategists and based around his own research, Stephen Wyatt shows how executives can assess the dynamic capacity of their organization - a leading indicator of future performance in comparison to their industry peers. Written in an accessible style with best practice examples from companies and quotes from executives to support each insight, this book includes a self-assessment questionnaire to measure the dynamic capacity of your organization and advice on how to strengthen areas of relative weakness. Management and Leadership in the 4th Industrial Revolution offers timely insights on driving innovation and emphasizes the importance of long-term strategy, change management and new models of dynamic leadership.

SMEs and Open Innovation: Global Cases and Initiatives Rahman, Hakikur,2011-12-31 Open innovation has been widely implemented in small and medium enterprises (SMEs) with the aim of influencing business promotion, value gain, and economic empowerment. However, little is known about the processes used to implement open innovation in SMEs and the associated challenges and benefits. SMEs and Open Innovation: Global Cases and Initiatives unites knowledge on how SMEs can apply open innovation strategies to development by incorporating academic, entrepreneurial, institutional, research, and empirical cases. This book discusses diverse policy, economic, and cultural issues, including numerous opportunities and challenges surrounding open innovation strategies; studies relevant risks and risk management; analyzes SMEs evolution pattern on adopting open innovation strategies through available measurable criteria; and assists practitioners in designing action plans to empower SMEs.

Intellectual Property Management for Start-ups Martin A. Bader,Sevim Süzeroğlu-Melchioris,2023-02-16 This book examines intellectual property (IP) as an important value driver for start-ups. Businesses of all sizes are inevitably confronted with intellectual property issues at some point, but start-ups and their collaborators face unique challenges and opportunities in IP management. Identifying, generating, and exploiting intellectual property can lead to sustainable competitive advantages and avoidance of risks. Many start-ups sense the complexity of IP management and therefore place their energy elsewhere. However, the clear conclusion to be drawn from this unique collection of contributions is that putting an IP management strategy in place is critical to the successful development of a business. Prof. Dr. Martin A. Bader and Prof. Dr. Sevim Süzeroğlu-Melchioris have years of experience as consultants, entrepreneurs, business owners, and researchers where they saw firsthand the need for a comprehensive yet practical resource for start-ups and their key stakeholders. This book explores different perspectives in dealing with IP from six different angles: the start-up's view, the investor's view, the corporation's view, the university's view, the global IP office's view, and the advisor's view. Each section consists of chapters written by leading experts from around the globe including Silicon Valley, Canada, Israel, Switzerland, Germany, Finland, France, Australia, Brazil, India, Japan, Singapore, and South Africa. Contributors bring practical experience from a wide range of sectors, such as information and communication technology, software, artificial intelligence, machine learning, cybersecurity, industrial automation, internet of things, life sciences, pharma, crop science, biotech, medtech, mining, sustainability, climate tech, and even quantum technologies. This timely publication serves as a guidebook for entrepreneurs and

other key stakeholders in the start-up ecosystem. It empowers founders to develop their own IP management strategy to mitigate risk, create and capture value, and lay the groundwork for sustainable growth. An essential reference for start-ups to achieve business excellence. "This edited book volume offers valuable insights, bringing together perspectives of key stakeholder groups from a wide variety of innovation ecosystems – an invaluable resource." –Carsten Fink, Chief Economist, World Intellectual Property Organization, Geneva "A timely book for those wanting a clear overview of the issues the different players encounter in the start-up ecosystem. A useful resource indeed. Congratulations to the editors and team."–Audrey Yap, Managing Partner YUSARN AUDREY LLC, Past President LESI, Chairman Singapore Innovation & Productivity Institute, Singapore "A 'must read' for all innovators in the start-up world. It is truly a fantastic book and one I would recommend being bought and read (in full)!"–Laurence Freeman, Professor (Adjunct), CU Denver Business School, Jake Jobs Center for Entrepreneurship, Denver, Colorado, United States/div

Manthan K.K. Sinha, Ajay Soni, Indranil Mitra, 2017-10-25 Leaders, who only live in the present and respond to its special pressures and demands, would fail to achieve quality of leadership and the change required in the future. In today's digital age of the millennial, transparency and social awareness have to be the cornerstones of any organization. Leaders and their HR need to align their current values accordingly. Some fundamentals like truth, humility, courage, energy, edge, equity, social justice will have to be brought back into the organization leadership DNA. All of us are aware about the spurt in leadership development activities in India over the recent years. There have been frantic efforts in Indian as well as foreign companies to develop leadership quickly across all levels in the organization. The reason of this recent surge lies in the current growth trajectory of Indian companies. Many Indian companies are growing at a rate which is mind-boggling. Companies which grew at 3 to 4 percent per annum for the first 30 years of their history, grew 10 fold or more since the advent of the new millennium. There are examples of several companies which have expanded phenomenally during the last decade, from Pan-India operations to manufacturing in 5 countries and doing business in 30 countries, increasing their manpower five times more than the number of people they had ever hired. This has put tremendous pressure on companies to develop leadership at all levels in the shortest possible time. So the natural question that comes up is: what kind of leaders do we need today in India? When we explore our own past, we expect our leaders be it in the form of god, king, or entrepreneur, to be 'Sarva Guna Sampanna', i.e. one who has all identified competencies and qualities required to be the 'right' leader. Today the imperative for senior leaders is to keep actualizing the talent in themselves and also in the band of leaders all over, whether leading from the front or middle or behind.

The Power of One Nirmal Pal, Arvind Rangaswamy, 2003 Customer satisfaction, employee productivity, and overall business efficiency are exponentially increased when companies exploit the tremendous customization potential of Internet applications. The Power of One brings together some of the greatest minds in e-business, marketing, and information technology. The all-star roster represents corporate giants like IBM, Xerox, and AT&T Wireless as well as world-renowned academic institutions including Penn State, Georgia Tech, University of Texas, and Carnegie Mellon. Their combined work is the first and last word on value delivery through personalized products and services, taking the reader through every component of customerization, including: * The business benefits and impact * Implementing and managing technology * Personalization in mobile commerce * Maximizing fulfillment and customer service * Ensuring security and privacy * Much more. Businesses thrive by reaching as many customers as possible. The Power of One is about reaching all of them -- one at a time.

Mapping Innovation Mohab Anis, Sarah Chawky, Aya Abdel Halim, 2022-08-24 This book is an eye-opener for businesses unveiling how technology trends can be deployed to redesign products, services and processes. The authors provide business opportunities based on technological innovation across 10 industrial sectors in easy to read case studies. Each case study is a story that narrates the potential and influence of a technological innovation on an enterprise, by defining the challenges faced, the type of technology adopted, and the impact. Provides readers with compelling reasons for implementing technology trends in industrial value chains; Written in a simple, easy to read and exciting manner to be accessible to readers with different backgrounds and interests; Uses a single, structured paradigm in all the case studies.

Advances in Mobile Commerce Technologies Ee-Peng Lim, Keng Siau, 2003-01-01 There is substantial interest in research in developing countries, especially in the use, implementation and development of information technology and systems. Many researchers have been moving toward an understanding of indigenous social and cultural structures and how they influence the use and development of information systems. E-Commerce and Cultural Values addresses these issues and brings together scholars to share their expertise on different aspects of the social side of e-Commerce and information systems and how they impact the cultural values of a society.

Entrepreneurs, Managers, and Leaders A. Mayo, N. Nohria, M. Rennella, 2016-05-23 This book reveals how leadership evolves through the story of the American airline industry across the 20th century. Entrepreneurs dominate the industry's early history, but as the industry evolved a new breed of managers emerged who built a dominant business model that enabled their companies to grow dramatically.
