Open Development Matthew L. Smith, Katherine M. A. Reilly, 2014-01-10 Experts explore current theory and practice in the application of digitally enabled open networked social models to international development. The emergence of open networked models made possible by digital technology has the potential to transform international development. Open network structures allow people to come together to share information, organize, and collaborate. Open development harnesses this power, to create new organizational forms and improve people's lives; it is not only an agenda for research and practice but also a statement about how to approach international development. In this volume, experts explore a variety of applications of openness, addressing challenges as well as opportunities. Open development requires new theoretical tools that focus on real world problems, consider a variety of solutions, and recognize the complexity of local contexts. After exploring the new theoretical terrain, the book describes a range of cases in which open models address such specific development issues as biotechnology research, improving education, and access to scholarly publications. Contributors then examine tensions between open models and existing structures, including struggles over privacy, intellectual property, and implementation. Finally, contributors offer broader conceptual perspectives, considering processes of social construction, knowledge management, and the role of individual intent in the development and outcomes of social models. Contributors Carla Bonina, Ineke Buskens, Leslie Chan, Abdallah Daar, Jeremy de Beer, Mark Graham, Eve Gray, Anita Gurumurthy, Havard Haarstad, Blane Harvey, Myra Khan, Melissa Loudon, Aaron K. Owning the Olympics Monroe Price, Daniel Dayan, 2009-12-10 A major contribution to the study of global events in times of global media. *Owning the Olympics* tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities--including the Chinese Communist Party itself--seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. Role of Japan in Modern Chinese Art Joshua A. Fogel, 2012 The modern histories of China and Japan are inexorably intertwined. Their relationship is perhaps most obvious in the fields of political, economic, and military history, but it is no less true in cultural and art history. Yet the traffic in artistic practices and practitioners between China and Japan remains an understudied field. In this volume, an international group of scholars investigates Japan's impact on Chinese art from the mid-nineteenth century through the 1930s. Individual essays address a range of perspectives, including the work of individual Chinese and Japanese painters, calligraphers, and sculptors, as well as artistic associations, international exhibitions, the collotype production of artwork, and the emergence of a modern canon.

Free, Fair, and Alive David Bollier, Silke Helfrich, 2019-09-03 The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

Asper Nation Marc Edge, 2007 The second generation of Aspers that now runs Canada's largest news media company is much like the first. Israel Izzy Asper's three children often appear in today's headlines. David is bidding to buy the Winnipeg Blue Bombers football team. Gail heads fundraising efforts for the new Canadian Museum of Human Rights. Leonard sits in his father's place as head of CanWest Global Communications. Like its founder, they also use their media empire to influence public opinion. Asper Nation explains why Canadians should be concerned about where the country's first family of news media is coming from, politically. Izzy Asper was an oddity as a Liberal politician in the 1970s. Fiscally, he was to the right of most Conservatives. As a nationally syndicated newspaper columnist, he called for a flat tax and workfare. As a best-selling author, he helped thwart a plan to shift Canada's tax burden from the

middle class onto corporations. But when Asper took his policies to Manitobans as Liberal leader in 1973, he was soundly defeated. Asper got into the television business instead and built Canada's third network. Asper made CanWest the country's most profitable broadcaster by feasting on regulations that encouraged the importation of cheap American programming. He took his formula to the world in the 1990s, buying television networks in New Zealand, Australia, and Ireland. Then in 2000, Asper pioneered media convergence, buying Canada's largest newspaper chain from Conrad Black. Southam dailies were soon ordered to run national editorials written at CanWest Global headquarters in Winnipeg. This corporate news control brought protest from journalists and two government inquiries. Neither resulted in long-sought limits on media ownership, however. Marc Edge offers a compelling account of the political perils involved in allowing the Asper family to dominate Canadian media.

Attacking Africa's Poverty M. Louise Fox, Robert Liebenthal, 2006 By all measures, poverty in Africa as a whole has increased and deepened. But in fact, Africa contains a number of undocumented success stories of poverty reduction. This book presents case studies of thirteen of these success stories, giving grounds for some real hope, and providing useful learning for all ? policymakers, governments, businesses, service providers, NGOs, and donors.

World Citizenship and Government D. Heater, 1996-06-21 The Stoics, Dante, the philosophers of the Enlightenment, H.G. Wells, world federalists, would-be reformers of the United Nations, and many others have all thought, albeit in very different ways, in cosmopolitan or world terms. This book traces the history of western political thinking about world citizenship and the world state. It analyses the manifold forms in which the basic concept of a world polity has been expounded and shows that, despite objections to the very notion and its failure to be implemented, it still remains a potent ideal.

Channels of Propaganda J. Michael Sproule, 1994 Defining propaganda as efforts by special interests to win over the public covertly by infiltrating messages into various channels of public expression ordinarily viewed as politically neutral, this book argues that propaganda has become pervasive in American life. Pointing out that the 1990s society is inundated with propaganda from numerous sources (including government, business, researchers, religious groups, the news media, educators, and the entertainment industry) the book exposes these channels of propaganda and the cumulative effect they have on public opinion and the functioning of American democracy. Chapter 1 reviews materials on diverse vantage points from which American writers and opinion leaders have tried to reconcile mass persuasion with the democratic way of life during the 20th century. Chapters 2-6 examine propaganda in: (1) government (e.g., Federal Bureau of Investigation, aid to the Contras, Star Wars, presidential styles); (2) research and religion (e.g., national security, private sector, religion and politics); (3) news (e.g., getting good coverage, pressure groups, and business); (4) classroom (e.g., business propaganda, pressure groups, textbooks, pressures on teachers); and (5) entertainment (e.g., film, television). Chapters 7 and 8 question: (1) what action a democratic people should take to safeguard intelligent discussion and free choice from the taint of devious communication; (2) to what extent propaganda casts a shadow over public life; and (3) whether large-scale, engineered persuasion can ever be squared with the ideal of democratic public deliberation. Extensive chapter notes and an index are included. (NKA)

The Parables in Our Saviour William M. Taylor, 2017-10-28 Excerpt from *The Parables in Our Saviour: Expounded and Illustrated* The parables of our Lord have always had a special attraction for students of the Gospels, and there are probably more works devoted to their exposition than to that of any other portion of the Saviour's teachings. In adding another to the number, I can claim only such originality as may be fairly accounted for by what astronomers have called the personal equation; and the result may be a further illustration of the many sidedness of these exquisite stories. To Arch bishop Trench, who more than any

other English writer has brought Patristic lore to bear upon the illustration of the parables, every later author must express his peculiar obligations; but the recent works of Professor Bruce and Siegfried Goebel have broken new ground in this department, and my aim has been to turn their fruitful suggestions to good homiletical account. The little volumes of Dr. Bods - only the first of which was in my hands when these discourses were prepared - are full of golden nuggets; and the Expositions Of William Arnot are characterized by the masculine. Culture Jam Kalle Lasn, 2000-11-07 America is no longer a country but a multimillion-dollar brand, says Kalle Lasn and his fellow culture jammers. The founder of Adbusters magazine, Lasn aims to stop the branding of America by changing the way information flows; the way institutions wield power; the way television stations are run; and the way the food, fashion, automobile, sports, music, and culture industries set agendas. With a courageous and compelling voice, Lasn deconstructs the advertising culture and our fixation on icons and brand names. And he shows how to organize resistance against the power trust that manages the brands by uncooling consumer items, by dermarketing fashions and celebrities, and by breaking the media trance of our TV-addicted age. A powerful manifesto by a leading media activist, Culture Jam lays the foundations for the most significant social movement of the early twenty-first century -- a movement that can change the world and the way we think and live.

Sedition Vladimir Aleksandrovich Kozlov, Sheila Fitzpatrick, Sergei Mironenko, 2011-01-01 Although dissident Soviet intellectuals in the post-Stalin era received wide international attention, ordinary people who opposed the regime rarely had their voices heard. This book is the first to tell the hidden story of popular discontent during the Khrushchev and Brezhnev years. It draws on an extraordinary collection of arrest and prosecution records from the 1960s and 1970s found in Soviet Procuracy archives.
