**What's the Buzz with Teenagers?** Mark Le Messurier, Madhavi Nawana Parker, 2019-03-05 Pre-teens and teenagers are faced with a continually changing and complex social world that not only involves face-to-face action, but also online and social media interaction. What's the Buzz with Teenagers? offers a highly practical programme designed to explicitly teach young people to get along and maintain healthy relationships with their friends, family and the broader community. Embracing current thinking on 'self-awareness and behaviour transformation' in adolescents, it uses highly interactive role plays, film-making, thinking exercises, quizzes, group discussions and confidence-building games to improve social skills and promote inclusion in a fun, effective and appealing way. Easy to implement in upper primary and middle schools, in healthcare settings and beyond, What's the Buzz with Teenagers?: is a deeply structured resource to teach young people in the 12- to 15-year-old developmental range; offers a connecting approach to bring young people together to learn without the pressure of 'getting social interaction right' all the time; aims to normalise the anxieties, sensitivities and loneliness that many young people experience during adolescence by sharing thoughts and exploring this common ground; explicitly teaches how to 'read' the emotional needs of others, show empathy and build relationships; and uses a developmental model that ensures relevance and inclusion to young people with a broad range of backgrounds, abilities and challenges. The programme provides lessons that educators and health professionals can adapt to suit their individual circumstances and time frames, and creates a framework for a warm, engaging and interactive space in which learning is optimised. The book is complemented by the website [www.whatsthebuzz.net.au](http://www.whatsthebuzz.net.au), which offers online downloadable resources and a further six lessons. Also available are What's the Buzz?: A Social Skills Enrichment Programme for Primary Students and What's the Buzz? For Early Learners: A Complete Social Skills Foundation Course.

**The Maker Cookbook** Cindy Wall, Lynn Pawloski, 2014-08-28 The Maker Movement is hot, and librarians are eager to participate. Even if you feel restricted by budget, staff, or space, this step-by-step guide will help you turn your library into a creativity center. The Maker Movement is sweeping the nation because it is creative and educational—and a lot of fun. Nonetheless, some librarians have hesitated to incorporate the movement into their programming because their libraries do not have dedicated makerspaces. If that describes you, then take heart. Written by librarians for librarians, this cookbook proves that every library is already a MakerPlace and provides you with recipes to make your library come alive with creativity. Easy-to-use, step-by-step guidance helps you create engaging K–8 programs in science and technology, arts and crafts, and home skills that are perfect for the library setting. The menu of ideas is broken into four types of programming. Appetizers add a taste of the Maker movement to existing library programs. Entrees present full programs for a lengthy one-day event or a short series. Side Dishes are programs you can use if you have limited staff, budget, space, or any combination of those. Desserts are low-tech programs, suitable for young children. Each recipe includes extensions, variations, and curriculum tie-ins that give you even more ways to present the program ideas, whether to a different audience or as part of other related activities. Programs that involve creating a Balloon Zip Line, a Zen Garden, or a Maker Marketplace will delight library users and generate activity and excitement in your library.

**Ubiquitous Computing Fundamentals** John Krumm, 2018-10-08 ...a must-read text that provides a historical lens to see how ubicomp has matured into a multidisciplinary endeavor. It will be an essential reference to researchers and those who want to learn more about this evolving field. -From the Foreword, Professor Gregory D. Abowd, Georgia Institute of Technology First introduced two decades ago, the term ubiquitous computing is now part of the common vernacular. Ubicomp, as it is commonly called, has grown not just quickly but broadly so as to encompass a wealth of concepts and technology that serves any number of purposes across all of human endeavor. While such growth is positive, the newest generation of ubicomp practitioners and researchers, isolated to specific tasks, are in danger of losing their sense of history and the broader perspective that has been so essential to the field's creativity and brilliance. Under the guidance of John Krumm, an original ubicomp pioneer, Ubiquitous Computing Fundamentals brings together eleven ubiquitous computing trailblazers who each report on his or her area of expertise. Starting with a historical introduction, the book moves on to summarize a number of self-contained topics. Taking a decidedly human perspective, the book includes discussion on how to observe people in their natural environments and evaluate the critical points where ubiquitous computing technologies can improve their lives. Among a range of topics this book examines: How to build an infrastructure that supports ubiquitous computing applications Privacy protection in systems that connect personal devices and personal information Moving from the graphical to the ubiquitous computing user interface Techniques that are revolutionizing the way we determine a person's location and understand other sensor measurements While we needn't become expert in every sub-discipline of ubicomp, it is necessary that we appreciate all the perspectives that make up the field and understand how our work can influence and be influenced by those perspectives. This is important, if we are to encourage future generations to be as successfully innovative as the field's originators.

Open Development Matthew L. Smith, Katherine M. A. Reilly, 2014-01-10 Experts explore current theory and practice in the application of digitally enabled open networked social models to international development. The emergence of open networked models made possible by digital technology has the potential to transform international development. Open network structures allow people to come together to share information, organize, and collaborate. Open development harnesses this power, to create new organizational forms and improve people's lives; it is not only an agenda for research and practice but also a statement about how to approach international development. In this volume, experts explore a variety of applications of openness, addressing challenges as well as opportunities. Open development requires new theoretical tools that focus on real world problems, consider a variety of solutions, and recognize the complexity of local contexts. After exploring the new theoretical terrain, the book describes a range of cases in which open models address such specific development issues as biotechnology research, improving education, and access to scholarly publications. Contributors then examine tensions between open models and existing structures, including struggles over privacy, intellectual property, and implementation. Finally, contributors offer broader conceptual perspectives, considering processes of social construction, knowledge management, and the role of individual intent in the development and outcomes of social models. Contributors Carla Bonina, Ineke Buskens, Leslie Chan, Abdallah Daar, Jeremy de Beer, Mark Graham, Eve Gray, Anita Gurumurthy, Havard Haarstad, Blane Harvey, Myra Khan, Melissa Loudon, Aaron K. Martin, Hassan Masum, Chidi Oguamanam, Katherine M. A. Reilly, Ulrike Rivett, Karl Schroeder, Parminder Jeet Singh, Matthew L. Smith, Marshall S. Sustainability for Whom? Hanna Sjögren, 2017-04-26 Global initiatives regarding environmental change have increasingly become part of political agendas and of our collective imagination. In order to form sustainable societies, education is considered crucial by organizations such as the United Nations and the European Union. But how is the notion of sustainability imagined and formed in educational practices? What does sustainability make possible, and whom does it involve? These critical questions are not often asked in educational research on sustainability. This study suggests that the absence of critical questions in sustainability education is part of a contemporary post-political framing of environmental issues. In order to re-politicize sustainability in education, this study critically explores how education—as an institution and a practice that is supposed to foster humans—responds to environmental change. The aim is to explore how sustainability is formed in education, and to discuss how these formations relate to ideas of what education is, and whom it is for. This interdisciplinary study uses theories and concepts from cultural studies, feminist theory, political theory, and philosophy of education to study imaginaries of the unknown, nonhuman world in the context of education. The focus of the empirical investigation is on teacher education in Sweden, and more precisely on those responsible for teaching the future generations of teachers – the teacher instructors. With help from empirical findings from focus groups, the study asks questions about the ontological, political, and ethical potential and risk of bringing the unknown Other into education.

**Political Theories of Narcissism** Takamichi Sakurai, 2018-05-16 Does the psychoanalytic concept of narcissism contribute to enhancing the disciplinary quality and features of political theory? This book tries to portray the foundations of democracy as both a universal value and a system of values embedded in specific cultural systems of meaning from its psychoanalytic perspective. This cross-disciplinary normative attempt makes possible the constructive dialogue between contemporary Western and Japanese culture by focusing on how the psychological foundations of democracy are treated within a common disciplinary framework in two different sociocultural contexts. In light of the integration of the psychiatrically mythical idea, the book argues that the key subjects of political theory are to identify the sources of totalitarian and fascist orientations in seemingly democratic practice, and to deal with them in psychoanalytically diagnostic and remedial terms.

**Citizen Science** Susanne Hecker, Muki Haklay, Anne Bowser, Zen Makuch, Johannes Vogel, Aletta Bonn, 2018-10-15 Citizen science, the active participation of the public in scientific research projects, is a rapidly expanding field in open science and open innovation. It provides an integrated model of public knowledge production and engagement with science. As a growing worldwide phenomenon, it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community. Catalysed by citizens' wishes to be actively involved in scientific processes, as a result of recent societal trends, it also offers contributions to the rise in tertiary education. In addition, citizen science provides a valuable tool for citizens to play a more active role in sustainable development. This book identifies and explains the role of citizen science within innovation in science and society, and as a vibrant and productive science-policy interface. The scope of this volume is global, geared towards identifying solutions and lessons to be applied across science, practice and policy. The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation, and discuss progress towards responsible research and innovation, two of the most critical aspects of science today.

**Digital Art through the Looking Glass** Oliver Grau (Hg.), 2019-12-11 Digital art challenges archiving, collecting and preserving methods within and outside of gallery, library, archive and museum (GLAM) institutions. From artists, scholars, technicians and conservators—to preserve this contemporary art is a transdisciplinary task. This book brings together leading international experts from digital art theory and preservation, digital humanities, collection management, conservation and media art histories. In a transdisciplinary approach, theoretic and practice-based research from these stakeholders in art, research, education and exhibition are presented to create an overview of present preservation methods and discuss demands and opportunities for the

future. Finally, the need for a new appropriate museum and archive infrastructure is shown to preserve the art of our time.
