Spectral Theory and Mathematical Physics: A Festschrift in Honor of Barry Simon's 60th Birthday

Fritz Gesztesy, 2007 This Festschrift had its origins in a conference called SimonFest held at Caltech, March 27-31, 2006, to honor Barry Simon's 60th birthday. It is not a proceedings volume in the usual sense since the emphasis of the majority of the contributions is on reviews of the state of the art of certain fields, with particular focus on recent developments and open problems. The bulk of the articles in this Festschrift are of this survey form, and a few review Simon's contributions to a particular area. Part 1 contains surveys in the areas of Quantum Field Theory, Statistical Mechanics, Nonrelativistic Two-Body and N -Body Quantum Systems, Resonances, Quantum Mechanics with Electric and Magnetic Fields, and the Semiclassical Limit. Part 2 contains surveys in the areas of Random and Ergodic Schrodinger Operators, Singular Continuous Spectrum, Orthogonal Polynomials, and Inverse Spectral Theory. In several cases, this collection of surveys portrays both the history of a subject and its current state of the art. A substantial part of the contributions to this Festschrift are

survey articles on the state of the art of certain areas with special emphasis on open problems. This will benefit graduate students as well as researchers who want to get a quick, yet comprehensive introduction into an area covered in this volume.

17 Big Bets for a Better World Stig Tackmann, Kristian Kampmann, Henrik Skovby, 2016-11-19 The adoption of the 2030 UN Sustainable Development Goals was a landmark for the global community and our global sustainability. Now, one year after the initiation of the goals, it is time to really start thinking about implementing and realizing the new global agenda. And it already obvious that traditional thinking will not suffice. To reach the new global goals by 2030, there is a pressing need to think creatively and innovatively. The annual investment gap amounts to US \$2.5 trillion and the shortcoming of sufficient funding requires smart solutions, leverage of private sector capital and inclusion of civil society in new ways. The idea behind this book is to allow some of the world's most renowned thought-leaders to provide their perspectives on how we collectively reach the global goals. From an artist and a Michelin-chef to a bank president and a Nobel Peace Prize winner, this book presents innovative, bold, and credible solutions to the challenges we face as humanity. Contributors
