with time and space. You have your clock, that person has their own, and in the end, whether the rate at which your clock is clicking matches theirs is out of your control.' John Funnell is one of New Zealand's longest serving search and rescue pilots. Often referred to as a 'search and rescue daredevil', John has just retired after an incredible 49 years flying search and rescue helicopters. He is perhaps best-known for the 800-kilometre mission to save a scientist attacked by a shark on the remote sub-Antarctic Campbell Island, when he set off into the night knowing the distance was twice that of the helicopter's normal fuel range. Clocking an incredible 19,000 hours of flight time, John is a hero to hundreds of victims all over New Zealand. What's more, he's a natural-born story-teller, and his stories in *Rescue Pilot* are utterly gripping.

iOS or Swift, or to programming in general, learning how to write an app can seem incredibly overwhelming. That's why you need a book that: Shows you how to write an app step-by-step. Has tons of illustrations and screenshots to make everything clear. Is written in a fun and easygoing manner! In this book, you will learn how to make your own iPhone and iPad apps, through four engaging, epic-length tutorials. These hands-on tutorials describe in full detail how to build a new app from scratch. Five tutorials, five apps. Each new app will be a little more advanced than the one before, and together they cover everything you need to know to make your own apps. By the end of the series you'll be experienced enough to turn your ideas into real apps that you can sell on the App Store.

policy-makers can best make use of models in the formation of health policy goals, the identification of options, and the analysis and implementation of results.

technologies within the travel and tourism sectors. Readers will find insightful contributions on a wide range of topics, including digital marketing, social media and online travel reviews, mobile computing, augmented and virtual reality, gamification, recommender systems, electronic distribution, online education and learning, and the sharing economy. Particular attention is devoted to the actual and potential impact of big data, and the development and implementation of digital strategies, including digital marketing and the digital economy. In addition to the description of research advances and innovative concepts, a number of informative case studies are presented. The contents of the book are based on the 2018 ENTER eTourism conference, held in Jönköping, Sweden. The volume will appeal to all academics and practitioners with an interest in the most recent developments in eTourism.

Attempting to escape the inevitable event of his day, conscripted military service, Cal runs dead on into it and the early days of the Vietnam War. This heartfelt coming-of-age novel follows Cals journey from his hardscrabble but happy childhood in small-town Texas to the Kansas plains. He recounts hilarious episodes from his childhood and disappointments from his young adulthood. The books strength is its great wounded but hopeful heart and the individual insight it provides to some of the great historical events of the era, such as the Cuban Missile Crisis, the assassination of JFK, the Vietnam battle in the Ia Drang Valley, and the dividing of a nation. It is a bittersweet story of love gained and lost, and of honor gained and lost.

spectrometers, including material not found in any other published work **Portable Spectroscopy and Spectrometry: Volume Two** is an authoritative and up-to-date compendium of the diverse applications for portable spectrometers across numerous disciplines. Whereas Volume One focuses on the specific technologies of the portable spectrometers themselves, Volume Two explores the use of portable instruments in wide range of fields, including pharmaceutical development, clinical research, food analysis, forensic science, geology, astrobiology, cultural heritage and archaeology. Volume Two features contributions by a multidisciplinary team of experts with hands-on experience using portable instruments in their respective areas of expertise. Organized both by instrumentation type and by scientific or technical discipline, 21 detailed chapters cover various applications of portable ion mobility spectrometry (IMS), infrared and near-infrared (NIR) spectroscopy, Raman and x-ray fluorescence (XRF) spectroscopy, smartphone spectroscopy, and many others. Filling a significant gap in literature on the subject, the second volume of **Portable Spectroscopy and Spectrometry: Features** a significant amount of content published for the first time, or not available in existing literature. Brings together work by authors with assorted backgrounds and fields of study Discusses the central role of applications in portable instrument development Covers the algorithms, calibrations, and libraries that are of critical importance to successful applications of portable instruments Includes chapters on portable spectroscopy applications in areas such as the military, agriculture and feed, hazardous materials (HazMat), art conservation, and environmental science **Portable Spectroscopy and Spectrometry: Volume Two** is an indispensable resource for developers of portable instruments in universities, research institutes, instrument companies, civilian and government purchasers, trainers, operators of portable instruments, and educators and students in portable spectroscopy courses.

this book dives straight into building games. The book is divided into specific game genre projects, covering everything from old classics such as a Missile Command-style game, to hot new genres such as retro evolved. The chapters build in complexity through the book, and new tools are introduced along the way that can be reused for other games. The game projects covered start simple and increase in complexity as more and more tools are added to your tool chest. Ten full game projects are discussed in detail. Each solves a very different game development problem and builds on the knowledge gained from the previous project. Many advanced game development techniques are covered, including particle systems, advanced controls, artificial intelligence, blitting, scrolling, and more.

The Actor's Menu Bill Howey, 2005-09 Whether new to the business or a seasoned professional, this handbook provides actors with a personal, active approach to discovering and developing their talent. Beginning

with appetizers and ending with desserts, actors learn how to prepare a character in the same way that a master chef chooses the most complementary dishes for a feast. From typecasting to reinventing a character's story, actors discover the key ingredients that will enable them to use their own unique qualities and emotions to develop strong, believable characters that people are interested in watching. How to identify and resolve problems such as hidden agendas that can disable an actor's work; distinguish between perception, feeling, and emotions; and find lasting sources of inspiration are among the issues explored. The importance of imagination, words, and story as well as the difference between intellectual and visceral choices (and the impact of each) are also discussed.

Non-Functional Requirements in Software Engineering Lawrence Chung, Brian A. Nixon, Eric Yu, John Mylopoulos, 2012-12-06 Non-Functional Requirements in Software Engineering presents a systematic and pragmatic approach to 'building quality into' software systems. Systems must exhibit software quality attributes, such as accuracy, performance, security and modifiability. However, such non-functional requirements (NFRs) are difficult to address in many projects, even though there are many techniques to meet functional requirements in order to provide desired functionality. This is particularly true since the NFRs for each system typically interact with each other, have a broad impact on the system and may be subjective. To enable developers to systematically deal with a system's diverse NFRs, this book presents the NFR Framework. Structured graphical facilities are offered for stating NFRs and managing them by refining and inter-relating NFRs, justifying decisions, and determining their impact. Since NFRs might not be absolutely achieved, they may simply be satisfied sufficiently ('satisfied'). To reflect this, NFRs are represented as 'softgoals', whose interdependencies, such as tradeoffs and synergy, are captured in graphs. The impact of decisions is qualitatively propagated through the graph to determine how well a chosen target system satisfies its NFRs. Throughout development, developers direct the process, using their expertise while being aided by catalogues of knowledge about NFRs, development techniques and tradeoffs, which can all be explored, reused and customized. Non-Functional Requirements in Software Engineering demonstrates the applicability of the NFR Framework to a variety of NFRs, domains, system characteristics and application areas. This will help readers apply the Framework to NFRs and domains of particular interest to them. Detailed treatments of particular NFRs - accuracy, security and performance requirements - along with treatments of NFRs for information systems are presented as specializations of the NFR Framework. Case studies of NFRs for a variety of information systems include credit card and administrative systems. The use of the Framework for particular application areas is illustrated for software architecture as well as enterprise modelling. Feedback from domain experts in industry and government provides an initial evaluation of the Framework and some case studies. Drawing on research results from several theses and refereed papers, this book's presentation, terminology and graphical notation have been integrated and illustrated with many figures. Non-Functional Requirements in Software Engineering is an excellent resource for software engineering practitioners, researchers and students.

Building Continents of Knowledge in Oceans of Data: The Future of Co-Created EHealth A. Ugon, D. Karlsson, G.O. Klein, 2018-05-18 The domain of eHealth faces ongoing challenges to deliver 21st century healthcare. Digitalization, capacity building and user engagement with truly interdisciplinary and cross-domain collaboration are just a few of the areas which must be addressed. This book presents 190 full papers from the Medical Informatics Europe (MIE 2018) conference, held in Gothenburg, Sweden, in April 2018. The MIE conferences aim to enable close interaction and networking between an international audience of academics, health professionals, patients and industry partners. The title of this year's conference is: Building Continents of Knowledge in Oceans of Data - The Future of Co-Created eHealth, and contributions cover a broad range of topics related to the digitalization of healthcare, citizen participation, data science, and changing health systems, addressed from the perspectives of citizens, patients and their families, healthcare professionals, service providers, developers and policy makers. The second part of the title in particular has attracted a large number of papers describing strategies to create, evaluate, adjust or deliver tools and services for improvements in healthcare organizations or to enable citizens to respond to the challenges of dealing with health systems. Papers are grouped under the headings: standards and interoperability, implementation and evaluation, knowledge management, decision support, modeling and analytics, health informatics education and learning systems, and patient-centered services. Attention is also given to development for sustainable use, educational strategies and workforce development, and the book will be of interest to both developers and practitioners of healthcare services.

Success by Design Jenn Kennedy, 2011-02-01 Profiles of 25 leading California architects about their rise (and fall, at times). The book includes original portraits as well as stories from each architect about key decisions, philosophies and lessons learned. Also included are renderings and photos of their favorite projects.

Lazy Days Erlend Loe, 2013-11-01 Meet Bror Telemann. 42 years old. Husband to Nina Telemann. Father to Heidi, Berthold and Sabine. Currently: stage director at the Norwegian National Theatre. Soon to be: world-famous playwright and general talking head. Now he's on holiday with his family at the foot of the Alps, south of Munich. That's in Germany. Nina loves Germany. Telemann does not. Telemann loves Nigella Lawson. Ahem... he loves the theatre. That's better. So, whilst his wife and children frolic in the dusky sunshine with lederhosen-sporting, schnitzel-scoffing locals, Telemann prefers to spend his time thinking about theatre... except when his mind wanders... again. Subversive and original, this is the 2009 Norwegian bestseller from the deliciously dark mind of Erlend Loe.
