*Above and Beyond the Writing Workshop* Shelley Harwayne, 2023-10-10 When writing workshops first blossomed in classrooms, its hallmarks were genuine curiosity, individual choice, quality conversations, and engaging children's literature. A joyous hum of intention, creativity, and craft enlivened the school day. Today's teachers are often faced with a range of obstacles, as new initiatives are embraced, mandates handed down, and scripted programs are purchased. Sometimes teachers must sacrifice the original principles of the writing workshop and lose the creative venue they provide. Above and Beyond the Writing Workshop is filled with original writing challenges designed to bring back the spirit of the original writing workshop model and encourage teachers to enhance it with invention, innovation, and inspiration. Teaching creative writing is not only possible, but an important process in their instruction. Author Shelley Harwayne invites teachers to keep the workshop spirit alive by: Encouraging professional conversations on classroom ideas and methods between colleagues; Developing writing cues that allow young writers to be inquisitive, outspoken, and independent; Showing how high quality writing can make a difference; Offering an inspired and stimulating outlet for students to express their passions. Harwayne's book will help teachers encourage students to write the world around them, which can generate more critical thinking and make for a more well-rounded child.

*Transforming Rural Communities in China and Beyond* Ying Zhu, Hong Lan, David A. Ness, Ke Xing, Kris Schneider, Seung-Hee Lee, Jing Ge, 2014-11-01 This book represents one of the first attempts by a multidisciplinary research team, encompassing the social sciences, business, architecture and planning, engineering, and finance and economics, to help rural communities discover sustainable and self-reliant paths to development and transformation. The opening chapter outlines the background of the research, its importance in the context of China and other countries, the rationale for choosing the case study communities in rural China, and the composition of the research team. Chapter 2 explores key issues in the role of social entrepreneurship and leadership in rural community development. Chapter 3 analyses a green platform for a pilot transaction of China forest carbon sinks led by the Huadong Forestry Exchange. The fourth chapter examines carbon trade, forestry land rights, and the livelihoods of farmers in rural Chinese communities. Chapter 5 explores alternative energy development in rural Chinese communities, where the poor are often disproportionately dependent on fuel wood and solid biomass, causing environmental degradation, reduced productivity and the decline of income generating opportunities. Chapter 6 examines and tests the proposition that stronger communities will result from 'connected up', holistic, synergistic and inclusive planning of services and supporting infrastructure. Chapter 7 analyzes information and communications technology (ICT) based service innovations for supporting rural community enterprises. Chapter 8 highlights key elements of stronger rural communities, drawing together the themes and proposals of preceding chapters and constructing an integrated model. The authors demonstrate that interconnected community enterprises based on clean forest products, forest carbon and ecotourism can be underpinned by local infrastructure enterprises such as renewable energy, water, waste management, ICT and transport, and financial mechanisms like carbon finance, all involving skills development, leadership and social entrepreneurship coupled with corporate and investment partnerships. Such interconnected approaches are expected to generate increased employment and prosperity, improve social livelihoods, and benefit the environment.

**Natural Computing for Simulation-Based Optimization and Beyond** Silja Meyer-Nieberg, Nadiia Leopold, Tobias Uhlig, 2019-07-26 This SpringerBrief bridges the gap between the areas of simulation studies on the one hand, and optimization with natural computing on the other. Since natural computing methods have been applied with great success in several application areas, a review concerning potential benefits and pitfalls for simulation studies is merited. The brief presents such an overview and combines it with an introduction to natural computing and selected major approaches, as well as with a concise treatment of general simulation-based optimization. As such, it is the first review which covers both the methodological background and recent application cases. The brief is intended to serve two purposes: First, it can be used to gain more information concerning natural computing, its major dialects, and their usage for simulation studies. It also covers the areas of multi-objective optimization and neuroevolution. While the latter is only seldom mentioned in connection with simulation studies, it is a powerful potential technique. Second, the reader is provided with an overview of several areas of simulation-based optimization which range from logistic problems to engineering tasks. Additionally, the brief focuses on the usage of surrogate and meta-models. The brief presents recent application examples.

*Healthcare Beyond Reform* Joe Flower, 2012-04-24 There is a secret inside healthcare, and it's this: We can do healthcare for a lot less money. The only way to do that is to do it a lot better. We know it's possible because it is happening now. In pockets and branches across healthcare, people are receiving better healthcare for a lot less. Some employers, states, tribes, and health systems are d

**Beyond the Drug War in Mexico** Wil G. Pansters, Benjamin T. Smith, Peter Watt, 2017-10-30 This volume aims to go beyond the study of developments within Mexico's criminal world and their relationship with the state and law enforcement. It focuses instead on the nature and consequences of what we call the 'totalization of the drug war', and its projection on other domains which are key to understanding the nature of Mexican democracy. The volume brings together chapters written by distinguished scholars from Mexico and elsewhere who deal with three major questions: what are the main features of and forces behind the persistent militarization of the drug war in Mexico, and what are the main consequences for human rights and the rule of law; what are the consequences of these developments on the public sphere and, more specifically, on the functioning of the press and freedom of expression; and how do ordinary people engage with the effects of violence and insecurity within their communities, and which initiatives and practices of 'justice from below' do they develop to counter an increased sense of vulnerability, suffering and impunity?

**Beyond \$15** Jonathan Rosenblum, 2017-02-07 The inside story of the first successful \$15 minimum wage campaign that renewed a national labor movement With captivating narrative and insightful commentary, labor organizer Jonathan Rosenblum reveals the inside story of the first successful fight for a \$15 minimum wage, which renewed a national labor movement through bold strategy and broad inclusiveness. Just outside Seattle, an unlikely alliance of Sea-Tac Airport workers, union and community activists, and clergy staged face-to-face confrontations with corporate leaders to unite a diverse, largely immigrant workforce in a struggle over power between airport workers and business and political elites. Digging deep into the root causes of poverty wages, Rosenblum gives a blunt assessment of the daunting problems facing unions today. Beyond \$15 provides an inspirational blueprint for a powerful, all-inclusive labor movement and is a call for workers to reclaim their power in the new economy.

*Chemistry Beyond Chlorine* Pietro Tundo, Liang-Nian He, Ekaterina Lokteva, Claudio Mota, 2016-09-17 Since the industrial revolution, chlorine remains an iconic molecule even though its production by the electrolysis of sodium chloride is extremely energy intensive. The rationale behind this book is to present useful and industrially relevant examples for alternatives to chlorine in synthesis. This multi-authored volume presents numerous contributions from an international spectrum of authors that demonstrate how to facilitate the development of industrially relevant and implementable breakthrough technologies. This volume will interest individuals working in organic synthesis in industry and academia who are working in Green Chemistry and

Sustainable Technologies.

Classics, the Culture Wars, and Beyond Eric Adler, 2016-11-01 Beginning with a short intellectual history of the academic culture wars, Eric Adler's book examines popular polemics including those by Allan Bloom and Dinesh D'Souza, and considers the oddly marginal role of classical studies in these conflicts. In presenting a brief history of classics in American education, the volume sheds light on the position of the humanities in general. Adler dissects three significant controversies from the era: the so-called AJP affair, which supposedly pitted a conservative journal editor against his feminist detractors; the brouhaha surrounding Martin Bernal's contentious Black Athena project; and the dustup associated with Victor Davis Hanson and John Heath's fire-breathing jeremiad, *Who Killed Homer?* He concludes by considering these controversies as a means to end the crisis for classical studies in American education. How can the study of antiquity—and the humanities—thrive in the contemporary academy? This book provides workable solutions to end the crisis for classics and for the humanities as well. This major work also includes findings from a Web survey of American classical scholars, offering the first broadly representative impression of what they think about their discipline and its prospects for the future. Adler also conducted numerous in-depth interviews with participants in the controversies discussed, allowing readers to gain the most reliable information possible about these controversies. Those concerned about the liberal arts and the best way to educate young Americans should read this book. Accessible and jargon-free, this narrative of scholarly scandals and their context makes for both enjoyable and thought-provoking reading.

**Beyond Borders** Timothy J. Henderson, 2011-01-13 *Beyond Borders: A History of Mexican Migration to the United States* details the origins and evolution of the movement of people from Mexico into the United States from the first significant flow across the border at the turn of the twentieth century up to the present day. Considers the issues from the perspectives of both the United States and Mexico Offers a reasoned assessment of the factors that drive Mexican immigration, explains why so many of the policies enacted in Washington have only worsened the problem, and suggests what policy options might prove more effective Argues that the problem of Mexican immigration can only be solved if Mexico and the United States work together to reduce the disequilibrium that propels Mexican immigrants to the United States

*Beyond One Health* John A. Herrmann, Yvette J. Johnson-Walker, 2018-03-06 Tackling One Health from a multi-disciplinary perspective, this book offers in-depth insight into how our health and the health of every living creature and our ecosystem are all inextricably connected. Presents critical population health topics, written by an international group of experts Addresses the technical aspects of the subject Offers potential policy solutions to help mitigate current threats and prevent additional threats from occurring

*Regime Support Beyond the Balance Sheet* Matthew Rhodes-Purdy, 2017-10-31 This book challenges the conventional wisdom that policy performance is the most important determinant of regime support. It does so by focusing on two countries where performance and support do not match. Chile is the economic envy of every country in Latin America, yet support has been surprisingly anemic. By contrast, Venezuela managed to maintain extremely high levels of support during the reign of Hugo Chávez despite severe failures of governance. Resolution of these paradoxes requires turning away from policy decisions and focusing instead on how those decisions are made. Taking inspiration from democratic theory and social psychology, this book argues that extensive opportunities for direct participation in the political process engenders in citizens strong feelings of efficacy - a sense of control over the course of politics. Rhodes-Purdy uses a mixed-methods approach to test this theory, including qualitative case studies, analysis of survey data, and experimental methods.

Representation Theory and Beyond Jan Šťovíček, Jan Trlifaj, 2020-11-13 This volume contains the proceedings of the Workshop and 18th International Conference on Representations of Algebras (ICRA 2018) held from August 8–17, 2018, in Prague, Czech Republic. It presents several themes of contemporary representation theory together with some new tools, such as stable  $\infty$ -categories, stable derivators, and contramodules. In the first part, expanded lecture notes of four courses delivered at the workshop are presented, covering the representation theory of finite sets with correspondences, geometric theory of quiver Grassmannians, recent applications of contramodules to tilting theory, as well as symmetries in the representation theory over an abstract stable homotopy theory. The second part consists of six more-advanced papers based on plenary talks of the conference, presenting selected topics from contemporary representation theory: recollements and purity, maximal green sequences, cohomological Hall algebras, Hochschild cohomology of associative algebras, cohomology of local selfinjective algebras, and the higher Auslander-Reiten theory studied via homotopy theory.

Integrating Behavioral Health and Primary Care Dr. Robert Feinstein, Dr. Joseph Connelly, Marilyn Feinstein, 2017-04-13 Integrated care incorporates behavioral and physical health services into primary care and specialty medical environments. Integrated care models are patient-centered; delivered by teams of medical professionals, utilize care coordination, and a population-based approach. This book is practical, office-based, and comfortably accessible to students, residents, faculty, and all mental health professionals, primary care and medical specialists. We examine and recommend applying collaborative care and other existing models of integrated care based on existing literature. When there is no literature supporting a specific approach, our experts offer their ideas and take an aspirational approach about how to manage and treat specific behavioral disorder or problems We assume the use of integrated team staffing including a primary care or specialist provider(s), front desk staff, medical assistant(s), nurse(s), nurse practitioners, behavioral health specialist(s), health coaches, consulting psychiatrist, and care coordinator(s)/manager(s).

Mobile Cloud Visual Media Computing Gang Hua, Xian-Sheng Hua, 2015-11-23 This book explores the internet and mobile ecosystems which are powered by cloud computing - an essential, if not indispensable, part of our everyday lives. Billions of users world-wide use this technology for information sharing, communication and social networking and a high proportion of activity is driven by massive media content such as images, videos and other emerging 3D visual media. However, managing, searching and visualizing this gigantic amount of data to facilitate communication is difficult which has led to an influx of innovation and research in these areas. The research is from academics from all around the world, focusing on the intersection of mobile, cloud, visual and multimedia computing and is split into five clear parts. Topics covered in the book include mobile augmented reality, computational photography, mobile visual recognition and search, and human-computer interaction (HCI). The findings discussed is meant to spur on further creative development in both academia and industry within this area. Mobile Cloud Visual Media Computing would of great interest to researchers and academics wishing to see how the state-of-the-art in media computing research is applied to innovative applications, whilst engineers and software designers from industry will gain an insight into the key set of technologies which support mobile and cloud media computing.

**Beyond Accommodation** Jennifer Selby, Amelie Barras, Lori G. Beaman, 2018-09-06 Problems - of integration, failed political participation, and requests for various kinds of accommodation - seem to dominate the research on minority Muslims in Western nations. *Beyond Accommodation* offers a different perspective, showing how Muslim Canadians successfully navigate and negotiate their religiosity. The authors critique the model of reasonable accommodation, suggesting that it disempowers religious minorities by implicitly privileging Christianity and by placing the onus on minorities to make formal requests for accommodation. Through interviews, Muslim Canadians show that informal negotiation takes place all the time; scholars, however, have not been paying attention. This book proposes an alternative picture of how religious difference is woven into the fabric of Canadian society.

*Beyond a Divided Cyprus* Nicos Trimikliniotis, Umut Bozkurt, 2012-11-26 Cyprus is a postcolonial island known for natural gas reserves and ethnic divisions. This volume presents a fresh perspective on the Cyprus problem by examining the societal transformations taking place within the island: socioeconomic development, population transitions and migration, and rapidly changing social and political institutions.
