**Robert Mapplethorpe** Paul Martineau, Britt Salvesen, 2016-03-15 The legacy of Robert Mapplethorpe (1946 –1989) is rich and complicated, triggering controversy, polarizing critics, and providing inspiration for many artists who followed him. Mapplethorpe, one of the most influential figures of his time, today stands as an example to emerging photographers who continue to experiment with the boundaries and concepts of the beautiful. Robert Mapplethorpe: The Photographs offers a timely and rewarding examination of his oeuvre and influence. Drawing from the extraordinary collection jointly acquired in 2011 by the J. Paul Getty Museum and the Los Angeles County Museum of Art from The Robert Mapplethorpe Foundation, as well as the Mapplethorpe Archive housed at the Getty Research Institute, the authors were given the unique opportunity to explore new resources and present fresh perspectives. The result is a fascinating introduction to Mapplethorpe's career and legacy, accompanied by a rich selection of illustrations covering the remarkable range of his photographic work. All of these beautifully integrated elements contribute to what promises to become an essential point of access to Mapplethorpe's work and practice. This publication is issued on the occasion of the exhibition Robert Mapplethorpe: The Perfect Medium on view at both the J. Paul Getty Museum and at the Los Angeles County Museum of Art from March 15 and March 20, respectively, through July 31, 2016; at the Musée des Beaux-Arts de Montréal from September 10, 2016, through January 15, 2017; and at the Art Gallery of New South Wales, Sydney, from October 28, 2017, through February 4, 2018.

*Another Way of Telling* John Berger, Jean Mohr, 2016-04-07 In one of the most eloquent accounts of photography ever devised (originally published in 1982 and unavailable for many years), the writer John Berger and the photographer Jean Mohr set out to understand the fundamental nature of photography and how it makes its impact. Asking a range of questions – What is a photograph? What do photographs mean? How can they be used? – they give their answers in terms of a photograph as 'a meeting place where the interests of the photographer, the photographed, the viewer and those who are using the photography are often contradictory'. From these beginnings they develop a theory of photography that has at its centre the form's essential ambiguity, arguing that photography is totally unlike a film and has nothing to do with reportage. Rather, it constitutes 'another way of telling'. The unique combination of critic and photographer results in a work that moves beyond the landmarks established by Walter Benjamin, Roland Barthes and Susan Sontag to establish a new theory of photography. This unique combination of words and pictures includes 230 photographs by Jean Mohr.

**Photography Now** Charlotte Jansen, 2021-04-22 In the last century, photography was always novel. Now, it feels like our world is over-saturated with images. In the 21st century, what can photography do that is new? This extensively illustrated survey answers that question, presenting fifty photographers from around the world who are defining photography today. Their styles, formats, and interpretations of the medium vary widely, but in each case, the work featured in this book represents photography doing what it has always done best: finding new ways to tell stories, and new stories to tell. Artists featured include Nan Goldin, Wolfgang Tillmans, Hassan Hajjaj, Andreas Gursky, Juno Calypso, Ryan McGinley, Zanele Muholi, Shirin Neshat, Catherine Opie, Martin Parr, Cindy Sherman, Hiroshi Sugimoto and Juergen Teller.

**The Physics and Art of Photography, Volume 2** John Beaver, 2018-11-26 This book uses art photography as a point of departure for learning about physics, while also using physics as a point of

departure for asking fundamental questions about the nature of photography as an art. Although not a how-to manual, the topics center around hands-on applications, sometimes illustrated by photographic processes that are inexpensive and easily accessible to students (including a versatile new process developed by the author, and first described in print in this series). A central theme is the connection between the physical interaction of light and matter on the one hand, and the artistry of the photographic processes and their results on the other. One half of *Energy and Color* focuses on the physics of energy, power, illuminance, and intensity of light, and how these relate to the photographic exposure, including a detailed example that follows the emission of light from the sun all the way through to the formation of the image in the camera. These concepts are described in both their traditional manner, but also using very-low sensitivity photography as an example, which brings the physical concepts to the fore in a visible way, whereas they are often hidden with ordinary high-speed photographic detectors. *Energy and Color* also considers color in terms of the spectrum of light, how it interacts with the subject, and how the camera's light detector interacts with the image focused upon it. But of equal concern is the only partially-understood and sometimes unexpected ways in which the human eye/brain interprets this spectral stimulus as color. The volume covers basic photographic subjects such as shutter, aperture, ISO, metering and exposure value, but also given their relations to the larger themes of the book less familiar topics such as the Jones-Condit equation, Lambertian versus isotropic reflections, reflection and response curves, and the opponent-process model of color perception. Although written at a beginning undergraduate level, the topics are chosen for their role in a more general discussion of the relation between science and art that is of interest to readers of all backgrounds and levels of expertise.

The Power of Photography Peter Fetterman, 2022-05-02 120 incredible, moving photographs that reveal the power of photography Curated by leading gallerist, Peter Fetterman When I photograph, I project what I'm not. What I would like to be. - Lillian Bassman The power of photography lies in its ability to ignite emotions across barriers of language and culture. This selection of iconic images, compiled by pioneering collector and gallerist Peter Fetterman, celebrates the photograph's unique capacity for sensibility. Peter has been championing the photographic arts for over 30 years. He runs what is arguably the most important commercial photography gallery in the world. During the long months of lockdown, Peter 'exhibited' one photograph per day, accompanied by inspirational text, quotes and poetry. This digital collection struck a chord with followers from around the world. The *Power of Photography* presents 120 outstanding images from the series, along with Peter's insightful words. This carefully curated selection offers an inspiring overview of the medium while paying homage to masters of the art. From the bizarre Boschian fantasies of Melvin Sokolsky to the haunting humanity of Ansel Adams's family portraits; from Miho Kajioka's interpretation of traditional Japanese aesthetics of to the joyful everyday scenes of Evelyn Hofer; from rare interior shots by famed nude photographer Ruth Bernhard to Bruce Davidson's wistful depiction of young men playing ball games on a street; this book gathers some of the most unique and heartening photographs from the 20th century. Each image is a time capsule, offering us a glimpse into days gone past. Yet each photograph also speaks of tranquillity, peace, and hope for the future.

Expired Paper ,2017 Divided into sections that represent the breadth of Alison Rossiter's (born 1953) process and vision, 'Expired Paper' offers a comprehensive look at the artist's body of cameraless photo-art? Latent, Landscapes, Pools, Pours, Dips, Blurs, Fours and Collages. Art critic Leah

Ollman has been contemplating Rossiter's work for years, and her accompanying text serves as an ideal complement to the images: 'All of the works pay homage to the rich idiosyncrasies of photographic papers across history, and restore a sanctity to the photograph as object. Made without cameras, lenses or film, the works are nothing but process and materiality.' The book also includes a selection of early 20th-century photographic paper packages (which the artist has collected for over 10 years) in a separate booklet.
