The Big Idea ,2011 From the Pythagorean theorem to DNA's double helix, from the discovery of microscopic life-forms to the theory of relativity--the big ideas of science and technology shape an era's worldview. Open this book, grasp the newest ideas from thought leaders of today, then spring off from them to move back through the past, one big idea at a time. Meet the people who gave birth to these ideas--and those who fought against them. Meet the MIT electrical engineer currently developing a way to turn on the lights cordlessly, then move back through Nikola Tesla's visionary concept of the wireless transfer of energy, Thomas Edison's groundbreaking work in developing a nationwide electrical grid, Ben Franklin's experiments to capture electricity, all the way back to ancient Greece, where Thales of Miletus described static electricity as a property of naturally occurring amber. Ingeniously organized and eminently browsable, this richly visual volume is divided into six big sections--medicine, transportation, communication, biology, chemistry, and the environment. Words and images that work together to explain such fascinating and elusive subjects as cloud computing, sunshields to cool the Earth, and self-driving cars. What did it take to get to these futuristic realities? Then, turn the page and follow a reverse-chronological illustrated time line of science and technology. This remarkable illustrated history tells the story of every Big Idea in our history, seen through the lens of where science is taking us today - and tomorrow. With an irresistibly cutting-edge look and original illustrations created by award-winning Ashby Design, paired with the reliable authority and comprehensiveness that National Geographic's world history books always offer, this is a one-of-a-kind trip to the future and back through all time all in one.

Classic Car DK,2023-04-11 When I see an Alfa Romeo, I lift my hat. Henry Ford Few things ignite such reverence as a classic car. James Joyce and Photography Georgina Binnie-Wright,2022-05-19 *James Joyce and Photography* is the first book to explore in-depth James Joyce's personal and professional engagement with photography. Photographs, photographic devices and photographically-inspired techniques appear throughout Joyce's

work, from his narrator's furtive proto-photographic framing in *Silhouettes* (c. 1897), to the aggressively-minded 'Tulloch-Turnbull girl with her coldblood kodak' in *Finnegans Wake* (1939). Through an exploration of Joyce's manuscripts and photographic and newspaper archival material, as well as the full range of his major works, this book sheds new light on his sustained interest in this visual medium. This project takes Joyce's intention in *Dubliners* (1914) to 'betray the soul of that hemiplegia or paralysis which many consider a city' as key to his interaction with photography, which in his literature occupies a dual position between stasis and innovation.

The World Atlas of Tattoo Anna Felicity Friedman, James Elkins, 2015-01-01 A grand tour of the world's great tattoos--Atlas Obscura This book--part global art historical tome, part coffee-table book of visual wonders--is a valuable corrective to many silly things that we assume about tattooing.--The New Republic A lavishly illustrated global exploration of the vast array of styles and most significant practitioners of tattoo from ancient times to today Tattoo art and practice has seen radical changes in the 21st century, as its popularity has exploded. An expanding number of tattoo artists have been mining the past for lost traditions and innovating with new technology. An enormous diversity of styles, genres, and techniques has emerged, ranging from geometric blackwork to vibrant, painterly styles, and from hand-tattooed works to machine-produced designs. With over 700 stunning color illustrations, this volume considers historical and contemporary tattoo practices in Europe, the Americas, the Middle East, North and Sub-Saharan Africa, Asia, Australia, and the Pacific Islands. Each section, dedicated to a specific geographic region, features fascinating text by tattoo experts that explores the history and traditions native to that area as well as current styles and trends. The World Atlas of Tattoo also tracks the movement of styles from their indigenous settings to diasporic communities, where they have often been transformed into creative, multicultural, hybrid designs. The work of 100 notable artists from around the globe is showcased in this definitive reference on a widespread and intriguing art practice.

Capitalism and the Camera Kevin Coleman, Daniel James, 2021-05-11 A provocative exploration of photography's relationship to capitalism, from leading theorists of visual culture. Photography was invented between the publication of Adam Smith's *The Wealth of Nations* and Karl Marx and Frederick Engels's *The Communist Manifesto*. Taking the intertwined development of capitalism and the camera as their starting point, the essays in *Capitalism and the Camera* investigate the relationship between capitalist accumulation and the photographic image, and ask whether photography might allow us to refuse capitalism's violence--and if so, how? Drawn together in productive disagreement, the essays in this collection explore the relationship of photography to resource extraction and capital accumulation, from 1492 to the postcolonial; the camera's potential to make visible critical understandings of capitalist production and society, especially economies of class and desire; and propose ways that the camera and the image can be used to build cultural and political counterpublics from which a democratic struggle against capitalism might emerge. With essays by Ariella Aïsha Azoulay, Siobhan Angus, Kajri Jain, Walter Benn Michaels, T. J. Clark, John Paul Ricco, Blake Stimson, Chris Stolarski, Tong Lam, and Jacob Emery.

Islamic Art Jonathan M. Bloom, Sheila S. Blair, 2019-01-01 A group of renowned scholars, collectors, artists, and curators grapple with the challenging notion of defining Islamic art.
