*Electrified Voices* Kerim Yasar, 2018-10-23 Long before karaoke's ubiquity and the rise of global brands such as Sony, Japan was a place where new audio technologies found eager users and contributed to new cultural forms. In *Electrified Voices*, Kerim Yasar traces the origins of the modern soundscape, showing how the revolutionary nature of sound technology and the rise of a new auditory culture played an essential role in the formation of Japanese modernity. A far-reaching cultural history of the telegraph, telephone, phonograph, radio, and early sound film in Japan, *Electrified Voices* shows how these technologies reshaped the production of culture. Audio technologies upended the status of the written word as the only source of prestige while revivifying traditional forms of orality. The ability to reproduce and transmit sound, freeing it from the constraints of time and space, had profound consequences on late nineteenth-century language reform; twentieth-century literary, musical, and cinematic practices; the rise of militarism and nationalism in the 1920s and 30s; and the transition to the postwar period inaugurated by Emperor Hirohito's declaration of unconditional surrender to Allied forces—a declaration that was recorded on a gramophone record and broadcast throughout the defeated Japanese empire. The first cultural history in English of auditory technologies in modern Japan, *Electrified Voices* enriches our understanding of Japanese modernity and offers a major contribution to sound studies and global media history.

**Broadcasting in Japan** Masami Ito, 2010-11-01 Japan has developed what is arguably the most sophisticated and the most democratic broadcasting system in the world. The Great Kanto Earthquake of 1st September 1923, with its devastation and confusion drove home in its appalling way the importance of being able to broadcast immediate information to the public. The same year, the Ministry of Communications promptly established an administrative system to regulate broadcasting. In less than a decade over one million people were registered listeners. Under the post war Constitution of 1946 freedom of speech and all other forms of expression was guaranteed, and the subsequent Broadcast Law instituted a dual system of broadcasting with the public service Nippon Hoso Kyokai (NHK) on the one hand, and commercial and private broadcasting organizations on the other. In 1978 there were ninety-one television broadcasting organizations and fifty-one radio broadcasting organizations. In this informative study, Professor Ito and his team comprehensively describe the staggering growth of broadcasting in Japan from the dawn of radio and television to satellite communication and through to the multiplex broadcasting of the future.

*Made in Japan* Roger Handy, Maureen Erbe, Aileen Antonier, 1993 *Made in Japan* traces the history of the transistor radio from its American invention to its Japanese mass production and its subsequent development as a popular cultural icon and as an art form in its own right.

Broadcasting Politics in Japan Ellis S. Krauss,2000 The aftermath of Japan's 1945 military defeat left its public institutions in a state of deep crisis; virtually every major source of state legitimacy was seriously damaged or wholly remade by the postwar occupation. Between 1960 and 1990, however, these institutions renewed their strength, taking on legitimacy that erased virtually all traces of their postwar instability. How did this transformation come about? This is the question Ellis S. Krauss ponders in *Broadcasting Politics in Japan*; his answer focuses on the role played by the Japanese mass media and in particular by Japan's national broadcaster, NHK. Since the 1960s, television has been a fixture of the Japanese household, and NHK's TV news has until very recently been the dominant, and most trusted, source of political information for the Japanese citizen. NHK's news style is distinctive among the broadcasting systems of industrialized countries; it emphasizes facts over interpretation and gives unusual priority to coverage of the national bureaucracy. Krauss argues that this approach is not simply a reflection of Japanese culture, but a result of the organization and processes of NHK and their relationship with the state. These factors had profound consequences for the state's postwar re-legitimization, while the commercial networks' recent challenge to NHK has helped engender the wave of cynicism currently faced by the state. Krauss guides the reader through the complex interactions among politics, media organizations, and Japanese journalism to demonstrate how NHK television news became a shaper of Japan's political world, rather than simply a lens through which to view it.

*Japanese Telecommunications* Ruth Taplin,Masako Wakui,2006-02-01 Presenting a comprehensive survey of the telecommunications industry in Japan, Taplin and Wakui cover the different sectors of the industry – including mobile, broadband and satellite, whilst considering key questions such as the structure and economics of the industry, government policy, and international relations issues connected to the industry. The volume brings together unique analysis by renowned experts in the telecommunications field. One major overall problem is that, unlike many other industries, Japan has lagged behind other countries in telecommunications. Japanese Telecommunications considers why this should be so, showing how far this is attributable to an unmodernized industry structure, and assessing the measures being taken to address the problem. After over a decade of struggle, Japan has recorded rapid uptake of broadband, and Japanese advanced mobile services have become

increasingly successful on a global scale. Japan has also undergone regulatory reform, and competition policy is now given top priority by government. Taplin and Wakui examine the most recent developments and provide signposts for the future.
