Sir Ernest Satow's Private Letters to W.G. Aston and F.V. Dickins Ernest Mason Satow,2008 The distinguished British scholar-diplomat Ernest Mason Satow (1843-1929) was one of the most prominent and pre-eminent Japanologists in the Victorian era when the subject was newly created as Japan began to open its doors to foreigners from the mid-1850s. He shared this honour with Basil Hall Chamberlain (1850-1935) and the two addressees of the letters reproduced here by permission of the U.K. National Archives: co-worker William George Aston (1841-1911) and Frederick Victor Dickins (1838-1915). This book is part of a series in which Ian Ruxton is making some of the extensive Satow Papers publicly available for the first time. It includes an introduction by Professor Peter Kornicki of the East Asia Institute at the University of Cambridge, eight black & white illustrations, 166 annotations, two appendices, a select bibliography and a full index for ease of reference. (xvi + 330 pp.) Reasonably priced for students and researchers. Library of Congress Control Number: 2008901176

Open Space Mariel Borowitz,2024-02-06 An examination of environmental satellite data sharing policies, offering a model of data-sharing policy development, case and practical recommendations for increasing global data sharing. Key to understanding and addressing climate change is continuous and precise monitoring of environmental conditions. Satellites play an important role in collecting climate data, offering comprehensive global coverage that can't be matched by in situ observation. And yet, as Mariel Borowitz shows in this book, much satellite data is not freely available but restricted; this remains true despite the data-sharing advocacy of international organizations and a global open data movement. Borowitz examines policies governing the sharing of environmental satellite data, offering a model of data-sharing policy development and applying it in case studies from the United States, Europe, and Japan—countries responsible for nearly half of the unclassified government Earth observation satellites. Borowitz develops a model that centers on the government agency as the primary actor while taking into account the roles of such outside actors as other government officials and non-governmental actors, as well as the economic, security, and normative attributes of the data itself. The case studies include the U.S. National Aeronautics and Space Administration (NASA) and the U.S. National Oceanographic and Atmospheric Association (NOAA), and the United States Geological Survey (USGS); the European Space Agency (ESA) and the European Organization for the Exploitation of Meteorological Satellites (EUMETSAT); and the Japanese Aerospace Exploration Agency (JAXA) and the Japanese Meteorological Agency (JMA). Finally, she considers the policy implications of her findings for the future and provides recommendations on how to increase global sharing of satellite data.
