**Japan's Relations with Southeast Asia** Peng Er Lam,2013 The Fukuda Doctrine has been the official blueprint to Japan's foreign policy towards Southeast Asia since 1977. This book examines the Fukuda Doctrine in the context of Japan-Southeast Asia relations, and discusses the possibility of a non-realist approach in the imagining and conduct of international relations in East Asia. The collapse of 54 years of Liberal Democratic Party rule and the advent of a new Democratic Party of Japan raises the question of whether the Fukuda Doctrine is still relevant as a framework to analyse Tokyo's policy and behaviour towards Southeast Asia. Looking at its origins and norms amidst three decades of change, the book argues that the Fukuda Doctrine is still relevant to Japan-Southeast Asian relations, and should be extended to relations between China and Japan if an East Asian Community is to be built. The book goes on to discuss the Fukuda Doctrine in relation to the power shift in Asia, including the revitalization of Japan's security role. By providing a detailed understanding of a non-western perspective of Japan's relationship with Southeast Asia, this book is a useful contribution for students and scholars of Asian Studies, Politics and International Relations.

**Intellectual Property and Free Trade Agreements in the Asia-Pacific Region**

Christoph Antons, Reto M. Hilty, 2014-12-05 This book is highly topical. The shift from the multilateral WTO negotiations to bilateral and regional Free Trade Agreements has been going on for some time, but it is bound to accelerate after the WTO Doha round of negotiations is now widely regarded as a failure. However, there is a particular regional angle to this topic as well. After concluding that further progress in the Doha round was unlikely, Pacific Rim nations recently have progressed with the negotiations of a greatly expanded Trans-Pacific Partnership Agreement that includes industrialised economies and developed countries such as the United States, Japan, Australia and New Zealand, recently emerged economies such as Singapore, but also several developing countries in Asia and Latin America such as Malaysia and Vietnam. US and EU led efforts to conclude FTAs with Asia-Pacific nations are also bound to accelerate again, after a temporary slowdown in the negotiations following the change of government in the United States and the expiry of the US President's fast-track negotiation authority. The book will provide an assessment of these dynamics in the world's fastest growing region. It will look at the IP chapters from a legal perspective, but also put the developments into a socio-economic and political context. Many agreements in fact are concluded because of this context rather than for purely economic reasons or to achieve progress in fields like IP law. The structure of the book follows an outline that groups countries into interest alliances according to their respective IP priorities. This ranges from the driving forces of the EU, US and Japan, via Asia-Pacific resource-rich but IP poor economies such as Australia and New Zealand, recently emerged economies with strong IP systems such as Singapore and Korea to leading developing countries such as China and India and 'second tier industrializing

economies' such as Thailand, Malaysia and Indonesia.

*Building Legislative Coalitions for Free Trade in Asia* Megumi Naoi,2015-07-20 What accounts for the large reduction in trade barriers among new democracies in Asia after World War II? Using new data from Japan and Thailand, this book provides a surprising answer: politicians, especially party leaders, liberalized trade by buying off legislative support with side-payments such as pork barrel projects. Trade liberalization was a legislative triumph, not an executive achievement. This finding challenges the conventional 'insulation' argument, which posits that insulating executives from special interest groups and voters is the key to successful trade liberalization. By contrast, this book demonstrates that party leaders built open economy coalitions with legislators by feeding legislators' rent-seeking desires with side-payments rather than depriving their appetites. This book unravels the political foundations of open economy.

Incorporating Foreign Language Content in Humanities Courses Priya Ananth,Leah Tolbert Lyons,2019-07-26 *Incorporating Foreign Language Content in Humanities Courses* introduces innovative ways to integrate aspects of foreign language study into courses containing humanities concepts. The edited collection offers case studies from various universities and across multiple languages. It serves as a useful guide to all foreign language faculty with any language expertise (as well as others interested in promoting foreign languages) for the adaptation and development of their own curricula. Infusing foreign language content into English-taught humanities courses helps promote languages

as practical and relevant to students. It will be of interest to language educators, including teachers, teachers-in-training, teacher educators, and administrators.

**Drunk Japan** Mark D. West,2020-03-11 Each society that consumes alcohol has its own unique drinking culture, and each society deals with the drunken products of that culture in particular ways. As Mark D. West shows in *Drunk Japan*, the distinctive features of Japanese drinking culture and its intoxication-related laws are not simply interesting in and of themselves, but offer a unique window into Japanese society more broadly. Drawing upon close readings of over 5,000 published Japanese court opinions on drunkenness-related cases, he provides a rich description of Japanese alcohol consumption, drinking culture, and intoxication. West reveals that the opinions not only show patterns in what, where, and why people drink in Japan, but they also focus to a surprising extent on characteristics (including occupation, wealth, gender, and education) of individual litigants. By examining the consistencies and contradictions that emerge from the cases, West finds that, at its most extreme, the Japanese legal system is hyper-individualized. Focusing on individual people sometimes leads courts to ignore forensic evidence, to rely on post-arrest drinking tests, and to calculate prison sentences based on factors such as a mother's promise to help her

adult child abstain. Cumulatively, the colorful and often tragic cases West uses not only illuminate the complexity of the culture, but they also reveal an entirely new vision of Japanese law and a comprehensive picture of alcohol use in Japanese society writ large.

*Japan* International Monetary Fund. Asia and Pacific Dept, 2015-07-23 **KEY ISSUES** Abenomics has lifted Japan out of the doldrums and needs to be reinforced to accomplish the desired “once in a lifetime” economic regime shift. Building on initial positive results, policies now need to embark on a sustained effort to meet the unprecedented challenges Japan is facing: ending an entrenched deflationary mindset, raising growth, restoring fiscal and debt sustainability, and maintaining financial stability in the face of adverse demographics. Japan should be at the vanguard of structural reform. More vigorous efforts to raise labor supply and deregulate domestic markets, backed by further endeavors to raise wages and investment and designed to boost confidence and raise domestic demand, will be essential to lift growth, facilitate fiscal consolidation, and unburden monetary policy. A credible medium-term fiscal consolidation plan is needed to remove uncertainty about the direction of policies that may be holding back domestic demand. The overarching goal should be to put debt on a downward path, through gradual but steady consolidation that does not derail growth and inflation momentum. It should be based on prudent economic

assumptions and on concrete structural revenue and expenditure measures identified upfront. More explicit monetary guidance would enhance inflation dynamics. Actual and expected inflation remain well below the Bank of Japan's (BoJ's) inflation target and monetary policy transmission remains weak. The BoJ needs to stand ready to undertake further easing and should provide stronger guidance to markets through enhanced communication. Absent deeper structural reforms, even with further easing, reaching two-percent inflation in a stable manner is likely to take longer than envisaged, suggesting that the BoJ should put greater emphasis on achieving the inflation target in a stable manner rather than within a specific time frame. The financial sector should be a greater catalyst for growth, and guard against risks from unconventional policies. The soundness of the financial system allows more risk taking and consolidation, while remaining resilient to the likely higher volatility of asset prices, exchange rates and interest rates, and lower liquidity in the JGB market as quantitative easing proceeds. While the 2014 external position was assessed to be broadly aligned with fundamentals, subsequent developments and incomplete policies raise the risk of negative spillovers. With the depreciation of the yen relative to its mid-2014 level, further monetary easing without bolder structural reforms and a credible medium-term fiscal consolidation plan could lead to sluggish domestic demand and overreliance on yen depreciation to pursue domestic policy objectives.
