L Is for Lion Annie Rachele

Lanzillotto, 2013-01-11 A 1960s Bronx tomboy learns how to survive her brutal but humorous Italian family and all the rest that life throws her. The harder you hit the pavement, the higher you fly. This vivid memoir speaks the intense truth of a Bronx tomboy whose 1960s girlhood was marked by her father's lullabies laced with his dissociative memories of combat in World War II. At four years old, Annie Rachele Lanzillotto bounced her Spaldeen on the stoop and watched the boys play stickball in the street; inside, she hid silver teaspoons behind the heat pipes to tap calls for help while her father beat her mother. At eighteen, on the edge of ambitious freedom, her studies at Brown University were halted by the growth of a massive tumor inside her chest. Thus began a wild, truth-seeking journey for survival, fueled by the lessons of lasagna vows, and Spaldeen ascensions. From the stoops of the Bronx to cross-dressing on the streets of Egypt, from the cancer ward at Memorial Sloan-Kettering to New York City's gay club scene of the '80s, this poignant and authentic story takes us from underneath the dining room table to the stoop, the sidewalk, the street, and, ultimately, out into the wide world of immigration, gay subculture, cancer treatment, mental illness, gender dynamics, drug addiction, domestic violence, and a vast array of Italian American characters. With a quintessential New Yorker as narrator and guide, this journey crescendos in a reluctant return home to the timeless wisdom of a peasant, immigrant grandmother, Rosa Marsico Petruzzelli, who shows us the sweetest essence of soul. Annie Rachele Lanzillotto is a poet and performance artist living in New York. She teaches master classes in solo performance for the Acting Apprentice Company at Actors Theatre of Louisville. She is the author

of a book of poetry, Schistsong.

The Archaeology of Science Michael Brian Schiffer, 2013-04-19 This manual pulls together—and illustrates with interesting case studies—the variety of specialized and generalized archaeological research strategies that yield new insights into science. Throughout the book there are templates, consisting of questions, to help readers visualize and design their own projects. The manual seeks to be as general as possible, applicable to any society, and so science is defined as the creation of useful knowledge—the kinds of knowledge that enable people to make predictions. The chapters in Part I discuss the scope of the archaeology of science and furnish a conceptual foundation for the remainder of the book. Next, Part II presents several specialized, but widely practiced, research strategies that contribute to the archaeology of science. In order to thoroughly ground the manual in real-life applications, Part III presents lengthy case studies that feature the use of historical and archaeological evidence in the study of scientific activities.

Understanding Computers Deborah Morley, Charles S. Parker, 2006-03 Give your students a classic, well-rounded introduction to computer concepts with a modern twist! Known for its readability and breadth of topics covered, Understanding Computers: Today and Tomorrow will ensure that students have the comprehensive, current knowledge of computer concepts and issues needed to succeed in our technocentric society. This 11th Edition offers exciting new features and updates to make its content more approachable and meaningful to students.

A First Course in Scientific Computing Rubin Landau, 2011-10-30 This book offers a new approach to introductory scientific computing. It aims to make students comfortable using computers to do science, to provide them with the computational tools and knowledge they need throughout their college careers and into their professional careers, and to show how all the pieces can work together. Rubin Landau introduces the requisite mathematics and computer science in the course of realistic problems, from energy use to the building of skyscrapers to projectile motion with drag. He is attentive to how each discipline uses its own language to describe the same concepts and how computations are concrete instances of the abstract. Landau covers the basics of computation, numerical analysis, and programming from a computational science perspective. The first part of the printed book uses the problem-solving environment Maple as its context, with the same material covered on the accompanying CD as both Maple and Mathematica programs; the second part

uses the compiled language Java, with equivalent materials in Fortran90 on the CD; and the final part presents an introduction to LaTeX replete with sample files. Providing the essentials of computing, with practical examples, A First Course in Scientific Computing adheres to the principle that science and engineering students learn computation best while sitting in front of a computer, book in hand, in trial-and-error mode. Not only is it an invaluable learning text and an essential reference for students of mathematics, engineering, physics, and other sciences, but it is also a consummate model for future textbooks in computational science and engineering courses. A broad spectrum of computing tools and examples that can be used throughout an academic career Practical computing aimed at solving realistic problems Both symbolic and numerical computations A multidisciplinary approach: science + math + computer science Maple and Java in the book itself; Mathematica, Fortran90, Maple and Java on the accompanying CD in an interactive workbook format

The Computer and Information Science and Technology Abbreviations and Acronyms Dictionary

David W. South, 1994-05-06 Written for the professional and the layman, the book provides the meanings of important and interesting acronyms in the broad area of computing and information science and technology. The acronyms and abbreviations contained in this book were created by the men and women of the computer and information age to save time and space and eliminate unnecessary repetition and wordage. The book is of value to engineers, scientists, technologists, executives and managers in technical fields, programmers, systems analysts, writers, and computer owners or potential buyers.

JavaTech, an Introduction to Scientific and Technical Computing with Java Clark S.

Lindsey, Johnny S. Tolliver, Thomas

Lindblad, 2005-10-13 JavaTech demonstrates the ease with which Java can be used to create powerful network applications and distributed computing applications. It can be used as a textbook for introductory or intermediate level programming courses, and for more advanced students and

researchers who need to learn Java for a particular task. JavaTech is up to date with Java 5.0.--BOOK JACKET.

Find Me J.S. Monroe, 2017-03-21 A young man will go to any length to uncover the truth about his girlfriend's death in this "expertly crafted, psychologically ambitious" thriller (Publishers Weekly, starred review). Jarlath "Jar" Costello never got over his girlfriend's suicide five years ago. In fact, he's certain she's still alive. The brilliant young Cambridge student was crushed by the loss of her father. It's said that she leapt to her death off the cliffs of Norfolk. The case is closed . . . though her body was never found. Jar still sees Rosa everywhere—a face on the train, a figure on the cliff. He wonders if he might be going mad. Then he gets an imploring email: "Find me, Jar. Find me, before they do. . . ." As Jar digs into the past, he enters a dark underworld where nothing is as it seems, and no one can be trusted. He is soon thrust into the heart of a larger intrigue that may finally shed some light on Rosa's death . . . even as it dangerously threatens his own life.

Social Network Analysis Xiaoming Fu, Jar-Der Luo, Margarete Boos, 2017-03-31 The book addresses the issue of interdisciplinary understanding of collaboration on the topic of social network

studies. Researchers and practitioners from various disciplines including sociology, computer science, socio-psychology, public health, complex systems, and management science have worked largely independently, each with quite different principles, terminologies, theories. and methodologies. The book aims to fill the gap among these disciplines with a number of the latest interdisciplinary collaboration studies.
