Just Chevys Brian Earnest,2010-07-28 Salute to the bow tie Louis Chevrolet was a well-known race car driver and builder/designer in the early 1900s, but it's doubtful ol' Louis himself could ever have imagined that his French surname would eventually be as purely American as baseball, hot dogs, and apple pie. Just Chevys assembles a century of great Chevrolets and the stories that make these cars memorable. From the Model T fighters of the early 1900s, to the fabulous finned wonders of the 1950s, the high flying Corvettes and muscle cars of the 1960s and beyond, Just Chevys spotlights the cars, and the car lovers, who have made Chevrolet America's most beloved car.

Copo Camaro Jeffrey K. Leestma,2012-10-30 The COPO Camaro was ushered into existence in the late '60s by Chevrolet dealers who were installing big-block engines in Camaros and taking them racing. Chevrolet management knew a good thing when they saw it and, tapping into GM's Central Office Production Order (COPO) system, began to outfit stock Camaros with essentially Corvette drivetrains. Then, upping the ante in 1969, Chevy built just 69 super-high-performance COPO Camaros with aluminum-block engines and they became instant classics. The result was a performance configuration that made history. Now, more than four decades later, Chevrolet has recreated the magic by building 69 2012 COPO Camaros intended for sportsman class drag racing competition. ... This behind-the-scenes story puts the new COPO Camaro into historical context and provides specifications for every one of the 69 units created.--Publisher's description.

The Ferocious Tyrannosaurus Rex Natalie Humphrey,2021-07-15 The Tyrannosaurus rex was a deadly predator that is believed to have eaten nearly any prey it came across. Reaching more than 40 feet tall with a mouth full of razor-sharp teeth, the Tyrannosaurs rex was the king of dinosaurs. Through vivid illustrations of both what scientists believe these dinosaurs looked like and what their homes may have looked like, young readers will discover what life was like millions of years ago. With important facts about where the Tyrannosaurus rex was discovered and what is known about it, young readers will learn how the Tyrannosaurs rex ferociously ruled the Cretaceous era.

Genetic Disorders and the Fetus Aubrey Milunsky,2012-12-06 About 21 years ago prenatal diagnosis became part of the physician's diagnostic armamentarium against genetic defects. My first monograph in 1973 (The Prenatal Diagnosis of Hereditary Disorders) critically assessed early progress and enunciated basic principles in the systematic approach to prenatal genetic diagnosis. Six years later and under the current title, a subsequent volume provided the first major reference source on this subject. The present second (effectively third) edition, which was urged in view of the excellent reception of the two earlier volumes, reflects the remarkable growth of this new discipline and points to significant and exciting future developments. Notwithstanding these advances, the use of the new tools and techniques for the benefit of at-risk parents has taken many more years than most anticipated. Key factors have been the lack of teaching of human genetics in medical schools in the preceding decades and the difficulty of educating practicing physicians in a new scientific discipline. Even today the teaching of genetics in medical schools leaves much to be desired and this will further delay the introduction of newer genetic advances to the bedside.

NEA Literature Fellowships Don Ball,2008-12 The National Endowment for the Arts (NEA) Literature Fellowship Program has helped new writers find their voices and established authors continue their work. Some of the early grants went to writers whose work is now a permanent part of America's literary legacy, such as Gwendolyn Brooks, Isaac Bashevis Singer, John Berryman, Denise Levertov, Robert Penn Warren, and Eudora Welty. The NEA Fellowships have also recognized many writers before their talents were acknowledged by a wider audience, such as Alice Walker, Tobias Wolff, and Maxine Hong Kingston. This publication, issued in the 40th year of NEA's existence, celebrates the history of the NEA Literature Fellowship Program. Photos.
