A Beginner's Guide to iPhone 6 and iPhone 6 Plus Katie Morris,2014-10-06 The latest iPhone models were released on September 19th in the United States and the United Kingdom, and according to Apple, are the “biggest advancements in iPhone history.” It’s a clever play on words, as the new models both sport much larger screens than the iPhones of yesteryear. Whereas the iPhone 4S and below had a meager 3.5 inch screen (considered generous at the time), the iPhone 5, 5S and 5C were stretched out to 4 inches. Faced with stiff competition from Android flagships that have long featured big screens, the iPhone 6 and 6 Plus are Apple’s authoritative answer to the growing number of iOS fans restlessly awaiting their own big phones. The new phones are powered behind the scenes by Apple’s latest software release, iOS 8, which also brings many features and changes with it. This guide is designed to walk you through the most important parts of the phone, from the basics and learning how to navigate through the phone, to more advanced features like setting up email accounts and understanding what the cloud really is. Towards the end, a list of the 20 top paid and free applications will be available to add many different functionalities to your phone once you are comfortable enough with it.

The New Rules of Lifting for Women Lou Schuler,Cassandra Forsythe, PhD, RD,Alwyn Cosgrove,2008-12-26 In The New

Rules of Lifting for Women, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies prove that strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will bulk up if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the Barbie weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. The New Rules of Lifting for Women will change the way women see fitness, nutrition and their own bodies.

Finding Time For Fitness Is Never Easy, But Home Training Could Provide The Answer! From assembling a few pieces of basic training equipment, to setting up a complete gym in a room in your house, at-home workouts could be the key to your fitness. Home Fitness entails exactly what it implies: executing your personal fitness routine while at home using a variety of different techniques. Home fitness has been in our lives for decades – and it's taken on a new role since the Covid-19 pandemic closed gyms around the world. Whether it's a yoga class on Zoom or panic-buying a Peloton, many of us are trying to find ways to exercise effectively within four walls. Whether you are looking to improve your cardiovascular system, lose weight, gain lean muscle mass, or just stay active, in-home training has a place in your life. And the benefits of staying fit are no secret: Improvements in

cardiovascular and respiratory health, better regulation of blood sugar, the potential to reduce or eliminate prescription medications (such as for diabetes or blood pressure), weight loss, reduction in cancer risk, and improved musculoskeletal strength are some of the better-known. But when you're working out at home, you're responsible for the whole plan: What exercises should you do? How many reps of each? How often should you rest? Are you feeling a cardio workout? An upper-body workout? Or do you want to fit in a total body workout instead? For many of us, answering all these questions is an added stress we'd rather avoid right now. And the good news is that's something you can avoid—without skipping your workout. We are about to show you an immaculate at-home workout program that take the guesswork out for you and will give you the whole exercise plan.
