The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Why I Write George Orwell,2021-01-01 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

Totem Darin Bradley,2016-10-01 Once the capital of a global empire, Aer is now only a global protectorate. One of the eight wonders of the ancient world, Aer is a cradle of civilization, preserved by international aid and foreign interest, primarily Worldview, an international media network. Worldview has wired Aer so thoroughly that subscribers around the world can interact with every facet of daily life in the ancient city. Pinhole lenses and mobile cameras and embedded microphones export the challenges, dramas, and simple joys of Aeri life to those whose donations keep it alive. Because, without them, the Aeri will die. Aer has been quarried for millennia from the world's rarest stone deposit, and this prize, the Aeri birthright, is the centerpiece of Aer's ancient religion: the belief in God in the stone itself. In ages past, the inspired dialogs of the saints were the empire's greatest export, carrying the truth that God's presence morphs the faithful into their true form. But the stone, we now know, is radioactive. It always has been, and it has been twisting the Aeri across the generations, reforming their bodies into their final states. The international community now keeps the Aeri alive with radiation abatement, food aid, health care, and the sundries of daily life. Aer is a shared cultural gem, a mitigating presence in an unstable region. It is a link to a past when God walked the Earth, and empires rose on the power of belief. But there is trouble in paradise. Belan and Vesse are in their twenties, as bored and idle as the others their age, struggling to find meaning in a world where they want for nothing. With their lives writ large for Worldview's never-sleeping eyes, the couple find themselves at the epicenter of a cultural awakening, and their efforts to navigate the truths of the new Aer have consequences for everyone. Totem is the final installment in Darin Bradley's thematically linked Dystopian Cluster. This is voyeuristic terrorism in a world where religion has gone viral and Big Brother works hand in hand with UNESCO.

In Search of 'the Genuine Word of God' Rajmund Pietkiewicz,2020-12-14 The Polish-Lithuanian Commonwealth familiarized itself with Christian Hebraism in the first half of the 16th century. In Search of 'the Genuine Word of God' sketches out the process in three chapters. The first one deals with the development of modern Hebrew studies in Western Europe, the second gives an account of the academic and religious level of Hebrew scholarship in the Commonwealth in the 16th century and at the beginning of the 17th century, and the third is devoted to Polish translations of the Hebrew Bible, which were the most significant consequences of the reception of the West-European Christian Hebraism in the Polish-Lithuanian Commonwealth in Renaissance. Knowledge of Hebrew would be spread in the Polish-Lithuanian Commonwealth through personal contacts of magnates and church dignitaries with the Western European Hebrew experts, through Jewish converts teaching Semitic languages, through foreign studies at European universities and through books. Polish Christian Hebraism was not creative; local humanists and reformers who communicated with adherents of Judaism contributed but little to domestic Hebrew studies. Only scholarly trends occasioned by different Christian confessions come to our notice. Hebrew studies were undertaken within universities or religious movements. The purpose was practical: to have direct access to the original Hebrew Bible for the sake of theological disputes or to have proper translation tools for rendering the Scripture in Polish.

Subordination and Coordination Strategies in North Asian Languages Edward J. Vajda,2008-11-27 Across North Asia, complex sentence formation patterns display an unusually high prevalence of suffixed relational morphemes used to convey subordination. Suffixal subordinators occur in a variety of genetic groupings, most notably Samoyedic, Turkic, and Tungusic, but also in some of the region's language isolates, such as Ket and Ainu. No general study has surveyed complex sentences across Northern Eurasia and the Pacific Rim, an area noted both for its complicated web of language contact phenomena and its long-established genetic divisions. The 14 chapters in this volume survey synthetic and analytic methods of subordination and coordination. Much of the data reflect original fieldwork, and several chapters focus on critically endangered languages. Nearly every family or isolate in North Asia is taken into consideration, as are all major formal and functional types of complex sentence formation.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
