**Into Each Room We Enter without Knowing** Charif Shanahan, 2017-01-20 In this affecting poetry debut, Charif Shanahan explores what it means to be fully human in our wounded and divided world. In poised yet unrelenting lyric poems, Shanahan—queer and mixed-race—confronts the challenges of a complex cultural inheritance, informed by colonialism and his mother’s immigration to the United States from Morocco, navigating racial constructs, sexuality, family, and the globe in search of “who we are to each other . . . who we are to ourselves.” With poems that weave from Marrakesh to Zürich to London, through history to the present day, this book is, on its surface, an uncompromising exploration of identity in personal and collective terms. Yet the collection is, most deeply, about intimacy and love, the inevitability of human separation and the challenge of human connection. Urging us to reexamine our own place in the broader human tapestry, *Into Each Room We Enter without Knowing* announces the arrival of a powerful and necessary new voice.

*Diversity in Visualization* Ron Metoyer, Kelly Gaither, 2019-03-28 At the 2016 IEEE VIS Conference in Baltimore, Maryland, a panel of experts from the Scientific Visualization (SciVis) community gathered to discuss why the SciVis component of the conference had been shrinking significantly for over a decade. As the panelists concluded and opened the session to questions from the audience, Annie Preston, a Ph.D. student at the University of California, Davis, asked whether the panelists thought diversity or, more specifically, the lack of diversity was a factor. This comment ignited a lively discussion of diversity: not only its impact on Scientific Visualization, but also its role in the visualization community at large. The goal of this book is to expand and organize the conversation. In particular, this book seeks to frame the diversity and inclusion topic within the Visualization community, illuminate the issues, and serve as a starting point to address how to make this community more diverse and inclusive. This book acknowledges that diversity is a broad topic with many possible meanings. Expanded definitions of diversity that are relevant to the Visualization community and to computing at large are considered. The broader conversation of inclusion and diversity is framed within the broader sociological context in which it must be considered. Solutions to recruit and retain a diverse research community and strategies for supporting inclusion efforts are presented. Additionally, community members present short stories detailing their non-inclusive experiences in an effort to facilitate a community-wide conversation surrounding very difficult situations.

**Emergent Public Health Issues in the US-Mexico Border Region** Cecilia Ballesteros Rosales, Scott Carter Carvajal, Jill Eileen Guernsey De Zapien, 2017-02-16

US-Mexico border region area has unique social, demographic and policy forces at work that shape the health of its residents as well as serves as a microcosm of migration health challenges facing an increasingly mobile and globalized world. This region reflects the largest migratory flow between any two nations in the world. Data from the Pew Research Center shows over the last 25 years there has never been lower than 140,000 annual immigrants from Mexico to the United States (with peaks over 700,000). This migratory route is extremely hazardous due to natural (e.g., arid and hot desert regions) and human made barriers as well as border enforcement practices tied to socio-political and geopolitical pressures. Also, reflecting the national interdependency of public health and human services needs, during the most recent five year period surveyed the migratory flow between the US and Mexico has equaled that of the flow of Mexico to the US--both around 1.4 million persons. Of particular public health concern, within the US-Mexico region of both nations there is among the highest disparities in income, education, infrastructure and access to health care--factors within the World Health Organization's conceptualization of the Social Determinants of Health, and among the highest rates of chronic disease. For instance obesity and diabetes rates in this region are among the highest of those monitored in the world, with adult population estimates of the former over 40% and estimates in some population sub-groups for the latter over 20%. The publications reflected in this Research Topic, all reviewed from experts in the field, addressed many of the public health issues in the US Mexico Border Health

Commission's Healthy Border 2020 objectives. Those objectives-- broad public health goals used to guide a diverse range of government, research and community-based stakeholders--include Non Communicable Diseases (including adult and childhood obesity-related ones; cancer), Infectious Diseases (e.g., tuberculosis; HIV; emerging diseases--particularly mosquito borne illnesses), Maternal and Child Health, Mental Health Disorders, and Motor Vehicle Accidents. Other relevant public health issues affecting this region, for example environmental health, binational health services coordination (e.g., immunization), the impact of migration throughout the Americas and globally in this region, health issues related to the physical climate, access to quality health care, discrimination/mistreatment and well-being, acculturative/immigration stress, violence, substance use/abuse, oral health, respiratory disease, and well-being from a social determinants of health framework, are critical areas addressed in these publications or for future research. Each of these Research Topic publications presented applied solutions (e.g., new programs, technology or infrastructure) and/or public health policy recommendations relevant to each public health challenge addressed.

The Canary Islanders of Louisiana Gilbert C.

Din,1999-08-01 The Canary Islanders, or Isleños, of Louisiana, like some of the state's other ethnic groups, have received little scholarly attention. Although they are a people who have remained largely unknown both inside and outside of Louisiana, the Isleños constitute a sizable portion of the state's present Spanish-surname population. Utilizing a wide range of source materials, from Spanish colonial documents to oral interviews, Gilbert C. Din's The Canary Islanders of Louisiana provides the first book-length study of the Isleños and a definitive history of their presence in the

state. The few thousand Canary Islanders brought to Louisiana by Spanish governors in the eighteenth century came from a group of islands that, although ostensibly Spanish, had evolved its own distinctive culture and folkways. Settled in frontier areas considered strategic for the defense of the Louisiana colony, the Isleños suffered deprivation, neglect, and eventually abandonment. Living for the most part in remote back-country and delta communities, the Isleños remained isolated from their French and American neighbors. In the twentieth century, pressures to assimilate with the mainstream of Louisiana society have threatened their culture with extinction, though a few Canarians still retain much of their Isleño heritage. Gilbert C. Din's study of the Isleños covers the entire range of their association with Louisiana. He begins with a brief survey of Canarian history and folkways and concludes with a discussion of the likely ethnic future of the increasingly assimilated Isleño descendants. Din provides a detailed history of the Isleño migration and colonial settlement; post-colonial community development; economic, social, educational, and political patterns; and the course of Isleño assimilation with the general Louisiana population. Offering his own skillfully argued answers to long-standing debates about early Isleño settlements, Din also corrects a number of factual errors on the part of previous historians who did not have access to the same range of archival sources. *The Canary Islanders of Louisiana* is a strong piece of historical scholarship. It makes an original and much-needed contribution to the history of a people, of Louisiana, and of the American South.

**Autism Spectrum Disorders (ASD) - Searching for the Biological Basis for Behavioral Symptoms and New Therapeutic Targets**, 2017 Autism Spectrum Disorder (ASD) is currently diagnosed based on a series of

behavioral tests. The challenge for researchers is to try to uncover the biological basis for these typical behaviors in order to improve diagnosis and identify potential targets for treatment. A multidisciplinary approach is necessary in order to move forward. This includes analysis of the current animal models for ASD and their suitability, reviewing immunological, immunogenetic and epigenetic research, reassessing clinical diagnostic tools, and surveying radiological, pathological, and serological records for clues. This volume includes research from some of the leading researchers on ASD. We are hopeful that it will stimulate further dialogue and research in this challenging field.

**Speech-to-Speech Translation** Yutaka Kidawara, Eiichiro Sumita, Hisashi Kawai, 2019-11-22 This book provides the readers with retrospective and prospective views with detailed explanations of component technologies, speech recognition, language translation and speech synthesis. Speech-to-speech translation system (S2S) enables to break language barriers, i.e., communicate each other between any pair of person on the globe, which is one of extreme dreams of humankind. People, society, and economy connected by S2S will demonstrate explosive growth without exception. In 1986, Japan initiated basic research of S2S, then the idea spread world-wide and were explored deeply by researchers during three decades. Now, we see S2S application on smartphone/tablet around the world. Computational resources such as processors, memories, wireless communication accelerate this

computation-intensive systems and accumulation of digital data of speech and language encourage recent approaches based on machine learning. Through field experiments after long research in laboratories, S2S systems are being well-developed and now ready to be utilized in daily life. Unique chapter of this book is end-2-end evaluation by comparing system's performance and human competence. The effectiveness of the system would be understood by the score of this evaluation. The book will end with one of the next focus of S2S will be technology of simultaneous interpretation for lecture, broadcast news and so on.

**The Corona Lie - Unmasked** Hermann von

Bering,2021-04-08 This book is the first to examine the Corona phenomenon in its entirety and uncovers plenty of contradictions. A wealth of information is substantiated with hundreds of sources and raises doubts about the official account of the virus, the disease and the sense of the measures. The political background responsible for the economic decline is revealed. The book answers important questions such as: Can the PCR test detect infections at all? Why do the statistics show far too high case numbers? How dangerous is the virus really? What did the alledged corona dead die of? What are the problems of wearing masks? Why

lockdowns and spacing rules cannot stop the virus? Why are the new vaccinations hazardous? Who planned and profits from the global crisis? What is the objective? What is happening to the freedom of speech and democracy? Why the fundamental rights are being abolished? The book reveals the secret agenda behind the corona crisis. From thousands of documents, the author has researched the evidence that is hidden by the media. It presents the facts in a way that is easy to understand for everybody. Despite scientific explanations, the book reads easily because the author knows how to lighten up the complex topic with ironic comments.

Progress and Challenges of Nonfinancial Defined Contribution Pension Schemes Robert Holzmann, Edward Palmer, Robert Palacios, Stefano Sacchi, 2019-10-21 The individual account-based but unfunded approach to mandated public pension systems is a reform benchmark for all pension schemes, promising fair and financially sustainable benefits. Nonfinancial defined contribution (NDC) pension schemes originated in Italy and Sweden in the 1990s, were then adopted by Latvia, Norway, and Poland, envisaged but not implemented in various other countries, such as Egypt and Russia, and remain under discussion in many nations around the world, such as China and France. In its complete form, the approach also comprises budget-financed basic income provisions and mandated or voluntary funded provisions. Volume 1 of this book offers an assessment of countries that were early adopters before addressing key aspects of policy implementation and design review, including how best to combine basic income provisions with an NDC scheme, how to deal with heterogeneity in longevity, and how to adjust NDC scheme design and labor market policies to deliver on reform expectations. Volume 2 addresses a second set of

issues, including the gender pension gap and what family policies can do about it within the NDC framework, labor market issues and administrative challenges of NDC schemes and how countries are coping, the role of communication in these pension schemes, the complexity of cross-border pension taxation, and much more. Progress and Challenges of Nonfinancial Defined Contribution Pension Schemes is the third in a series of books analyzing the progress, challenges, and adjustment options of this reform revolution for mandated public pension systems. 'Pension reform is a major issue in many countries. The development of the nonfinancial defined contribution pension plan in the 90's was a major advance in pension design. By reporting actual country experiences and exploring properties of plan designs, this latest collection of essays is a valuable contribution, well worth reading.' Peter Diamond Professor at Massachusetts Institute of Technology; 2010 winner of the Nobel Memorial Prize in Economic Sciences 'A highly stimulating publication for policy makers and researchers alike. It pushes the analytical frontier for policy challenges that all public pension schemes are confronted with but that the nonfinancial defined contribution approach promises to handle best.' Noriyuki Takayama President, Research Institute for Policies on Pension and Aging, Tokyo, and professor emeritus, Hitotsubashi University, Tokyo 'In a changing world where pensions are more than ever linked to labor markets, communication tools, and flexibility considerations, this anthology provides a unique up-to-date analysis of nonfinancial defined contribution pension schemes. By mixing international experiences and theoretical studies, it demonstrates the high adaptability of such pension schemes to changing social challenges.'
