The Churchill Crocodile Tim Saunders, Richard Hone, 2024-05-30 The British Army started the development of flame throwers in 1938, but progress was slow and interest was side-lined after Dunkirk while the army reequipped. Investment in a flame-throwing tank only returned to the agenda thanks to interest by General Percy Hobart when he developed  funnies  for 79th armored Division and the

concept gained the support of General Sir Alan Brooke. 141 (The Buffs) Regiment RAC had been converted to Churchill Tanks at the end of 1941 and in early 1944 they were earmarked for another change of role to the Crocodile conversion of the new Mk VII Churchill tank. This flame throwing system was secret and started to arrive with the regiment in April 1944. By D-Day only one squadron was equipped and trained, with space on the landing craft only available for two troops to land in support of 50th Division. The rest of the regiment arrived by the end of June and were in action with various formations across the front. There followed a period of misuse by those they supported and learning on the job by the regiment's squadrons, but by the middle of the campaign a clear doctrine for the use of the Crocodile had emerged and they were in great demand.

Crocs! David T. Greenberg, 2009-09-26 Crocs are wild when riled, But, usually mild Milder than a mouse And they want to assure you They love you, adore you! Which is why they've moved into your house Crocs populate scary movies, fenced-in zoo enclosures, and nightmares. But what if a horde of crocs moved in with you? A boy in need of a vacation heads to a tropical island, expecting rest and relaxation until a horde of crocodiles descend upon him. In David Greenberg's disgustingly funny version, crocs drink Tabasco sauce, get tangled in dental floss, and turn the house in a swamp. In the dramatic climax, the biggest croc of all reveals himself, and in a surprising twist, crowns our hero the king of the crocs. Fans of Snakes!, Slugs, Bugs! and Skunks! will delight in this newest celebration of a creepy creature.

Broken Arrow Jim Winchester,2019-06-19 This “unnerving exposé” of a lost American nuclear bomb “is a valuable contribution to the history of the navy, the cold war, and nuclear weapons” (Booklist). On December 5th, 1965, the USS Ticonderoga was on its way from Vietnam to Japan, practicing nuclear combat procedures along the way. A young pilot from Ohio strapped into an A-4 Skyhawk bomber for a routine simulated mission. But after mishandling the maneuver, the plane and its pilot sunk to the bottom

of the South China sea, along with a live B43 one-megaton thermonuclear bomb. A cover-up mission began as rumors of sabotage began to circulate. The incident, known as a 'Broken Arrow', was kept under wraps for twenty-five years. The details that emerged caused a diplomatic incident, revealing that the U.S. had violated agreements not to bring nuclear weapons into Japan. Broken Arrow tells the story of Ticonderoga's sailors and airmen, the dangers of combat missions and shipboard life, and the accident that threatened to wipe her off the map and blow US-Japanese relations apart. For the first time, through previously classified documents, never before published photos of the accident aircraft and the recollections of those who were there, the story of carrier aviation's only 'Broken Arrow' is told in full.

Margaret Read MacDonald, 2015-02-01 In this retelling of a Shona folktale from Zimbabwe, a girl promises a crocodile he can come to a party in exchange for a favor, but since crocodiles aren't allowed in the village, she doesn't expect she'll have to keep the promise. When you promise Croc a party, you better keep that promise and give him a party! Zuva knows you should never invite a crocodile to town—everyone knows that!
