Sara Laviosa, Meng Ji

Problem solving activities in post-editing and translation from scratch Jean Nitzke, Companies and organisations are increasingly using machine translation to improve efficiency and cost-effectiveness, and then edit the machine translated output to create a fluent text that adheres to given text conventions. This procedure is known as post-editing. Translation and post-editing can often be categorised as problem-solving activities. When the translation of a source text unit is not immediately obvious to the translator, or in other words, if there is a hurdle between the source item and the target item, the translation process can be considered problematic. Conversely, if there is no hurdle between the source and target texts, the translation process can be considered a task-solving activity and not a problem-solving activity. This study investigates whether machine translated output influences problem-solving effort in internet research, syntax, and other problem indicators and whether the effort can be linked to expertise. A total of 24 translators (twelve professionals and twelve semi-professionals) produced translations from scratch from English into German, and (monolingually) post-edited machine translation output for this study. The study is part of the CRITT TPR-DB database. The translation and (monolingual) post-editing sessions were recorded with an eye-tracker and a keylogging program. The participants were all given the same six texts (two texts per task). Different approaches were used to identify problematic translation units. First, internet research behaviour was considered as research is a distinct indicator of problematic translation units. Then, the focus was placed on syntactical structures in the MT output that do not adhere to the rules of the target language, as I assumed that they would cause problems in the (monolingual) post-editing tasks that would not occur in the translation from scratch task. Finally, problem indicators were identified via different parameters like Munit, which indicates how often the participants created and modified one translation unit, or the inefficiency (InEff) value of translation units, i.e. the number of produced and deleted tokens divided by the final length of the translation. Finally, the study highlights how these parameters can be used to identify problems in the translation process data using mere keylogging data.

Advances in Empirical Translation Studies Meng Ji, Michael Oakes, 2019-06-13 Introduces the integration of theoretical and applied translation studies for socially-oriented and data-driven empirical translation research.

**Advanced Googling** Garrett Wasny, MA, CMC, CITP/FIBP, 2014-06-08 This is the workbook for Garrett Wasny's Advanced Googling professional development seminar. *The Best American Travel Writing 2012* Jason Wilson, 2012 Presents an anthology of the best travel writing published in the previous year, selected from magazines, newspapers, and web sites.

*Where Humans Meet Machines* Amy Neustein, Judith A. Markowitz, 2013-06-22 Editors Amy Neustein and Judith A. Markowitz have recruited a talented group of contributors to introduce the next generation of natural language technologies to resolve some of the most vexing natural-language

problems that compromise the performance of speech systems today. This fourteen-chapter anthology consists of contributions from industry scientists and from academicians working at major universities in North America and Europe. They include researchers who have played a central role in DARPA-funded programs and developers who craft real-world solutions for corporations. This anthology is aimed at speech engineers, system developers, computer scientists, AI researchers, and others interested in utilizing natural-language technology in both spoken and text-based applications.

**The ESL / ELL Teacher's Survival Guide** Larry Ferlazzo, Katie Hull Sypniewski, 2012-08-07 A much-needed resource for teaching English to all learners The number of English language learners in U.S. schools is projected to grow to twenty-five percent by 2025. Most teachers have English learners in their classrooms, from kindergarten through college. The ESL/ELL Teacher's Survival Guide offers educators practical strategies for setting up an ESL-friendly classroom, motivating and interacting with students, communicating with parents of English learners, and navigating the challenges inherent in teaching ESL students. Provides research-based instructional techniques which have proven effective with English learners at all proficiency levels Offers thematic units complete with reproducible forms and worksheets, sample lesson plans, and sample student assignments The book's ESL lessons connect to core standards and technology applications This hands-on resource will give all teachers at all levels the information they need to be effective ESL instructors.

**Translation Technology in Accessible Health Communication** Meng Ji, Pierrette Bouillon, Mark Seligman, 2023-09-21 This is the first book on accessible assistive translation system design for health communications for vulnerable populations across various cultural backgrounds. It will appeal to readers from natural language processing, computer science, linguistics, translation and interpreting studies, public health, media, and communication studies.

*Advances in Natural Language Processing* Adam Przepiórkowski, Maciej Ogrodniczuk, 2014-09-05 This book constitutes the refereed proceedings of the 9th International Conference on Advances in Natural Language Processing, PoITAL 2014, Warsaw, Poland, in September 2014. The 27 revised full papers and 20 revised short papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in topical sections on morphology, named entity recognition, term extraction; lexical semantics; sentence level syntax, semantics, and machine translation; discourse, coreference resolution, automatic summarization, and question answering; text classification, information extraction and information retrieval; and speech processing, language modelling, and spell- and grammar-checking.

*The Assessment of Emergent Bilinguals* Kate Mahoney, 2017-02-20 This textbook is a comprehensive introduction to the assessment of students in K-12 schools who use two or more languages in their daily life: English Language Learners (ELLs), or Emergent Bilinguals. The book includes a thorough examination of the policy, history and assessment/measurement issues that educators should understand in order to best advocate for their students. The author presents a decision-making framework called PUMI (Purpose, Use, Method, Instrument) that practitioners can use to better inform assessment decisions for bilingual children. The book will be an invaluable resource in teacher preparation programs, but will also help policy-makers and educators make better decisions to support their students.

*Mobile Technology Consumption: Opportunities and Challenges* Ciaramitaro, Barbara L., 2011-10-31 Whether used for communication, entertainment, socio-economic growth, crowd-sourcing social and political events, monitoring vital signs in patients, helping to drive vehicles, or delivering education, mobile technology has been transformed from a mode to a medium. Mobile Technology Consumption: Opportunities and Challenges explores essential questions related to the cost, benefit, individual and social impact, and security risks associated with the rapid consumption of mobile technology. This book presents the current state of mobile technologies and their use in various domains including education, healthcare, government, entertainment, and emerging economic sectors.

The Oxford Handbook of Translation and Social Practices Sara Laviosa, Meng Ji, 2020-12-01 The discipline of translation studies has gained increasing importance at the beginning of the 21st century as a result of rapid globalization and the development of computer-based translation methods. Today, changing political, economic, health, and environmental realities across the world are generating previously unknown inter-language communication challenges that can only be understood through a socially-oriented and data-driven approach. The Oxford Handbook of Translation and Social Practices draws on a wide array of case studies from all over the world to demonstrate the value of different forms of translation - written, oral, audiovisual - as social practices that are essential to achieve sustainability, accessibility, inclusion, multiculturalism, and multilingualism. Edited by Meng Ji and Sara Laviosa, this timely collection illustrates the manifold interactions between translation studies and the social and natural sciences, enabling for the first time the exchange of research resources and methods between translation and other domains' experts. Twenty-nine chapters by international scholars and professional translators apply translation studies methods to a wide range of fields, including healthcare, environmental policy, geological and cultural heritage conservation, education, tourism, comparative politics, conflict mediation, international law, commercial law, immigration, and indigenous rights. The articles engage with numerous languages, from European and Latin American contexts to Asian and Australian languages, giving unprecedented weight to the translation of indigenous languages. The Handbook highlights how translation studies generate innovative solutions to long-standing and emerging social issues, thus reformulating the scope of this discipline as a socially-oriented, empirical, and ethical research field in the 21st century.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2018-03-20 The two-volume set LNCS 9623 + 9624 constitutes revised selected papers from the CICLing 2016 conference which took place in Konya, Turkey, in April 2016. The total of 89 papers presented in the two volumes was carefully reviewed and selected from 298 submissions. The book also contains 4 invited papers and a memorial paper on Adam Kilgarriff's Legacy to Computational Linguistics. The papers are organized in the following topical sections: Part I: In memoriam of Adam Kilgarriff; general formalisms; embeddings, language modeling, and sequence labeling; lexical resources and terminology extraction; morphology and part-of-speech tagging; syntax and chunking; named entity recognition; word sense disambiguation and anaphora resolution; semantics, discourse, and dialog. Part II: machine translation and multilingualism; sentiment analysis, opinion mining, subjectivity, and social media; text classification and categorization; information extraction; and applications.

**Insights From A Travel Mastermind** Doug Knell, 2018-01-12 Before, my only travels were to and from the toilet at home. With these insights, I now also use toilets in other continents -- Dominique LaSalle, Travel Blogesque Magnifique Written by a groovy expert who traveled continuously for years in over 60 countries and studied, lived, and worked on 4 continents without getting arrested! Smile broadly and preview this book to get a glimpse of this mastermind's mindset. Okay? Warning: Travel Books Like This One Will Forever Electrify Your Vacation Experiences! No matter how savvy you think you are, there are dozens upon dozens of vacation tips and secrets we are sure you don't know about. Reading through this funny travel book, authored by a mastermind who went traveling the world for years, on budgets ranging from a cheap travel backpacker to a five-star connoisseur, you'll become transfixed by the idea of traveling the world for yourself. The mastermind began his journeys before the internet existed, so his philosophy includes both online and offline insights. Stop acting like every other traveler and taking their trips. We'll wager their trips are generic cookie-cutter affairs travel companies sold them or itineraries mindlessly copied out of travel books. Soak in the adventurous feelings of difference and make your own trip. Life's too short to be living someone else's dreams. Learn the most effective travel hacking secrets no one but the mastermind will ever bother to tell you: \* Vacation tips to experience your destinations more like a local. This secret opens you up to adventures you couldn't previously fathom. The

mastermind stayed with a French family in their ski chalet in Chamonix, lounged in the penthouse of a Swiss flight executive in Berne, and camped in the swag of an Australian couple in the Outback mining town of Andamooka. Cost: \$0. \* Which travel series guides are worth your time and which are not. \* The words and phrases you really need to know for your trip. \* Vacation tips to keep devious locals from sticking their unwanted paws in your travel luggage and pockets. \* Tips to stay healthy on your vacation. You needn't quake in your boots concerning all the horrendous diseases you've heard about out there, not after the travel mastermind goes over everything with you. \* How to effectively compare the cost of living of the country you're visiting with your home country. The mastermind knows how to travel cheap but he also travels with style and value. \* Foreign currency vacation tips to keep money in your wallet. The mastermind saved 60% on a room in Nepal with one secret. With another, he saved an additional 5% on a Kenyan safari he'd already gotten the best possible deal on - without the safari operator losing a penny! Tracking hacking doesn't get better than this. \* Plentiful mobile phone and calling travel hacking cues that should save you a small fortune at your destination. \* The best cheap and free mobile phone travel apps for a variety of platforms. Android, iPhone/iPad, Windows Phone, or BlackBerry - the mastermind has got you covered. \* How to get travel companies or web sites to execute travel planning at no cost to yourself. \* The secret places to book your airfares to score the absolute best bargains on cheap flights. Scrutinize the plane and the destination and layover airports before you book. Investigate the crosswinds, density altitudes, and aviation temperatures before you fly so, even on cheap flights, you won't wind up like Buddy Holly. \* Where to hide your travel cash. Hint: it's not your hotel room safe. \* How to bargain and barter with nefarious merchants. Use the mastermind's secrets to shut them out or get them to succumb to your price. \* And much more.

*The Democratization of Artificial Intelligence* Andreas Sudmann, 2019-10-31 After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogeneous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms?

Machine Translation Thierry Poibeau, 2017-09-29 A concise, nontechnical overview of the development of machine translation, including the different approaches, evaluation issues, and major players in the industry. The dream of a universal translation device goes back many decades, long before Douglas Adams's fictional Babel fish provided this service in *The Hitchhiker's Guide to the Galaxy*. Since the advent of computers, research has focused on the design of digital machine translation tools—computer programs capable of automatically translating a text from a source language to a target language. This has become one of the most fundamental tasks of artificial intelligence. This volume in the MIT Press Essential Knowledge series offers a concise, nontechnical overview of the development of machine translation, including the different approaches, evaluation issues, and market potential. The main approaches are presented from a largely historical perspective and in an intuitive manner, allowing the reader to understand the main principles without knowing the mathematical details. The book begins by discussing problems that must be solved during the development of a machine translation system and offering a brief overview of the evolution of the field. It then takes up the history of machine translation in more detail, describing its pre-digital beginnings, rule-based approaches, the 1966 ALPAC (Automatic Language Processing Advisory Committee) report and its consequences, the advent of parallel corpora, the example-based paradigm, the statistical paradigm, the segment-based approach, the introduction of more linguistic knowledge into the systems, and the latest approaches based on deep learning. Finally, it considers evaluation challenges and the

commercial status of the field, including activities by such major players as Google and Systran.

*Translation 101: Starting Out As A Translator* Petro Dudi, 2015-08-05 This book is for anyone contemplating on becoming a translator, or for existing translators that need a crash course on their profession. It explores the realm of translation, the benefits and working conditions, the types of translation work and tools available. It gets down to details regarding the tools a translator, providing information not only from the translator's perspective but also from a client's viewpoint. It provides a hands-on approach to CAT Tools, on how you can take advantage of them regardless of your CAT Tool of choice. You'll also learn how to successfully run your freelance translation business. You'll be presented with inside information on how clients (like translation agencies) choose their translators. You'll learn how to set up profitable rates and how to find promising clients. You'll be given ideas for organization of your work process and tips for successful customer relationship management. And, you'll be shown how to stay away from fraudulent companies too.

*Innovations in Intelligent Machines -2* Toyohide Watanabe, Lakhmi C Jain, 2011-10-26 This research volume is a continuation of our previous volume on intelligent machines. We have laid the foundation of intelligent machines in Springer SCI Series Volume 70 by including the possible and successful applications of computational intelligence paradigms in machines for mimicking the human behaviour. The present volume includes the recent advances in intelligent paradigms and innovative applications such as document processing, language translation, English academic writing, crawling system for web pages, web-page retrieval technique, aggregate k-Nearest Neighbour for answering queries, context-aware guide, recommendation system for museum, meta-learning environment, case-based reasoning approach for adaptive modelling in exploratory learning, discussion support system for understanding research papers, system for recommending e-Learning courses, community site for supporting multiple motor-skill development, community size estimation of internet forum, lightweight reprogramming for wireless sensor networks, adaptive traffic signal controller and virtual disaster simulation system. This book is directed to engineers, scientists, researchers, professor and the undergraduate/postgraduate students who wish to explore the applications of intelligent paradigms further.

*Translation and Bilingual Dictionaries* Chan Sin-wai, 2013-02-06 Is the bilingual dictionary really the translator's best friend? Or is it the case that all translators hate all dictionaries? The truth probably lies half-way. It is difficult to verify anyway, as the literature on the subject(s) is limited, not helped by the fact that Lexicography and Translation have stood apart for decades despite their commonality of purpose. Here is a volume, based on the proceedings of a successful conference at Hong Kong, that may at last provide some answers.

Found in Translation Nataly Kelly, Jost Zetzsche, 2012-10-02 Translation. It's everywhere we look, but seldom seen—until now.
