Utilitarianism J. J. C. Smart,Bernard Williams,1973-01-01 Two essays on utilitarianism, written from opposite points of view, by J. J. C. Smart

and Bernard Williams. In the first part of the book Professor Smart advocates a modern and sophisticated version of classical utilitarianism; he tries to formulate a consistent and persuasive elaboration of the doctrine that the rightness and wrongness of actions is determined solely by their consequences, and in particular their consequences for the sum total of human happiness. In Part II Bernard Williams offers a sustained and vigorous critique of utilitarian assumptions, arguments and ideals. He finds inadequate the theory of action implied by utilitarianism, and he argues that utilitarianism fails to engage at a serious level with the real problems of moral and political philosophy, and fails to make sense of notions such as integrity, or even human happiness itself. This book should be of interest to welfare economists, political scientists and decision-theorists.

Urban Mobility and the Smartphone Anne Aguilera, Virginie Boutueil, 2018-11-02 Urban Mobility and the Smartphone: Transportation, Travel Behavior and Public Policy provides a global synthesis of the transformation of urban mobility by the smartphone, clarifying the definitions of new concepts and objects in mobility studies, accounting for the changes in transportation and travel behavior triggered by the spread of the smartphone, and discussing the implications of these changes for policy-making and research. Urban mobility is approached here as a system of actors: the perspectives of individual behavior (including lifestyles), the supply of mobility services (including actors, business models), and public policy-making are considered. The book is based on an extensive review of the academic literature as well as systematic observation of the development of smartphone-based mobility services around the world. In addition, case studies provide practical illustrations of the ongoing transformation of mobility services influenced by the dissemination of smartphones. The book not only consolidates existing research, but also picks up on weak signals that help researchers and practitioners anticipate future changes in urban mobility systems. Key Features • Synthesizes existing research into one reference, providing researchers and policy-makers with a clear and complete understanding of the changes triggered by the spread of the smartphone. • Analyzes numerous case studies throughout developed and developing countries providing practical illustrations of the influence of the smartphone on travel behavior, transportation systems, and policy-making. • Provides insights for researchers and practitioners looking to engage with the smart cities and smart mobility discourse. Joliet David A. Belden, 2008 In 1673, Louis Jolliet and Fr. Jacques Marquette were the first Europeans to explore the Mississippi and the Illinois River valleys. Their explorations took them through what is now Joliet. Founded in 1834 as Juliet, the settlement's future was shaped by several important developments. The Des Plaines River provided an early waterway, and its power gave rise to mills and manufacturing. Native limestone rock beds helped build a 19th-century city, while Joliet quarries employed thousands of men. From the opening of the Illinois and Michigan Canal in 1848, to the building of the Illinois Central and Rock Island Railroads in the 1850s, to the intersecting of the Lincoln Highway and Route 66 in the 20th century, Joliet became an important hub between rural towns in Will and Grundy Counties and Chicago. Over 200 vintage postcards of Joliet reveal a unique city with a sense of community pride.

Philosophy and Scientific Realism J J C Smart, 2014-04-04 Originally published in 1963. In an introductory chapter the author argues that philosophy ought to be more than the art of clarifying thought and that it should concern itself with outlining a scientifically plausible world view. Early chapters deal with phenomenalism and the reality of theoretical entities, and with the relation between the physical and biological sciences. Free will, issues of time and space and man's place in nature are covered in later chapters.
