Job Matching, Wage Dispersion, and Unemployment Dale T.

Mortensen, Christopher A. Pissarides, 2011-04-28 A selection of key papers from the winners of the Nobel Memorial Prize 2010. It features their most important work on unemployment, labour market dynamics, and the equilibrium search model.

The Relative Effects of Skill Formation and Job Matching on Wage Growth in Ethiopia Taye Mengistae, 1999 Abstract: April 1999 - Estimated age and job seniority profiles of wages and marginal productivity in Ethiopia suggest that both skill formation and job matching significantly affect growth of wages and productivity over time. However, job matching is by far the more important of the two sources of growth in wages and productivity. Mengistae analyzes production and labor market data for a random selection of small to medium-size firms in Ethiopia to answer two questions: Does a worker's marginal productivity increase with time in the labor market or with job seniority, as must be the case if on-the-job skill formation or job matching has anything to do with the dynamics of wages observed in the data? Assuming that marginal productivity grows with experience or seniority, is skill formation more or less important than job matching as a source of growth in productivity? The main feature of Mengistae's analysis is the joint regression of the log of the average product of hours in a firm and the log of average hourly earnings of a firm's employees on the shares of experience-seniority cells of workers in total annual hours in the firm. Marginal productivity falls as experience in the labor market passes the 15-year mark, but the expected marginal product of a mobile worker with 16 or more years of experience is still nearly 80 percent higher than that of the base group. The between-jobs growth of hourly wages with potential experience is also large, but not as large as growth in marginal productivity for workers with less than 15 years of experience. Mengistae concludes that job matching is far more important than skill formation as a source of growth in productivity. Net mobility gains account for at least twice the share of the return to skill formation in the observed between-jobs growth of wages with market experience. The rate of return to skills formation is higher in the United States than in Ethiopia. The relative return to skills formation is probably lower in Ethiopia partly because the flow of information about the labor market is more restricted there. This paper-a product of the Development Research Group-is part of a larger effort in the group to identify firm-level sources of growth in productivity. The Oxford Handbook of Job Loss and Job Search Ute-Christine Klehe

PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature, experienced worker, job seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute-Christine Klehe and Edwin A.J. van Hooft, *The Oxford Handbook of Job Loss and Job Search* provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search. Multidisciplinary in nature, Klehe, van

Hooft, and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in-depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job-to-job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search.

Job Matching for Youth in Asia and the Pacific Asian Development Bank, 2023-11-01 This report analyzes ways to match youth in Asia and the Pacific with quality jobs and shows why approaches that consider non-linear transitions into and within the labor market can help underpin productivity and social progress. Noting some four out of five young people in the region work informally, it reviews job matching models including commercial and government online platforms, digital bootcamps, and corporate-funded programs. It explains how governments can play an instrumental role, assesses how the private sector reaches untapped markets, and why blended job matching strategies can improve transitions and drive inclusive youth employment.

A Supported Employment Workbook Steve Leach, 2002-01-01 This workbook presents strategies based on real situations and includes example exercises throughout. It is based on the principle of developing a client-centred approach to job development and emphasizes the central importance of self-determination - ensuring that the individual makes their own choices to determine their future career.

Courting Your Career Shawn Graham, 2007 Courting Your Career uses dating as a metaphor to demystify the process of finding a great job. It's a humorous, informative, and helpful book for job seekers, inspired by the author's work with more than a thousand undergraduate and graduate students at the University of North Carolina at Chapel Hill and Westminster College. He learned that many college students lack critical job search skills and generally do not know how to effectively use traditional career-search resources, from databases to networking. He also found they didn't relate to the majority of career titles already on the market. But when he used dating as a metaphor for the job search, students better understood the process and eventually met with much more success in their searches.

The Job Search Advisor Christopher G. Gilliam, 2001-08 Job seekers call it a job search. On the other side of the desk, employers call it a recruitment

Gilliam, SPHR, shares how to do this successfully so as to significantly increase your chances of being the applicant of choice. It's Not about You, It's about Them C. Bruce Flanagan, 2010 There is no real silver bullet to find a job. If there were, all you would need would be an order blank, and not a handbook. The job search is about you, but the application of the job search is about them. Throughout this book, you will see the phrase It is not about you, it is about them. You are a worthy person and should be doing a job that is your passion. However, that is not why companies and organizations hire people. People are hired because they have the skills that companies can use to either make a profit or complete their mission. Whether profit, nonprofit, or government position, the skill the company needs and that you offer must match to be assured consideration for the job. A job search is the hardest work for the poorest pay of any job you will ever do. If you are not spending as many hours in your job search as you spent doing your previous job, you will probably not find a job you will enjoy on the same level that you were accustomed to. C. Bruce Flanagan is the lead consultant for LEJ Unlimited. After a career as a nation-leading salesman of custom media, he launched a consulting career for job seekers. He has 11 years of job search experience. He was president of Business and Profession Exchange (BPE), Central Indiana's leading networking group. With Bruce's leadership, BPE received publicity on multiple television stations, including a personal appearance by Bruce on Gerry Dick's television program, Inside INdiana Business. BPE was also the subject of a lead story in The Indianapolis Business Journal.

Student Mobility Since the Expansion of Higher Education in China Liping Ma, 2023-09-01 Using a nationally representative data set, this book examines the characteristics of Chinese college students' mobility since the expansion of higher education. It analyses college graduates' mobility in both horizontal and vertical dimensions. The horizontal dimension shows college students' migration directions and location changes, including migration for college, migration for employment, migration for grassroots positions,

migration away from the capital and migration back to their hometown. The vertical dimension includes students' intergenerational occupational mobility and intergenerational regional mobility. Drawing on theories in education and economics, the book provides a solid framework for empirically analysing the characteristics, causes and economic and non-economic benefits of different forms of mobility. This book not only offers insights into China's higher education policies and their impact on the regional and intergenerational mobility decisions of college graduates over the past two decades but also has important implications for other countries at similar stages of social and economic development. This book is an excellent read for students and scholars of education, economics and East Asian studies. It can also help policymakers understand the characteristics of students' mobility and the underlying reasons for their choices, so that they can propose effective policies in the future.

The Oxford Handbook of Personnel Assessment and Selection Neal Schmitt, 2013-12-15 Employee selection has long stood at the practical forefront of industrial/organizational psychology. Today's social, business, and economic climates require ongoing adaptations by those who select organizations' personnel, and research on the topic helps gauge the impact of these adaptations and their implications for human performance and potential. The Oxford Handbook of Personnel Assessment and Selection codifies the wealth of new research surrounding employee selection (web-based assessments, social networking, globalization of organizations), situating them alongside more traditional practices to establish the best and most relevant research for both professionals and academics. Comprising chapters from authors in both the private sector and academia, this volume is organized into seven parts: (1) historical and social context of the field of assessment and selection; (2) research strategies; (3) individual difference constructs that underlie effective performance; (4) measures of predictor constructs; (5) employee performance and outcome assessment; (6) societal and organizational constraints on selection practice; and (7) implementation and sustainability of selection systems. While providing a comprehensive review of current research and practice, the purpose of this handbook is to provide an up-to-date profile of each of the areas addressed and highlight current questions that deserve additional attention from researchers and practitioners. This compendium is essential reading for industrial/organizational psychologists and human resource managers.
