I have been where you are today I worked in unsatisfying jobs for employers that didn't care and wouldn't reward good and competent service. I remained in positions for years, sending out thousands of resumes, hoping

that someone would recognize my value. What pulled me through was lots of study, specialized training, and practice. More importantly, I believed in myself and the value I could provide to employers and customers for my products and services. At first, I was happy to find a new client now and then to make some extra money. Later I discovered how to promote myself effectively and those customers started coming to me. Instead of wasting time, day after day, fruitlessly searching, they sent me emails asking, demanding - my services, products and employment. Because of this I didn't get any value from LinkedIn. That all changed after I spent the time to go through each section, adding, editing and removing until I had a great profile! Within a week I received an email, out of the blue, for a ghostwriting project. Richard - I'm looking for a ghost writer with some business and/or IT background. Your profile stood out to me. He was pre-sold on my services, and we quickly signed a contract, and not a small one, to write his new book! Over the following year, by putting the concepts in this book to work, I received dozens of similar queries, and over 50% of them resulted in signed contracts for paying jobs. Get Your Resume in the Right Hands) (Kindle Edition) Custom Databanks has been selling headhunting (and many other) databases and lists since the 1980s. They are one of the most reputable data warehouses around. Some of the web reviews that trash these directories as just sales brochures for their lists are not correct. They even state that CD removes contact info. These are both untrue! Don't believe me, just use the wonderful Amazon/publisher look inside feature- full profiles and contact data is given. Now there ARE many more lists on their DBMS, including city by city cuts, etc. and you likely will want to actually buy some of these lists in your niche with the discount code you get with this purchase. But that's certainly not necessary to get a lot of value from these pubs. This particular one focuses on jobs at 50K or better, but come on, that's base entry level for programmers with even basic skills! Big Data starting salaries are now North of 120K at a lot of firms. If you're looking to change jobs or hire, obviously networking comes first, but this is a close second. I have nothing to do with this company, but have used them successfully to recruit in some VERY narrow niches like robotics and digital art programming. Their reps are really customer responsive, and mine even helped find an extremely specialized group of candidate recruiters in tutorial software. Highly recommended for candidates, IT managers and of course headhunters specializing in engineering and IT.
