Ask a Manager Alison Green, 2018-05-01 From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Maybe a career they've always dreamed of or just something more fulfilling. *Repurpose Your Career: A Practical Guide for Baby Boomers* shows that change is possible. It requires a strategy and a series of practical steps including: Study yourself to understand your core needs in a way you probably never did with your first career. Like what kinds of rewards do you prefer? What kind of boss do you work best with? How much physical activity do you need? How do you like to make decisions? What are your needs not only for money but for time and freedom? Strategically network with people in the field you're interested in to find out what the job is really like. Develop a statement about what kind of job you're looking that covers all your core needs. Build a tribe of people who can help you make your transition, including introducing you to others connected in the field. Work on your skill set including using LinkedIn and other social media effectively. Negotiate for what you want, beginning with items that have more to do with your quality of life than money. *Repurpose Your Career* not only gives practical, step-by-step advice for how to make a successful transition, but deals with the challenging issues of having to ask for help from others and having to become the novice again after years of working to become an expert. If you're looking to find a career that meets your needs and you can grow into for the next 20 years, this book is the roadmap you're looking for.

Big Career in the Big City Vicki Salemi, 2010 According to a poll by Time Out New York, 80 percent of young people say they want to live in New York City. The vast majority of these people, however, don't know how to make this goal a reality. Those who do are often surprised at how difficult living and working can be in the city that never sleeps. *Big Career in the Big City* spotlights what to expect from life in New York, written in a hip, conversational tone that young people will appreciate and relate to. After completing worksheets to assess whether they're cut out for life in the Big Apple, readers will learn how to score great jobs, meet new people, and develop their career brand. Plus, readers are given advice straight from New York recruiters about how to overcome the distance barrier and stand out from native applicants. This one-of-a-kind guide also deals with the logistics of moving to a new city; reveals how to cope with unfamiliar and sometimes stressful living arrangements; and offers suggestions on how to stick to a budget and stretch the almighty dollar.

The Job-Hunter's Survival Guide Richard N. Bolles, 2012-04-04 One hundred pages of lifesaving advice for people out of work. When over ten million people have needed help with their job-hunt—or with figuring out what to do with their life—there is one person they have turned to, more than any other. He is Richard N. Bolles, author of the #1 job-hunting book of all time, *What Color Is Your Parachute?* His name is well-known around the world. Just during the last twelve months, he has appeared in *Time* (“10 Ideas Changing the World Right Now,” March 2009), *U.S. News & World Report* (deemed “savior of the nation’s unemployed,” October 2008), *NBC’s Today Show* (broadcast in April 2009), and many other publications and shows. His book was the #1 best-seller on *BusinessWeek’s* paperback list as recently as last November. Never has his advice been more sought than during these brutal economic times. He has responded by writing a completely new book: *The Job-Hunter’s Survival Guide*, designed particularly for people who are hanging on the ropes, who haven’t time to do a lot of reading but need help desperately—and now. Early reviews have called this little Guide “brilliant” and “tremendously helpful.”

Will College Pay Off? Peter Cappelli, 2015-06-09 The decision of whether to go to college, or where, is hampered by poor information and inadequate understanding of the financial risk involved. Adding to the confusion, the same degree can cost dramatically different amounts for different people. A barrage of advertising offers new degrees designed to lead to specific jobs, but we see no information on whether graduates ever get those jobs. Mix in a frenzied applications process, and pressure from politicians for relevant programs, and there is an urgent need to separate myth from reality. Peter Cappelli, an acclaimed expert in employment trends, the workforce, and education, provides hard evidence that counters conventional wisdom and helps us make cost-effective choices. Among the issues Cappelli analyzes are: What is the real link between a college degree and a job that enables you to pay off the cost of college, especially in a market that is in constant change? Why it may be a mistake to pursue degrees that will land you the hottest jobs because what is hot today is unlikely to be so by the time you graduate. Why the most expensive colleges may actually be the cheapest because of their ability to graduate students on time. How parents and students can find out what different colleges actually deliver to students and whether it is something that employers really want. College is the biggest expense for many families, larger even than the cost of the family home, and one that can bankrupt students and their parents if it works out poorly. Peter Cappelli offers vital insight for parents and students to make decisions that both make sense financially and provide the foundation that will help students make their way in the world.

The Fourth Industrial Revolution Klaus Schwab, 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is

already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.
