How to Become a Product Demonstrator Don Levy, 2015-12-09 If you looking for a fun job that normally pays above minimum wage then this book will help you find it. Being an active product demonstrator with many years of experience has allowed me to write a guide that will teach you all about the different types of available jobs, places to find them and requirements for each. The best part of the book is the 1,000+ worldwide places to find a job. As I look back on the 80 years of my life I'm in wonder of all the different things that I have done. Many of which have helped me write this guide for becoming a Product Demonstrator. Back in my late 20's up to my 50's I was in the fair and carnival business in different capacities which included demonstrating a variety of products on the different fairgrounds and carnival lots that I was at. Fairs and carnivals operate for a certain length of time each year and then there is the off season. During this time I would do demonstrations at home shows, auto and boat shows, swap meets, music festivals or any place that a number of people would gather. I finally tired of being on the road all the time so I went into real estate and mortgage banking. When I retired from that I finally got bored and decided to find something to do. The main requirement was that along with making money it had to be fun. After a lot of research it sounded like mystery shopping would fit the bill. It was fun but the paperwork and low pay weren't that exciting so I started looking again and began seeing requests for product demonstrators. I wasn't excited about going on the road again but when I found out I didn't have to travel and could work when I wanted I decided to give it a try. Although the pay was a few dollars about minimum to start the job was fun. This was a little more than 5 years ago. After a couple of years I found that it was too hard to stand for the 6 hours in a demonstration. I looked around again and found that I could transition to an alcohol demonstrator job. It was less hours and more money so that's what I'm doing today. keywords: Product demonstrator, event specialist, demonstration, demonstrator, demonstrating, employment, pitchman

**The Reluctant Job Changer** Gladys L. Palmer, Herbert S. Parnes, Richard C. Wilcock, Mary W. Herman, Carol P. Brainerd, 2016-11-11 What keeps people in jobs or occupations is the central theme of four studies that interpret workers' attitudes toward job-changing in the light of their work experience as well as their expectations for the future. Gladys Palmer, in collaboration with Herbert S. Parnes of Ohio State University and Richard C. Wilcock of the University of Illinois, has experimented in the key study with analyses designed to measure the strength of a person's attachment to his or her occupation or employer. Attitude questions are given a time dimension by checking them against the job histories of individual workers and by including evaluations of crucial job decisions in the past. The effect of private pension plans upon the inclination to change jobs is examined by Parnes, with surprising results. A third study, by Carol P. Brainerd, considers the impact of the search for economic security on a highly skilled group by tracing changes over thirty years in the way toolmakers move between jobs and in the methods of training them. Mary W. Herman uses both American and European materials to analyze the connection between the ideas of social class, work attitude, aspirations for moving up the social scale, and the amount that actually occurs between different levels of skill. The volume emphasizes the work experience and attitudes of male production workers in the stable period of their working lives, when family responsibilities are usually heavy. At the same points, however, it also covers women workers and the full range of age groups in the adult population. In the concluding chapter, Palmer brings the findings together, examines their implications for understanding the complex factors that determine individual movements in the labor market, and assesses the various attitude measures developed as predictors of attachment or mobility. Materials, sources, and technical aspects of the analysis are discussed in four appendices. These studies have both practical appeal and research interest. Personnel workers, guidance counselors, employment specialists, and others involved in the everyday workings of the labor market will appreciate the insights into worker attitudes and behavior, while the analysis of institutional force and of motivations and trends in mobility will interest labor economists and sociologists, as well as technicians in the field of attitude research. Founded in 1921 as a separate Wharton department, the Industrial Research Unit has a long record of publication and research in the labor market, productivity, union relations, and business report fields. Major Industrial Research Unit studies as published as research projects are completed. This volume is Study no. 40.
