Common Sense Government Al Gore, Albert Gore, Jr, 1998-12

Give Them Lala Lala Kent, 2022-04-12 The Vanderpump Rules provocateur opens up about her rocky road to fame and sobriety in this collection of humorous and brutally honest essays--

From Neighborhoods to Nations Yannis Ioannides, 2013 Just as we learn from, influence, and are influenced by others, our social interactions drive economic growth in cities, regions, and nations--determining where households live, how children learn, and what cities and firms produce. *From Neighborhoods to Nations* synthesizes the recent economics of social interactions for anyone seeking to understand the contributions of this important area. Integrating theory and empirics, Yannis Ioannides explores theoretical and empirical tools that economists use to investigate social interactions, and he shows how a familiarity with these tools is essential for interpreting findings. The book makes

work in the economics of social interactions accessible to other social scientists, including sociologists, political scientists, and urban planning and policy researchers. Focusing on individual and household location decisions in the presence of interactions, Ioannides shows how research on cities and neighborhoods can explain communities' composition and spatial form, as well as changes in productivity, industrial specialization, urban expansion, and national growth. The author examines how researchers address the challenge of separating personal, social, and cultural forces from economic ones. Ioannides provides a toolkit for the next generation of inquiry, and he argues that quantifying the impact of social interactions in specific contexts is essential for grasping their scope and use in informing policy. Revealing how empirical work on social interactions enriches our understanding of cities as engines of innovation and economic growth, *From Neighborhoods to Nations* carries ramifications throughout the social sciences and beyond.

An American Requiem James Carroll, 1997-04-01
National Book Award winner: This story of a family torn apart by the Vietnam era is “a magnificent portrayal of two noble men who broke each other’s hearts” (Booklist). James Carroll grew up in a Catholic family that seemed blessed. His father, who had once dreamed of becoming a priest, instead began a career in J. Edgar Hoover’s FBI, rising through the ranks and eventually becoming one of the most powerful men in the Pentagon, the founder of the Defense Intelligence Agency. Young Jim lived a privileged life, dating the daughter of a vice president and meeting the pope—all in the shadow of nuclear war, waiting for the red telephone to ring in his parents’ house. James fulfilled the goal his father had abandoned, becoming a priest himself. His feelings toward his father leaned toward

worship as well—until the tumult of the 1960s came between them. Their disagreements, over Martin Luther King, Jr. and the civil rights movement; turmoil in the Church; and finally, Vietnam—where the elder Carroll chose targets for US bombs—began to outweigh the bond between them. While one of James’s brothers fled to Canada, another was in law enforcement ferreting out draft dodgers. James, meanwhile, served as a chaplain at Boston University, protesting the war in the streets but ducking news cameras to avoid discovery. Their relationship would never be the same again. Only after Carroll left the priesthood to become a writer, and a husband with children of his own, did he begin to understand fully the struggles his father had faced. In *An American Requiem*, the New York Times bestselling author of *Constantine’s Sword* and *Christ Actually* offers a benediction, in “a moving memoir of the effect of the Vietnam War on his family that is at once personal and the story of a generation . . . at once heartbreaking and heroic, this is autobiography at its best” (Publishers Weekly).

A Circle of Wives Alice LaPlante, 2014-03-04 From the New York Times–bestselling author of *Half Moon Bay*. “Marriage is as mysterious as murder in LaPlante’s captivating psychological thriller” (People). An Indie Next Pick A LibraryReads Selection An Amazon Best Book of the Month (Mysteries & Thrillers) A Daily Candy Best Book of March One of More magazine’s “Five Thrillers Not to Read After Dark” When Dr. John Taylor turns up dead in a hotel room, the local police uncover enough incriminating evidence to suspect foul play. Det. Samantha Adams, whose Palo Alto beat usually covers petty crimes, is innocently thrown into a high-profile case that is more complicated than any she has faced before. A renowned reconstructive surgeon and a respected family man, Dr.

Taylor was beloved and admired. But beneath his perfect façade was a hidden life—in fact, multiple lives. Dr. Taylor was married to three very different women in three separate cities. As the circumstances surrounding his death emerge, Detective Adams finds herself tracking down a murderer through a tangled web of marital deception and revenge. New York Times–bestselling author Alice LaPlante’s haunting and complex novel of family secrets dissects—with scalpel-like agility—the intricacies of desire and commitment, trust and jealousy. “Exhilarating and smart, *A Circle of Wives* is a wild ride of love, loss, marriage and murder, with a finale that’s provocative, thrilling and grand. It all shows that while some deaths are a mystery, so, too, are some loves.” —San Francisco Chronicle

Psychological Testing in the Age of Managed Behavioral Health Care Mark E. Maruish, E. Anne Nelson, 2001-08-01 Written by a recognized expert in assessment employed by a large managed behavioral healthcare organization (MBHO), this book seeks to provide psychologists who rely on testing as an integral part of their practice, a guide on how to survive and thrive in the era of managed behavioral healthcare. It also offers ideas on how to capitalize on the opportunities that managed care presents to psychologists. The goal is to demonstrate that despite the tightening of the reins on authorizations for reimbursable testing, psychological testing can continue to play an important role in psychological practice and behavioral healthcare service delivery. The book presents ideas for: *increasing the likelihood of getting tests authorized by MBHOs; *using inexpensive/public domain assessment instruments;

*ethically using psychological testing in MBHO settings;
*capitalizing on the movement to integrate primary care and behavioral healthcare through the use of psychological testing; and *designing and implementing outcomes assessment systems within MBHO settings. Intended for practicing psychologists and other behavioral health practitioners employed by MBHOs in direct service delivery, care management or supervisory positions, as well as for graduate clinical or counseling psychology students who will most likely work in MBHO settings.

Raising Our Children's Children Deborah Doucette,2014-07-05 Based on Deborah Doucette's personal experience raising a grandchild, this book examines the myriad factors involved in kinship care, specifically when grandparents begin to raise their grandchildren. Filled with true stories from people who have raised their children's children, and including advice from Dr. Jeffrey R. LaCure throughout, this family-focused book looks at this fairly common relationship from all sides. Now in its second edition, Raising Our Children's Children has been updated to include recent social developments, such as the trend toward multigenerational family living where children, their parents, and their grandparents all live under one roof.

Practical Chess Openings Reuben Fine,2013-01

Practical Chess Openings is a basic openings book covering all the major openings, in alphabetical order. At the beginning of each section is a general description of the opening and its history, including the names of famous players who played it. The opening lines are in Descriptive Notation and are arranged in columns from the most popular to the least popular. Nowadays chess grandmasters do not study opening books. Instead they work with computer databases with millions of games in them, and then run them through chess analysis programs like Fritz, Houdini and Rybka, searching for new ideas and for flaws in their rival grandmaster's analysis. Amateur chess players cannot compete against this. We must just play for the enjoyment of the game without any hope of ever making grandmaster status. Having a book with the latest most up to date lines is of no added value. A serviceable, shorter and highly readable book like Fine's Practical Chess Openings is just as good and perhaps even better than a new book crammed with all the latest stuff.

Greenhouses Joe J. Hanan, 2017-11-22 A greenhouse provides an essential means of livelihood to its owner and must be economically practical for the particular climate in which it stands. *Greenhouses: Advanced Technology for Protected Horticulture* addresses the major environmental factors of light, temperature, water, nutrition, and carbon dioxide, and features extensive discussions of greenhouse types, construction, and climate control. The book highlights technology such as hydroponics, computer control of environments, and advanced mathematical procedures for environmental optimization. *Greenhouses: Advanced Technology for Protected Horticulture* is the definitive text/reference for the science of greenhouse engineering and management. The author Dr. Joe J. Hanan, Professor Emeritus of Colorado State University, is the recipient of the Society of American Florists' (SAF) 2000 (Millennium) Alex Laurie Award for Research and Education. The Alex Laurie Award is presented annually to an individual who has made broad-scope, long-lasting contributions to the floriculture industry through research or education. The award is named for Alex Laurie, a professor at The Ohio State University, who pioneered work in many areas of floriculture. Joe is one of the most precise floricultural researchers I have known, said Dr. Gus De Hertogh, Chairman of SAF's Research Committee. That excellence is reflected in his latest book, *Greenhouses, Advanced Technology for Protected Horticulture*, which was published in 1998, nine years after his official 'retirement.'
