Elsevier's Dictionary of Trees M.M. Grandtner, 2005-04-08 This dictionary will present all currently accepted generic, specific, sub-specific and variety names of trees, excluding fossil and more recently extinct taxa, hybrids and cultivars. Only the indigenous trees of a continent, those wild species that were natural elements of the spontaneous forest vegetation before the arrival of Europeans or other colonizers, are included. Each generic entry includes the family to which it is assigned, the synonyms of the Latin name, and the English, French, Spanish, trade and other names. For the English and French names the standard name is listed first, followed by other available names with, in parentheses, the countries where they are used. Where appropriate, names in additional languages are also included. Each infrageneric (species, subspecies, variety) entry includes, in addition, the distribution, height, type of foliage, ecological characteristics and main uses of the tree when available. In this volume only taxa indigenous on the North American continent are included, considered in a geographical, not in a political sense. This means from Alaska and Greenland to Panama, including Caribbean, but excluding Hawaii.

Duke's Handbook of Medicinal Plants of Latin America James A.

Duke, 2008-10-24 Finalist for 2009 The Council on Botanical & Horticultural Libraries Literature Award! A Comprehensive Guide Addressing Safety, Efficacy, and Suitability About a quarter of all the medicines we use come from rainforest plants and more than 1,400 varieties of tropical plants are being investigated as potential cures for cancer. Curare comes from a tropical vine and quinine from the cinchona tree. A comprehensive guide to safety, efficacy, and suitability, Duke's Handbook of Medicinal Plants of Latin America responds to continuing interest in medicinal plants and the potential remedies they contain. Determine Which Species Can Be Used for Specific Targets The author of Green Pharmacy Herbal Handbook and CRC Handbook of Medicinal Herbs, James A. Duke covers roughly 500 of the more important Native Latin American medicinal plants in a highly organized format. After a brief introduction, each entry contains scientific and colloquial names, synonyms, reference to illustrations, notes, biological activities, medicinal indications, dosages, potential hazards, extracts, and references. This format supplies a starting point for determining which species can be used for specific targets. Better Data Helps You Focus Your Search Year-round moderate temperatures, abundant rainfall, and rich soils make tropical Latin America home to nearly 100,000 of the world's 300,000

known species of plants, and therefore home to untold numbers of potential cures. Focusing on 500 of the most well-known and well-studied plants, this book helps you focus your search for ammunition against constantly evolving pathogens and newly emerging diseases.

Isle of the Dead Alex Connor, 2014-04-15 Fifteenth-century Venice is a dangerous time to be alive. A permanent winter has rolled in over the canals and bodies keep washing up on the banks of the city. Each victim has been skinned. In the present day, a famous portrait by Titian has been discovered. Its subject: the Fifteenth-century suspected murderer Angelico Vespucci, known as The Skin Hunter. Leading New York dealer, Triumph Jones, encourages the rumor that when the portrait arises, so will the man. And when flayed bodies start turning up in Tokyo, London and Venice, it begins to look like more than just a superstition. Previously a location finder for the film industry, Nino Bergstrom has just recovered from a serious illness. As a favor to the friend who helped him, the dealer, Gasser Reni, he investigates the murder and flaying of Seraphina Morgan. In Venice he comes across Seraphina's louche husband and the flamboyant Johnny Ravenscourt, moving onto Tokyo where he encounters the Japanese dealer of the macabre, Jobo Kido. As the dealers vie to get their hands on the Titian portrait--some for its

beauty, others for its notoriety as being the first portrait of a serial killer--each becomes a suspect. And then Nino makes the connection between the Fifteenth century murderer and his Twenty-first-century imitator. Each of the contemporary century victims had something in common with their Fifteenth-century counterpart. Further investigations lead Nino deeper into the depraved world of Angelico Vespucci, the original Skin Hunter. Then, after the deaths and mutilation of three women--on the anniversaries of Vespucci's crimes -- Nino realizes that the date for the fourth killing is due. He has to find the last victim and save her. And he has only ten days to do it.

El Monte Lydia Cabrera, 2023-04-24 First published in Cuba in 1954 and appearing here in English for the first time, Lydia Cabrera's El Monte is a

foundational and iconic study of Afro-Cuban religious and cultural traditions. Drawing on conversations with elderly Afro-Cuban priests who were one or two generations away from the transatlantic slave trade, Cabrera combines ethnography, history, folklore, literature, and botany to provide a panoramic account of the multifaceted influence of Afro-Atlantic cultures in Cuba. Cabrera details the natural and spiritual landscape of the Cuban monte (forest, wilderness) and discusses hundreds of herbs and the constellations of deities, sacred rites, and knowledge that envelop them. The result is a complex spiritual and medicinal architecture of Afro-Cuban cultures. This new edition of what is often referred to as “the Santería bible” includes a new foreword, introduction, and translator notes. As a seminal work in the study of the African diaspora that has profoundly impacted numerous fields, Cabrera’s magnum opus is essential for scholars, activists, and religious devotees of Afro-Cuban traditions alike.
