**The Report: Abu Dhabi 2016** Oxford Business Group,2016-05-09 Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional

leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial services, health care, aviation and renewable energy.

The Role of IT in higher Education in Abu Dhabi Inam Ur Rahman, 2015-10-23 The IT education during the formative years has become a major priority for the UAE. This is underlined by the success of the Sheikh Mohammed bin Rashid IT Education Project (ITEP), which was launched in 2000. As well as installing computer labs in all participating schools, and creating a comprehensive cutting-edge curriculum, ITEP also provides an invaluable online educational resource at [www.itep.ae](http://www.itep.ae). ITEP now provides courses in 40 high schools in the UAE (20 in Dubai, 20 in Abu Dhabi) and over 13,000 students pass through the programme every year. ITEP's trainee pupils achieved 97 per cent success rate in courses in the 2005/06 academic year. [...]

*The Report: Abu Dhabi 2014* Oxford Business Group, 2014-03-25 Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

Decent Work, Green Jobs and the Sustainable Economy Peter Poschen,2017-09-08 The challenges of achieving environmental sustainability and of generating decent work for all are closely linked. In this timely book, Poschen argues that an integrated approach to tackle these challenges is a necessity: the goal of environmentally sustainable economies will not be attained without the active contribution of the world of work. Decent Work, Green Jobs and the Sustainable Economy demonstrates that green jobs can be a key economic driver, as the world steps into the largely uncharted territory of building a sustainable and low-carbon global economy. Poschen shows that positive outcomes are possible, but require a clear understanding of the opportunities and challenges. Enterprises, workers and governments are not passive bystanders in the great transformation that is urgently needed in our economies. They are essential agents of change, able to develop new ways of working in sustainable enterprises that safeguard the environment, create decent jobs and foster social inclusion. This book highlights the solutions that the world of work offers for policy and practice to tackle climate change, achieve environmental sustainability and to build prosperous and cohesive societies. It is essential reading for those in business, academia and government.

*Abu Dhabi's Vision 2030* Linda Low, 2012 This book aims to tell the Abu Dhabi story in economic development, from its past dominance in oil to its economic vision for the future. More than being an exemplar of industrial restructuring and diversification from a resource-based to a 21st century knowledge-based economy and society, Abu Dhabi emphasises its cultural legacy and tradition as an environmental advocate for green and sustainable pathways. It has as many challenges as creative responses to show that its success is not by wealth alone. This case study unveils Abu Dhabi in particular and the rest of Arabic and GCC economic development in general. They have all attracted foreign investment and global business, typically as hydrocarbon-rich resource economies. Beyond that, the geoeconomics and geopolitics of the Middle East and North Africa, with or without the Arab Spring in 2011 is in and of itself, a rich region for multidisciplinary studies and research, not just for economics and business. With Qatar, Abu Dhabi boasts of one of the highest per capita income in the world; therein lies a reason to enquire about its success and pivotal role in the GCC and global contexts.

The Report: Abu Dhabi 2009 ,2009

The Report: Abu Dhabi 2015 Oxford Business Group, 2016-05-09 Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources,

growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

**Education and Skills for Inclusive Growth, Green Jobs and the Greening of Economies in Asia** Rupert Maclean, Shanti Jagannathan, Brajesh Panth, 2017-11-19 This book presents an overview of the main research findings and case studies concerning education and skills for inclusive growth, green jobs and the greening of economies. Focusing on India, Indonesia, Sri Lanka and Viet Nam, it discusses government and business sector responses to these issues and how Technical and Vocational Education and Training (TVET) systems and institutions are addressing both the renewal of curricula in the context of green growth dynamics, and patterns of training and skills development to meet demands. In addition, the book examines cross-country issues, concerns and prospects regarding education and skills for inclusive growth and green jobs for the four countries. These include critical themes and issues in the selected industry sectors triggering a demand for green jobs in the region; how industry is responding to those demands; areas impeding the transition from traditional to green practices; the importance of skills development; the role of TVET in addressing industry needs; and reasons for the slow response of TVET to green skills. While other studies conducted in Asia – and internationally – on the same topic have largely relied on secondary sources, this study conducted by the Asian Development Bank and the Education University of Hong Kong (ADB-EdUHK) is unique in that the findings, conclusions and recommendations reported on are based

on primary data. As part of the study, TVET providers, business enterprises, policy makers and practitioners were surveyed using questionnaires and face-to-face interviews. In addition, workshops were held in each of the four countries to ascertain the views of key stakeholders in government, nongovernment organisations, members of the international development community, TVET providers and members of the business sector. The book also provides summaries of the case studies undertaken for India, Indonesia, Sri Lanka and Viet Nam.

**Human Capital and the Future of the Gulf** Carolyn Barnett, 2015-11-16 Extensive efforts to develop human capital are under way in the United Arab Emirates, Saudi Arabia, and elsewhere in the Gulf, and they are increasingly setting expectations for how people ought to behave socially and economically that are in tension with how they are expected to behave politically. The tensions created by governments' conflicting aims can produce frustration, a sense of entitlement, or apathy among young people entering the labor force, each of which poses different potential political challenges for governments. Navigating this tension—or finding ways to create space for genuine innovation and risk taking within that constrained political context—will be among the most important strategic challenges for the region's leaders and people in the next 10 years.

**Nurse Migration in Asia** Radha Adhikari, Evgeniya Plotnikova, 2023-05-22 Nurse Migration in Asia explores the ever-increasing need for a larger nursing and healthcare workforce in Asia, where countries are undergoing rapid transformation, given economic globalisation and commercial

expansion. The book examines some of the major forces that play key roles in the changing dynamics of 21st century nurse and care worker migration in the Asian context; changes which inevitably have global implications. The country case studies range from India, China, Singapore to Japan and the Philippines. Common themes emerge: the rapid and unpredictable nature of nurse migration patterns, including the direction, purpose and frequency of migration; and the changes in professional training, regulation, and workforce policy. Forces causing these shifts include the changing population demography, global and regional economic fluctuations, and finally changing professional roles and gender dynamics. The book analyses the response to these transformations, and how countries adjust their immigration regulations, to attract foreign healthcare professionals. It concludes by highlighting the importance for all countries to remain vigilant as regards the exacerbating workforce crisis, and engage in developing coherent policy governance frameworks to manage healthcare workforce at the national or international levels. A valuable addition to the literature, this book will be of interest to academics in the field of nursing, health and social care workforce studies, population demography, labour markets, gender and international migration studies, globalisation in health and Asian studies.

The Business Year: Abu Dhabi 2020 Peter Howson, 2020-04-20 As Ecuador and the world at large grapple with the emerging challenge of the COVID-19 pandemic, it is important not to forget the fundamentals of the Ecuadorian economy and the success stories of 2019 and the start of 2020. We believe contained within these pages is an accurate, balanced account of the state of the Ecuadorian economy as of publication, told through the words of the dozens of top public- and private-sector figures. The Business Year's country-specific publications, sometimes featuring over 150 face-to-face interviews, are among the most comprehensive annual economic publications available internationally. This 212-page publication covers green economy, finance, hydrocarbons, mining,

agriculture, construction, industry, transport, education, health, ICT, and tourism.

**Uae Yearbook** Ibrahim Al-Abed, Paula Vine, Peter Hellyer, 2004-12 Each year this book celebrates achievements of the United Arab Emirates and in so doing it pays tribute to the architect of this stunning success story, Sheikh Zayed bin Sultan Al Nahyan, the greatly loved and respected founding father and President of the UAE from its formation on 2 December 1971 until his death on 2 November 2004. Sheikh Zayed displayed enormous wisdom and strength in overcoming the obstacles that faced him in constructing a modern nation. He never faltered on his course and knew exactly what he wanted to achieve - and why. He used to say that 'Wealth is not money. Wealth is in people.' And he devoted his efforts to providing education, health care and social services for all the country's citizens. At the same time he nurtured an environment in which business could flourish and people could live rewarding lives in freedom and peace.
