Green Economy and Green Jobs in China: Current Status and Potentials for 2020 ,

The Real Exchange Rate and Employment in China Ms.Ruo Chen,Mai Dao,2011-06-01 We examine the impact of real exchange rate fluctuations on sectoral and regional employment in China from 1980 to 2008. In contrast to theoretical predictions, employment in both the tradable and non-tradable sectors contracts following a real appreciation. Our results are robust across different sub-samples, levels of sectoral disaggregation, and are more pronounced for regions with higher export exposure. We attribute our findings to the importance of services as intermediate input in exportable production. We test this channel of exchange rate transmission using regional input-output tables linked with employment data at the region-sector level. The results of this paper have important implications for China's labor market adjustment should the Chinese RMB strengthen in the future. To mitigate the costs of short-run labor market adjustment, appropriate demand management and structural reforms in the non-traded sectors should play an important role.

HRM, Work and Employment in China Fang Lee

Cooke, 2004-11-10 During recent years there has been a growing interest in the way patterns of employment relations are changing

in China. This up-to-the-minute book reviews the policy and practice of human resource management, work and employment in China over the last fifty years at both the macro and micro level. It fills the gaps in existing literature by addressing a number of thematic issues: the growing inequality in employment public sector reform pay systems vocational training. It explores, contemplates and reveals this dynamic subject through a combination of rigorous research and first-hand interviews with Chinese practitioners, and is a valuable resource for anyone with an interest in Chinese society, Asian studies, comparative studies, human resource management, international business and employment relations.

China's Employment Challenges and Strategies After the WTO Accession Douglas Zhihua Zeng, 2005 Although China has made impressive progress in economic development and improving social well-being, it is facing many daunting challenges while transforming toward a knowledge and service-based economy and further opening up to international competition after its WTO accession in the context of knowledge revolution. One of the biggest challenges is how to create 100--300 million new jobs in the coming decade to absorb the millions of laid-offs, rural emigrants, and newly added labor force. China has been successful in building high-technology

parks and information and communications technology (ICT) industries, but they are limited in terms of employment generation, while most of the traditional labor-intensive industries are losing competitiveness due to low productivity. To combat the unprecedented employment challenge, China must implement a systemic and sustained strategy ... -- Cover verso.

Employment of Women in Chinese Cultures Cherlyn S.

Granrose, 2005

Examining the employment lives of Chinese women living under different government systems at the beginning of the twenty-first century, the contributors to this volume present an overview of factors affecting the employment status of women. The volume includes chapters on the People's Republic of China, Taiwan, Hong Kong and Singapore - nations that have common Chinese cultural experiences but very different economic systems

and government structures. Policies and laws vary widely in Chinese societies from the egalitarian, socialist provisions of The People's Republic of China to the laissez-faire, capitalist policy the British advocated for the Hong Kong government before 1997.

Employment of Women in Chinese Cultures provides a theoretical introduction from both Chinese and Western perspectives, as well as summaries of the effect on women's employment of government policies on taxation, health and safety, reproduction, childcare, and education in each nation-state. By juxtaposing the work of women of a similar cultural heritage living under different government systems, new insights are gained that can benefit Chinese working women wherever they live. Scholars and students of management, labor, gender, and China will find this volume of great interest. Government leaders will also find the research on women's employment lives a useful tool in future decision-making.

Work and Organizations in China after Thirty Years of Transition Lisa Keister, 2009-09-17 Thirty years of economic change have fundamentally altered the nature of organizations and work in China. This volume brings together the research by many of the top scholars studying these issues and provides a glimpse into the state of thinking on organizations and work at the start of

the fourth decade of transition.

Gender and Employment in Rural China Jing Song, 2017-04-21

With China's rapid advancements in urbanization and industrialization, there has been significant labor movement away from agriculture in the rural regions. Using four village case studies, Song examines how this restructuring process affects the rural population. Much of her research is centered on their various perceptions and reactions towards the market reforms. How are their lives reshaped through the employment transition? Along with the changes of family life and the diversification of development models, how do an individual's gender and background play a role in determining employment? These are the broad questions that Song addresses through detailed analysis of four different villages, in light of China's move towards decentralization of its rural economy.

Work and Inequality in Urban China Yanjie Bian, 1994-01-11

This book offers a systematic analysis of the impact of work organization on the social stratification of individuals in urban China. It explains why economic and labor market segmentation is possible and necessary in state socialism at a certain stage of its development, as in market capitalism, and how important one's

work unit or danwei is to the life of socialist workers in Chinese cities. Based on survey data, personal interviews, and official statistics, the author shows that structural allocation, status inheritance, educational achievement, political virtue, and interpersonal connections (guanxi) interplay in determining an individual's opportunities for entering and moving into a desirable place to work, for obtaining Communist party membership and an elite class status, and for receiving material compensation such as wages, bonuses, fringe benefits, housing, and home locations.

News is My Job Edna Lee Booker, 1940

The Employment Impact of China's WTO Accession A. S.

Bhalla, Shufang Qiu, S. Qiu, 2003-11-20 The book explores the macroeconomic and sectoral employment implications (in agriculture, industry and services) of China's World Trade Organisation accession. It argues that while short-run employment losses may occur, in the longer term China will be able to generate additional employment particularly in the tertiary sectors; and that it can maintain its comparative advantage in labour-intensive exports by relocating production from high-cost coastal areas to the hinterland with abundant supply of cheap labour. It also argues that, although China is likely to benefit in the long run, in the short and medium term China is likely to face enormous problems, including increased unemployment as weaker links cease to be protected by tariffs, and the problem of restructuring state-owned enterprises.

Looking for Work in Post-Socialist China Feng Xu, 2012-03-15

Unemployment is one of the most politically explosive issues in China and has gained further prominence as a result of the present global financial crisis. The novelty, urgency, and complexity of Chinese unemployment have compelled the government to experiment with policy initiatives that originate in the West. This book argues that although China is not a liberal democracy, it has turned to neo-liberal forms of governance to deal with unemployment, which now function alongside pre-existing Chinese modes of governance. This book examines the initiatives which represent China's attempt to institutionalize and humanize its approach to governance: these initiatives include training programmes; counselling; a web-based national labour-market information network; insurance; and using community (shequ) organizations as the base for new mechanisms of governance and informal job generation. Based on extensive original research including semi-structured interviews, the book discusses the ways in which the government combines the new techniques with old campaign-style policy techniques. The author argues that these multiple modes of governance make the state's power visible in the new Chinese labour market, and at the same time run the risk of policy incoherence or even failure.

Unemployment in China Grace O.M. Lee,Malcolm

Warner,2006-09-27 Unemployment in China offers a new and invaluable insight into the Chinese economy, keenly analyzing the new directions the world's next superpower is now taking. Successfully bringing together a wide range of research and evidence from leading scholars in the field, this book shows how unemployment is one of the key issues facing the Chinese economy. China's market-oriented economic reform and industrial restructuring, while greatly improving efficiency, have also sharply reduced overstaffing, leading to a large increase in unemployment. At the same time, further restructuring is predicted as the full impact of the accession to the WTO is felt throughout China. A further problem is that new jobs in China's growth industries are more likely to be secured by younger, better-qualified workers than by older, poorly educated and unskilled workers who have been laid off. This book discusses a wide range of issues related to the growing unemployment problem in China and examines the problems in particular cities, appraises the government response, and assesses the prospects going forward.
