Reading Job Intertextually Katharine J. Dell, Will Kynes, 2012-12-20 This volume fills an important lacuna in the study of the Hebrew Bible by providing the first comprehensive treatment of

intertextuality in Job, in which essays will address intertextual resonances between Job and texts in all three divisions of the Hebrew canon, along with non-canonical texts throughout history, from the ancient Near East to modern literature. Though comprehensive, this study will not be exhaustive, but will invite further study into connections between Job and these texts, few of which have previously been explored systematically. Thus, the volume's impact will reach beyond Job to each of the 'intertexts' the articles address. As a multi-authored volume that gathers together scholars with expertise on this diverse array of texts, the range of discussion is wide. The contributors have been encouraged to pursue the intertextual approach that best suits their topic, thereby offering readers a valuable collection of intertextual case studies addressing a single text. No study quite like this has yet been published, so it will also provide a framework for future intertextual studies of other biblical texts.

Moving the Needle Katherine S. Newman, Elisabeth S. Jacobs, 2023-03-28 This timely investigation reveals how sustained tight labor markets improve the job prospects and life chances of America's most vulnerable households Most research on poverty focuses on the damage caused by persistent unemployment. But what happens when jobs are plentiful and workers are hard to come by? Moving the Needle examines how very low unemployment boosts wages at the bottom, improves benefits, lengthens job ladders, and pulls the unemployed into a booming job market. Drawing on over seventy years of quantitative data, as well as interviews with employers, jobseekers, and longtime residents of poor neighborhoods, Katherine S. Newman and Elisabeth S. Jacobs investigate the most durable

positive consequences of tight labor markets. They also consider the downside of overheated economies that can ignite surging rents and spur outmigration. Moving the Needle is an urgent and original call to implement policies that will maintain the current momentum and prepare for potential slowdowns that may lie ahead

Rosenbloom, 2002-03-25 Labor markets and American industrialization -- Job seekers, employers, and the creation of labor market institutions -- Employment agencies and labor exchanges: the impact of intermediaries in the market of labor -- Markets for skilled labor: external recruitment and the development of internal labor markets -- One market or many? The Oxford Handbook of Job Loss and Job Search Ute-Christine Klehe PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature, experienced worker, job seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute-Christine Klehe and Edwin A.J. van Hooft, *The Oxford Handbook of Job Loss and Job Search* provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and

job search. Multidisciplinary in nature, Klehe, van Hooft, and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in-depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job-to-job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search.

Migration to and From Taiwan Kuei-fen Chiu, Dafydd Fell, Lin Ping, 2014-01-21 Migration has transformed Taiwanese society in the last 20 years. The main inflows have been temporary workers from Southeast Asian countries and female spouses from Southeast Asia and China marrying Taiwanese husbands. The main outflow has been

migration to China, as a result of increased economic integration across the Taiwan Strait. These changes have significantly altered Taiwan's ethnic structure and have profound social and political implications for this new democracy. As large numbers of these migrants take Taiwanese citizenship and their offspring gain voting rights, the impact of these new Taiwanese will continue to increase. This book showcases some of the leading researchers working on migration to and from Taiwan. The chapters approach migration from a range of disciplinary perspectives, including international relations, sociology, social work, film studies, political science, gender studies, geography and political economy and so the book has great appeal to scholars and students interested in the politics of Taiwan, Taiwanese society and ethnic identity as well as those focusing on migration in East Asia and comparative migration studies.

Reaching for the Dream Melanie Beresford, Angie Ngoc Tran, 2004 Transition economies allow the study of fundamental questions about the nature of markets. How do they arise and do they necessarily follow the same *modus operandi* as markets in other countries? How does the opening of the economy to global market influences affect the process of institutional change? And how in the context of an underdeveloped transitional economy like Vietnam, do such influences affect the prospects for sustainable and equitable development? This book focuses on the differentiated ways in which the double transition in Vietnam, from central planning and from under-development, affects various sectors of the population.
