The Beginning and the End of the World Robert Crawford, 2011-06-14 In a work of spectacular imagination and remarkable synthesis, poet Robert Crawford celebrates St Andrews, the first town in the world to have its people, buildings and natural environment thoroughly documented through photography. The Beginning and the End of the World tells the stories of several pioneering Scottish photographers, linking their work to one of the nineteenth century's most scandalous and hotly debated publications. Here is the extraordinary intellectual life of an eccentric society rich in apocalyptically-minded Victorian inventors and authors whose work has had an international impact. The protagonists include a very quarrelsome professor, a cello-playing ex-military golfer, a notorious scientist, a married couple coping with mental breakdown and a physician obsessed with sewage. In paying full attention to these people's inter-relationship, implicitly and explicitly this book suggests that their lasting legacies may have a bearing on our own arguments about environmental sustainability and the possibility of largescale extinction.

**Air Force One** Von Hardesty, 2005-09 New in Paperback! In the 1940s, FDR was the first airborne president, flying several times in a C-54 nicknamed the Sacred Cow. In the 1950s, it was aircraft known as Independence, Columbine II and Columbine III that transported Harry Truman and Dwight

Eisenhower on occasion. But it was not until after the Korean War, with the United States becoming the leader of the free world, that presidential air travel entered the modern age. The jet-age mobility of the American presidency beginning in the 1960s corresponds directly to the nation's emergence as a super power. *Air Force One: The Aircraft that Shaped the Modern Presidency* is the story of the planes, the Presidents, their staff and, their many trips across the nation and around the globe. But it's also more than that, it is a vehicle for better understanding the activities and dealings of each presidential administration in the second half of the twentieth century. Through vibrant photography, this book communicates the story of a unique set of planes and the presidents who made them a vital national asset. Now all of these planes and their famous passengers have been captured. Written by Smithsonian National Air and Space Museum curator Von Hardesty and featuring over 200 illustrations, including new photos of the airplane's interiors, this book takes you on a memorable flight through history. Through insider accounts and from a unique vantage point on well-known political events, Hardesty shows how the presidency was transformed by the remarkable advances in aviation technology.

*Photography of Victorian Scotland* Roddy Simpson, 2012-09-06 This is the first book to provide a full and coherent introduction to the photography of Victorian Scotland. There are many books which deal with particular elements and individual photographers, which show the interest in the subject, but no book draws everything together to provide an understanding of the multi-faceted nature of photography and the inter-relationship with other activities in the society of the time. This authoritative introduction, building upon these other publications, will provide a wide-ranging appreciation of early Scottish photography and in particular that Scottish photography was in the vanguard of many international trends. The material has been structured and the topics organised,

with appropriate illustrations, as both a readable narrative and a foundation text for the subject.

The Dancing Lares and the Serpent in the Garden Harriet I. Flower, 2017-09-26 The most pervasive gods in ancient Rome had no traditional mythology attached to them, nor was their worship organized by elites. Throughout the Roman world, neighborhood street corners, farm boundaries, and household hearths featured small shrines to the beloved lares, a pair of cheerful little dancing gods. These shrines were maintained primarily by ordinary Romans, and often by slaves and freedmen, for whom the lares cult provided a unique public leadership role. In this comprehensive and richly illustrated book, the first to focus on the lares, Harriet Flower offers a strikingly original account of these gods and a new way of understanding the lived experience of everyday Roman religion. Weaving together a wide range of evidence, Flower sets forth a new interpretation of the much-disputed nature of the lares. She makes the case that they are not spirits of the dead, as many have argued, but rather benevolent protectors—gods of place, especially the household and the neighborhood, and of travel. She examines the rituals honoring the lares, their cult sites, and their

iconography, as well as the meaning of the snakes often depicted alongside lares in paintings of gardens. She also looks at Compitalia, a popular midwinter neighborhood festival in honor of the lares, and describes how its politics played a key role in Rome's increasing violence in the 60s and 50s BC, as well as in the efforts of Augustus to reach out to ordinary people living in the city's local neighborhoods. A reconsideration of seemingly humble gods that were central to the religious world of the Romans, this is also the first major account of the full range of lares worship in the homes, neighborhoods, and temples of ancient Rome.

**Walker Evans** John T. Hill, Heinz Liesbrock, 2015-11-25 This resplendent volume is the most comprehensive study of Walker Evans's work ever published, containing masterful images accompanied by authoritative commentary from leading photography historians. The name Walker Evans conjures images of the American everyman. Whether it's his iconic contributions to James Agee's depressionera classic book, *Let Us Now Praise Famous Men*, his architectural explorations of antebellum plantations, or his subway series, taken with a camera hidden in his coat, Evans's accessible and eloquent photographs speak to us all. This comprehensive book traces the entire arc of Evans's remarkable career, from the 1930s to the 1970s. The illustrations in the book range from his earliest images taken with a vest pocket camera to his final photos using the then new SX-70 because his regular equipment had become too heavy to carry around. The book includes commentary from three of Evans's longtime friends, photographers John T. Hill and Jerry Thompson and professor emeritus (Yale University) Alan Trachtenberg. Their insight and first-hand experience give depth to their critical writings on Evans's work. In addition to offering a broad perspective on Evans's work, the book also clarifies the photographer's anti-art philosophy. Eschewing aesthetic hyperbole, Evans wanted his pictures to resonate with a wide audience. At the same time, his natural curiosity made him one of the most inventive photographers of all time. What these photographs and writings attest to is a huge and timeless talent, which came not from a camera, but from Evans's uniquely hungry eye.
