**High Performance Computing** Alex Veidenbaum, Kazuki Joe, Hideharu Amano, Hideo Aiso, 2003-11-18 The 5th International Symposium on High Performance Computing (ISHPC-V) was held in Odaiba, Tokyo, Japan, October 20-22, 2003. The symposium was thoughtfully planned, organized, and supported by the ISHPC Organizing Committee and its collaborating organizations. The ISHPC-V program included two keynote speeches, several invited talks, two panel discussions, and technical sessions covering theoretical and applied research topics in high-performance computing and representing both academia and industry. One of the regular sessions highlighted the research results of the ITBL project (IT-based research laboratory, <http://www.itbl.riken.go.jp/>). ITBL is a Japanese national project started in 2001 with the objective of realizing a virtual joint research environment using information technology. ITBL aims to connect 100 supercomputers located in main Japanese scientific research laboratories via high-speed networks. A total of 58 technical contributions from 11 countries were submitted to ISHPC-V. Each paper received at least three peer reviews. After a thorough evaluation process, the program committee selected 14 regular (12-page) papers for presentation at the symposium. In addition, several other papers with favorable reviews were recommended for a poster session presentation. They are also included in the proceedings as short (8-page) papers. The program committee gave a distinguished paper award and a best student paper award to two of the regular papers. The distinguished paper award was given for "Code and Data Transformations for Improving Shared Cache Performance on SMT Processors" by Dimitrios S. Nikolopoulos. The best student paper award was given for "Improving Memory Latency Aware Fetch Policies for SMT Processors" by Francisco J. Cazorla.

**A Data Scientist's Guide to Acquiring, Cleaning, and Managing Data in R** Samuel E. Buttrey, Lyn R. Whitaker, 2017-12-18 The only how-to guide offering a unified, systemic approach to acquiring, cleaning, and managing data in R Every experienced practitioner knows that preparing data for modeling is a painstaking, time-consuming process. Adding to the difficulty is that most modelers learn the steps involved in cleaning and managing data piecemeal, often on the fly, or they develop their own ad hoc methods. This book helps simplify their task by providing a unified, systematic approach to acquiring, modeling, manipulating, cleaning, and maintaining data in R. Starting with the very basics, data scientists Samuel E. Buttrey and Lyn R. Whitaker walk readers through the entire process. From what data looks like and what it should look like, they progress through all the steps involved in getting data ready for modeling. They describe best practices for acquiring data from numerous sources; explore key issues in data handling, including text/regular expressions, big data, parallel processing, merging, matching, and checking for duplicates; and outline highly efficient and reliable techniques for documenting data and recordkeeping, including audit trails, getting data back out of R, and more. The only single-source guide to R data and its preparation, it describes best practices for acquiring, manipulating, cleaning, and maintaining data Begins with the basics and walks readers through all the steps necessary to get data ready for the modeling process Provides expert guidance on how to document the processes described so that they are reproducible Written by seasoned professionals, it provides both introductory and advanced techniques

Features case studies with supporting data and R code, hosted on a companion website A Data Scientist's Guide to Acquiring, Cleaning and Managing Data in R is a valuable working resource/bench manual for practitioners who collect and analyze data, lab scientists and research associates of all levels of experience, and graduate-level data mining students.

**Call Center Guide** Khaja Moinuddin,2009-11 In today's world, call centers and B.P.O. are the booming industries. Many youngsters want to join these industries because of high pay. Most of the work, whether it be call center or B.P.O. services, comes from the U.S.A. This guide is to help prospective call center candidates get an inside look at this industry. It has been written in easy, simple, and non-technical English. This guide is specially written to protect aspiring candidates from being duped and conned by unscrupulous people who come in various disguises. They wait like predators ready to pounce and hunt down the gullible and unsuspecting candidates. A decade ago, call centers started to make an appearance in the Asian sub-continent. Most people did not know about this industry and even today, not many people know about it. Although it has become popular, it still remains an enigma to young people who want to join this industry. But they have no relevant information about the call center industry. The candidates are running around from pillar to post wanting this job. They have no idea what is involved; they just know some terms like inbound and outbound, and some job titles, such as Call Center Executive (C.C.E.), Customer Care Representative (C.C.R.), and Technical Service Officer (T.S.O.). They were not even able to briefly talk about the subject. The aim of this guide is to be fully transparent about the projects and campaigns that come to a call center. Dear Reader, we want to help you in every possible way to join a call center. We will be happy to provide you more information and knowledge of these industries. However, we first want you to go through this guide and assess your suitability.

**Does Preaching Have a Future?** Dr. Dwight S. Riddick Sr., DR. FRANK A. THOMAS, 2015-08-07 From preaching sermons as a child in the backyard, to delivering the upcoming Presidents address for the 101st annual gathering of the prestigious Hampton University Ministers Conference, Dr. Dwight Riddick has become transparent in his book, *Does Preaching Have a Future?* As you open the pages of this book, you will find insightful, conversational thoughts around the future of preaching. He writes, This book is intended to ignite conversation about what preaching should look like going forward-if this discourse is not already burning in the soul. This veteran (seasoned) pastor and teacher of the gospel has relied completely upon Scripture in his broad range of topics when it comes to the future of preaching: \*Preach the word, be instant in season, out of season is a tried and proven counsel for preachers stretching all generations. \*Ezekiel was faced with the question, can these bones live? Preachers today are asked if their preaching can bring about positive transformation in the lives of hopeless people and hopeless cases during changing times. Dr. Riddick supports this conversational topic by reminding his fellow homiletics (preachers) that those called and anointed by God are uniquely qualified to explain the Scripture.
