Increasing Awareness of Child and Adolescent Mental Health

Elena M. Garralda, Jean-Philippe Raynaud, 2010-03-03 M. Elena Garralda and Jean-Philippe Raynaud aim to increase awareness of child and adolescent mental health within an international framework that gives special consideration to problems arising in different contexts around the world and through expert views supported by empirical evidence and considering clinical implications. Chapters address the effects on child mental health of issues including secular changes in family composition in both Western and Eastern countries, rapid industrialization, poverty, deprivation, adoption, refugee status, and aboriginal life. The book also considers emerging issues, such as cyber addiction, PTSD, ADHD across different cultures, and the autism 'epidemic.'

Advocacy in Neurology Wolfgang Grisold,Walter Struhal,Thomas Grisold,2019-02-07 Advocacy is a broad term that covers activities aimed at increasing attention, awareness, information, nursing, treatment, and support to improve the outcome of patients. These actions can be focused directly towards patients or indirectly via third parties. Although advocacy is present in all medical specialties, neurology in particular finds itself in need of strong advocacy tools as the diagnosis, treatment, long-term care and associated resource, and social issues have become increasingly complex. While some physicians implicitly or explicitly act as advocates, there is a lack of holistic research in order to clarify the meaning of advocacy along with concrete methods and strategies. Advocacy in Neurology provides an integrated approach to the concept of advocacy in neurology. Structured in five sections, the book begins by explaining the term advocacy in general before elaborating on the areas of interest within neurology. The text goes on to offer concrete strategies and tools for clinicians to deploy advocacy in their daily work, and then discusses specific neurological diseases to point out and explain where advocacy is, or could be, beneficial. The book ends with an outlook, presentation of results, and an ending conclusion. Advocacy in Neurology offers a practical perspective on advocacy activities in neurology, aiming to show when and why they are important for neurology.

Peripheral Nerve Disorders Gérard Said,Christian Krarup,2013-08-17 Disorders of the peripheral nervous system (PNS) are the cause of prominent neurological symptoms including weakness, sensory loss, pain and autonomic dysfunction associated with deficits, morbidity and mortality. These disorders

may be primary hereditary or cryptogenic neurologic disorders confined to the PNS or part of the pathology of both the central nervous system and the PNS. Most PNS disorders are secondary to other system disorders and may be responsive to treatment of the primary disease. Important advances have been obtained in several areas including molecular genetics, biochemistry, immunology, morphology and physiology that have enhanced our understanding of the causes and consequences of damage to peripheral nerve. Understanding of both these groups of PNS diseases has greatly expanded over recent years and has led to important advances of treatment both to protect and to repair damages of peripheral nerve. This volume provides an overview of the state-of-the-art of examination, diagnosis and treatment of these very diverse disorders and will be of interest to both the research and clinical neuroscience and neurology communities. Covers both hereditary and cryptogenic neurologic disorders Includes advances in the basic science of PNS from molecular genetics, biochemistry, immunology, morphology and physiology Detailed coverage of neuropathy in connective tissue disorders, infectious disorders, metabolic disorders and malignancy

Alzheimer's and Parkinson's Diseases Israel Hanin, Mitsuo Yoshida, Abraham Fisher, 2013-06-29 This book represents the third in a series of International Conferences related to Alzheimer's (AD) and Parkinson's (PD) diseases. The first one took place in Eilat, Israel, in 1985; and the second one in Kyoto, Japan, in 1989. This book contains the full text of oral and poster presentations from the Third International Conference on Alzheimer's and Parkinson's Diseases: Recent Developments, held in Chicago, Illinois, U.S.A. on November 1-6, 1993. The Chicago Conference was attended by 270 participants. The Scientific Program was divided into nine oral sessions, a keynote presentation, and a poster session. The conference culminated in a Round Table Discussion involving all of the participants in the conference. The four and one-half day meeting served as an excellent medium for surveying the current

status of clinical and preclinical developments in AD and PD. There were 59 oral presentations and 93 posters. This book incorporates a majority of both.
