*Professional Joomla!* Dan Rahmel,2007-10 Provides informaton on using the open source content management system used to manage data on the World Wide Web, covering such topics as creating Joomla! expressions, using Ajax technology, and adopting design patterns, and incorporating source code control.

**Advanced Joomla!** Dan Rahmel,2013-06-25 Advanced Joomla! teaches you advanced techniques for customizing a Joomla! CMS, including creating templates, administration, and building extensions. It will provide the technical know-how and a bonanza of information that will allow you to take your Joomla! sites to the next level. Written by bestselling Beginning Joomla! author Dan Rahmel, Advanced Joomla! picks up right where Beginning Joomla! left off. Amongst other things, it shows you how to integrate advanced features into your Joomla! site, including social networking, blogging, and Google and Yahoo! web services; construct advanced Joomla! templates that use multiple stylesheets; use advanced administration techniques; and employ MySQL data reporting, remote deployment, and quality control using automated testing. Advanced Joomla! assists content providers and web developers in all aspects of Joomla! content creation. For graphic artists and web designers, the professional template techniques and site organization information will prove invaluable. For developers who are weary of the often Byzantine documentation and hunger for clear organized information, Advanced Joomla! holds the key to unlocking the treasures of this advanced CMS system.

Joomla! La guida ufficiale Jennifer Marriott, Elin Waring, 2013-05-21T00:00:00+02:00 Questo guida, l'unica ufficiale, è una risorsa preziosa per amministratori, sviluppatori, designer e content manager alle prese con Joomla!, uno dei CMS più diffusi al mondo. In queste pagine il lettore alle prime armi impara come creare rapidamente siti web usabili e funzionali; quello più esperto come sfruttare le potenzialità più avanzate di Joomla! per rendere i siti più flessibili, ricchi e accattivanti. Attraverso esempi pratici, tutorial e interviste che distillano l'ineguagliabile esperienza dei membri della community, il manuale affronta tutti i passi necessari alla realizzazione e alla manutenzione di un sito con Joomla! (versione 3 e 2.5): dall'installazione all'uso dei template, dai metodi di backup alle estensioni, senza dimenticare i problemi reali che occorre affrontare quando si progettano siti per aziende, enti no profit o per finalità educative, anche in riferimento alla loro promozione e ottimizzazione in chiave SEO.

*JEmbedAll manual* Dan-Marius Sabau,2017-01-29 JEmbedAll is a Joomla component and plugin the you can purchase from <http://www.goldengravel.eu>, something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin, but it also offer support for downloading files and generating ebooks. The package it's easy to configure and to work with. Some features have to be configured (there is a configuration section just for that in the backend) in order to be embedded and used properly in the frontend, other features are integrated and you just used them as they are. Even so, you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos (from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others), documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos, Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data, with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature, but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online: upload your videos on YouTube or Vimeo (for example) and upload your files (the documents can be Portable Document Format - PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized by Google Docs) on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com (but that works fine), it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and direction into your site. You can define and configure file packages (they can contain any number of files) the visitors can download for free or for money (Paypal payment included!). You can define, configure and embed Community Builder advanced searches (this component works with any CB version!). Since JEmbedAll version 1.3 the search results can open in the same window, in a different window or in a modal window. Beyond that, you can give every user several powerful tools: they can save the search forms and search results, they can embed that saved search results as users lists, they can use CB privacy - a tool that restricts access to some fields, or even the users, on searches. You can embed Facebook pages, posts, videos and images (depending on the Facebook privacy - in many cases all this have to be public for everyone to see), but you can also embed some plugins (Facebook activity, comments, facepile, likebox and recommendations). Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended: you can create shopping carts for files you want sell and the generated e-books.
