Identification Scott Hunsaker, 2023-05-31 Editor Scott L. Hunsaker's new volume sheds much-needed light on the process of identifying students for gifted education services, a topic surrounded by controversy and confusion. With contributions from leading experts in the field, *Identification* takes an in-depth look at the research and practice of identification of gifted and talented students. Each of the four sections tackles an important aspect of the issue: Theoretical Foundations, Professional Foundations, Identification Practice, and Instrumentation. The text presents multiple points of view and does not shy away from thorny issues such as the theory-practice gap, underrepresentation of diverse populations, identification as status bestowal rather than assessment process, rigidity in use of processes and instruments, the search for the magic-bullet test, and the validity of nonverbal intelligence tests. Whether you are an administrator, teacher, gifted education specialist, professor, or parent, *Identification* will offer you insight presented nowhere else.

Nietzsche on Tragedy M. S. Silk, J. P. Stern, 2016-08-26 The first comprehensive study of Nietzsche's earliest book, *The Birth of Tragedy* (1872), this important volume by M. S. Silk and J. P. Stern examines the work in detail: its place in Nietzsche's philosophical career; its value as an account of ancient Greek culture; its place in the history of German ideas, and its value as a theory of tragedy and music. Presented in a fresh twenty-first-century series livery, and including a specially commissioned preface written by Lesley Chamberlain, illuminating its enduring
