A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. accounting firms and bookkeeping businesses record
journal entries each month. There are many columnar pads
to choose from...so what is different about this book? Do
you find yourself constantly searching for account numbers?
List your account codes on the first and second page so you

can just flip to the front for quick reference. The columns include the following: Line number Post reference Description (room to write down the details) Debit Credit There are 48 journal entry pages and depending on your frequency of recording journal entries...you should be able to use the journal for years. You could copy and attach your chart of accounts to the first two pages rather than writing them all down. A glue stick will do!
