## **The Best of Archives of Internal Medicine** James E.

Dalen,1999-07 Each of these books represents a flagship volume in the new Best of Archives Journals Series from the American Medical Association. Each book is a compilation of 12-15 of the most significant articles from its corresponding specialty journals published from June 1998 to June 1999. Articles are selected based on their impact on the field and according to the following criteria: New treatments of diagnostic techniques Controversial issues in the field Simplification of a known problem for practicing physicians Information that is important to other specialists Expert commentary is provided a context in which the reader can consider the selection, and make the journal articles more accessible to practicing physicians. Also included is an introduction to each volume to provide an overview of the advancements made in the year, and to place these advancements in context for the practicing physician

Swiger,Joshua R. Thomas,Michael E. Hochman,Steven D.

Hochman,2015 *50 Studies Every Internist Should Know* presents key studies that shape today's practice of internal medicine.

Selected using a rigorous methodology, the studies cover topics including: preventative medicine, endocrinology, hematology and oncology, musculoskeletal diseases, nephrology, gastroenterology, infectious diseases, cardiology, pulmonology, geriatrics and palliative care, and mental health. For each study, a concise summary is presented with an emphasis on the results and limitations of the study, and its implications for practice. An illustrative clinical case concludes each review, followed by brief information on other relevant studies. This book is a must-read for health care professionals and anyone who wants to learn more about the data behind clinical practice.
