The Greater Journey David McCullough,2011-05-24 The #1 bestseller that tells the remarkable story of the generations of American artists, writers, and doctors who traveled to Paris, fell in love with the city and its people, and changed America through what they learned, told by America's master historian, David McCullough. Not all pioneers went west. In *The Greater Journey*, David McCullough tells the enthralling, inspiring—and until now, untold—story of the adventurous American artists, writers, doctors, politicians, and others who set off for Paris in the years between 1830 and 1900, hungry to learn and to excel in their work. What they achieved would profoundly alter American history. Elizabeth Blackwell, the first female doctor in America, was one of this intrepid band. Another was Charles Sumner, whose encounters with black students at the Sorbonne inspired him to become the most powerful voice for abolition in the US Senate. Friends James Fenimore Cooper and Samuel F. B. Morse worked unrelentingly every day in Paris, Morse not only painting what would be his masterpiece, but also bringing home his momentous idea for the telegraph. Harriet Beecher Stowe traveled to Paris to escape the controversy generated by her book, *Uncle Tom's Cabin*. Three of the greatest American artists ever—sculptor Augustus Saint-Gaudens, painters Mary Cassatt and John Singer Sargent—flourished in Paris, inspired by French masters. Almost forgotten today, the heroic American ambassador Elihu Washburne bravely remained at his post through the Franco-Prussian War, the long Siege of Paris, and the nightmare of the Commune. His vivid diary account of the starvation and suffering endured by the people of Paris is published here for the first time. Telling their stories with power and intimacy, McCullough brings us into the lives of remarkable men and women who, in Saint-Gaudens' phrase, longed "to soar into the blue."

A Mathematical Bridge Stephen Hewson,2009-01-20 Although higher mathematics is beautiful, natural and interconnected, to the uninitiated it can feel like an arbitrary mass of disconnected technical definitions, symbols, theorems and methods. An intellectual gulf needs to be crossed before a true, deep appreciation of mathematics can develop. This book bridges this mathematical gap. It focuses on the process of discovery as much as the content, leading the reader to a clear, intuitive understanding of how and why mathematics exists in the way it does. The narrative does not evolve along traditional subject lines: each topic develops from its simplest, intuitive starting point; complexity develops naturally via questions and extensions. Throughout, the book includes levels of explanation, discussion and passion rarely seen in traditional textbooks. The choice of material is similarly rich, ranging from number theory and the nature of mathematical thought to quantum mechanics and the history of mathematics. It rounds off with a selection of thought-provoking and stimulating exercises for the reader.

Women in Higher Education and the Journey to Mid-Career: Challenges and Opportunities Schnackenberg, Heidi L.,2022-06-24 Individuals in mid-career positions in higher education typically feel that they are faced with fewer engagement endeavors and new initiatives with which they can participate in as institutions tend to find them not as new and their ideas no longer as cutting edge, even though they very well may be. For women in academia, this phenomenon is even more complex. Typically, by mid-career, women have survived the sprint to tenure while juggling family/caregiver responsibilities. Post-tenure they may find themselves in a space where they have more control over their work and can engage at a more comfortable pace. However, without institutional support and personal determination to remain engaged, women may find themselves facing stagnation in their career development. Thus, it is essential that mentorship opportunities are established and career trajectories put in place for mid-career women. *Women in Higher Education and the Journey to Mid-Career: Challenges and Opportunities* considers specific challenges, issues, strategies, and solutions that are associated with female academics during mid-career phases. The book includes a variety of emerging evidence-based professional practice and narrative personal accounts as written by administrators, faculty, staff, and students. The book considers strategies for remaining vibrant and productive and suggestions from successful mid-career women academics and reflections from women who have passed the mid-career phase. Covering topics such as tenure, self-care, and academic leadership, this reference work is ideal for administrators, faculty, policymakers, academicians, scholars, researchers, practitioners, instructors, and students.

Black Women Navigating Historically White Higher Education Institutions and the Journey Toward Liberation Logan, Stephanie R.,Good, Tyra L.,2022-05-27 Black women in higher education continue to experience colder institutional climates that devalue their presence. They are relied on to mentor students and expected to commit to service activities that are not rewarded in the tenure process and often lack access to knowledgeable mentors to offer career support. There is a need to move beyond the individual resistance strategies employed by Black women to institutional and policy changes in higher education institutions. Specifically, higher education policymakers and administrators should understand and acknowledge how the race and gender makeup of campuses and departments impact the successes and failures of Black women as they work to recruit and retain Black women graduate students, faculty, and administrators. *Black Women Navigating Historically White Higher Education Institutions and the Journey Toward Liberation* provides a collection of ethnographies, case studies, narratives, counter-stories, and quantitative descriptions of Black women's intersectional experience learning, teaching, serving, and leading in higher education. This publication also provides an opportunity for Black women to identify the systems that impede their professional growth and development in higher education institutions and articulate how they navigate racist and sexist forces to find their versions of success. Covering a range of topics such as leadership, mental health, and identity, this reference work is ideal for higher education professionals, policymakers, administrators, researchers, scholars, practitioners, academicians, instructors, and students.

High Price Carl Hart,2013-06-11 High Price is the harrowing and inspiring memoir of neuroscientist Carl Hart, a man who grew up in one of Miami's toughest neighborhoods and, determined to make a difference as an adult, tirelessly applies his scientific training to help save real lives. Young Carl didn't see the value of school, studying just enough to keep him on the basketball team. Today, he is a cutting-edge neuroscientist—Columbia University's first tenured African American professor in the sciences—whose landmark, controversial research is redefining our understanding of addiction. In this provocative and eye-opening memoir, Dr. Carl Hart recalls his journey of self-discovery, how he escaped a life of crime and drugs and avoided becoming one of the crack addicts he now studies. Interweaving past and present, Hart goes beyond the hype as he examines the relationship between drugs and pleasure, choice, and motivation, both in the brain and in society. His findings shed new light on common ideas about race, poverty, and drugs, and explain why current policies are failing.

I believe the community who reads this book will join me in thanking those who wrote it, for their courage, their wit and their plethora of ideas.' - from the foreword by Liane Holliday Willey For the families who have contributed to this book, living with autism spectrum disorders has been a journey of self-discovery.
