Higher Education in Vietnam David Sloper,Le Thac Can,1995 Growth and development in many Southeast Asian nations can be related to education and training activities, both formal and informal. Higher Education in Vietnam reviews the policy context, the history, and the characteristics of higher education in Vietnam and examines the extensive changes that have occurred in recent years until 1993. For the first time, information and statistics are provided about government policies and institutional operations in higher education. Included are four chapters written by ministers as well as two case studies: of the development of a private institution, and of a state university that has revitalized its academic and financial basis. Its twelve chapters were written and edited without invigilation by any government. This volume provides a unique and comprehensive introduction to higher education in Vietnam. It will be of interest both to specialists and to anyone concerned with development in Vietnam and Indochina.

Law and Investment in China Vai Io Lo,Xiaowen Tian,2004-08-02 The Chinese market is appealing, but the Chinese legal system is very complicated. A basic understanding of Chinese law is absolutely crucial for companies investing in this fast-

Since China is moving toward a socialist market economy and is increasingly integrated into the world market, some aspects of China's commercial law are different from, while others are moving into line with, those of mature market economies. This book provides an introduction to the Chinese legal system, focusing on laws and regulations on foreign direct investment and highlights recent government policies and measures undertaken to intensify economics reforms so as to meet various challenges arising from China's accession to the World Trade Organization.

Aberrant Beliefs and Reasoning Niall Galbraith,2014-09-11 An aberrant belief is extreme or unusual in nature. In the most serious cases these beliefs cause emotional distress in those who hold them, and typify the core symptoms of psychological disorders. Each of the chapters in this volume seeks to examine the role that biases in reasoning can play in the formation of aberrant beliefs. The chapters consider several conjectures about the role of reasoning in aberrant belief, including the role of the jumping to conclusion bias in delusional beliefs, the probabilistic bias in paranormal beliefs, the role of danger confirming reasoning in phobias, and the controversial notion that people with

schizophrenia do not succumb to specific forms of reasoning bias. There are also chapters evaluating different theoretical perspectives, and suggestions for future research. *Aberrant Beliefs and Reasoning* is the first volume presenting an overview of contemporary research in this growing subject area. It will be essential reading for academics and students in the fields of human reasoning, cognitive psychology and philosophy, and will also be of great interest to clinicians and psychiatrists.

An Analysis of the Information Technology Standardization Process J.L. Berg,H.

Schumny,2012-12-02 A number of important issues form the basis of this book: How can the Information Technology (IT) standardization process, leading to unified products which are needed on the market, be made more efficient? Which current IT standards are of high quality, what factors have led to that high quality, and can those factors be re-created for other IT standards? What improvements to the quality of IT standards are needed? Which organizations should be involved? What permanent changes in the IT standardization scene are necessary? At what point in the evolution of a technology is it appropriate to produce standards? Is strategic planning feasible in the current standardization approach? Diverse disciplines contributed to the findings in this book: computer scientists, standardization leaders and professionals, users and vendors, economists, auditors, software implementors, and communication specialists.
