Xoxoxo Jason Judd,2009-12-01 XOXOXOA[a¬aWhat can I say? ItA[a¬a[s the third in a loosely connected series of books by Jason Judd and another A[a¬AI made you believe itA[a¬A tale of his thatA[a¬a[s based in reality in almost no way. Yes, Jason has a way of putting a spin on reality and heA[a¬a[s done it again. A brief story, yet one that spans decades, of a heroin addict and a surreal A[a¬AtranslationA[a¬A of an age-old riot that shocked the culture of a make-believe country, Nainari, linked together with a diamond by August Swore. August recounts a short tale of his heroin-addicted friend, while the lengthy A[a¬AtranslationA[a¬A by August rests timelessly in the middle. The wonders never cease as August reveals only after the A[a¬AtranslationA[a¬A that he and his friend have such a connection to the riots that shook Nainari.

Miss Fortune Lauren Weedman, 2016-03-15 Los Angeles Times Bestseller For fans of Jenny Lawson, Sarah Colonna, and Lena Dunham, an acutely-observed and hilarious take on what happens when life doesn't end up quite as you'd expected. "Gloriously smart, deeply funny, and nakedly vulnerable ... I laughed. I cried. I thanked my lucky stars I didn't ever have a threesome with co-workers in the Netherlands. But most of all, I fell in love with Lauren Weedman and the raw and complicated truths she so honestly explores on every page." —Cheryl Strayed, author of the New York Times bestseller *Wild* Lauren Weedman is not okay. She's living what should be the good life in sunny Los Angeles. After a gig as a correspondent on *The Daily Show* with Jon Stewart, she scored parts in blockbuster movies, which led to memorable recurring roles on HBO's *Hung* and *Looking*. She had a loving husband and an adorable baby boy. In these comedic essays, Weedman turns a piercingly observant, darkly funny lens on the ways her life is actually Not Okay. She tells the story of her husband's affair with their babysitter, her first and only threesome, a tattoo gone horribly awry, and how the birth of her son caused mama drama with her own mother and birth mother, all with laugh-

out-loud wit and a powerful undercurrent of vulnerability that pulls off a stunning balance between comedy and tragedy.

Silent Snow Marla Cone, 2007-12-01 “A slender but punch-packing overview of the environmental destruction of the Far North” from the award-winning environmental reporter (Kirkus Reviews). Traditionally thought of as the last great unspoiled territory on Earth, the Arctic is in reality home to some of the most severe contamination on the planet. Awarded a major grant by the Pew Charitable Trusts to study the Arctic’s deteriorating environment, Los Angeles Times environmental reporter Marla Cone traveled across the Far North, from Greenland to the Aleutian Islands, to find out why the Arctic has become so toxic. *Silent Snow* is not only a scientific journey, but a personal one with experiences that range from tracking endangered polar bears in Norway to hunting giant bowhead whales with native Alaskans struggling to protect their livelihood. Through it all, Cone reports with heartbreaking immediacy on the dangers of pollution to native peoples and ecosystems, how Arctic cultures are adapting to this pollution, and what solutions will prevent the crisis from getting worse.

Frontiers of Multimedia Research Shih-Fu Chang, 2018-01-03 The field of multimedia is unique in offering a rich and dynamic forum for researchers from “traditional” fields to collaborate and develop new solutions and knowledge that transcend the boundaries of individual disciplines. Despite the prolific research activities and outcomes, however, few efforts have been made to develop books that serve as an introduction to the rich spectrum of topics covered by this broad field. A few books are available that either focus on specific subfields or basic background in multimedia. Tutorial-style materials covering the active topics being pursued by the leading researchers at frontiers of the field are currently lacking. In 2015, ACM SIGMM, the special interest group on multimedia, launched a new initiative to address this void by selecting and inviting 12 rising-star speakers from different subfields of multimedia research to deliver plenary tutorial-style talks at the ACM Multimedia conference for 2015. Each speaker discussed the challenges and state-of-the-art developments of their prospective research areas in a general manner to the broad community. The covered topics were comprehensive, including multimedia content understanding, multimodal human-human and human-computer

interaction, multimedia social media, and multimedia system architecture and deployment. Following the very positive responses to these talks, the speakers were invited to expand the content covered in their talks into chapters that can be used as reference material for researchers, students, and practitioners. Each chapter discusses the problems, technical challenges, state-of-the-art approaches and performances, open issues, and promising direction for future work. Collectively, the chapters provide an excellent sampling of major topics addressed by the community as a whole. This book, capturing some of the outcomes of such efforts, is well positioned to fill the aforementioned needs in providing tutorial-style reference materials for frontier topics in multimedia. At the same time, the speed and sophistication required of data processing have grown. In addition to simple queries, complex algorithms like machine learning and graph analysis are becoming common. And in addition to batch processing, streaming analysis of real-time data is required to let organizations take timely action. Future computing platforms will need to not only scale out traditional workloads, but support these new applications too. This book, a revised version of the 2014 ACM Dissertation Award winning

dissertation, proposes an architecture for cluster computing systems that can tackle emerging data processing workloads at scale. Whereas early cluster computing systems, like MapReduce, handled batch processing, our architecture also enables streaming and interactive queries, while keeping MapReduce's scalability and fault tolerance. And whereas most deployed systems only support simple one-pass computations (e.g., SQL queries), ours also extends to the multi-pass algorithms required for complex analytics like machine learning. Finally, unlike the specialized systems proposed for some of these workloads, our architecture allows these computations to be combined, enabling rich new applications that intermix, for example, streaming and batch processing. We achieve these results through a simple extension to MapReduce that adds primitives for data sharing, called Resilient Distributed Datasets (RDDs). We show that this is enough to capture a wide range of workloads. We implement RDDs in the open source Spark system, which we evaluate using synthetic and real workloads. Spark matches or exceeds the performance of specialized systems in many domains, while offering stronger fault tolerance properties and allowing these workloads to be combined. Finally, we

examine the generality of RDDs from both a theoretical modeling perspective and a systems perspective. This version of the dissertation makes corrections throughout the text and adds a new section on the evolution of Apache Spark in industry since 2014. In addition, editing, formatting, and links for the references have been added.

The Classroom Arsenal Douglas D. Noble,2017-09-29 A quarter of a century after its initial publication, *The Classroom Arsenal* remains pivotal in understanding and challenging the relentless promotion of technology to reform education. This seemingly benign education technology juggernaut carries forward the momentum of military agendas in man-machine systems detailed in the book. Promoters continue to flood schools with technology and its (still unfulfilled) promise of cutting edge, personalized learning. Meanwhile, they continue as well their insatiable pursuit of federal funding, educational legitimacy, corporate profits, and access to student subjects and their accumulated learning data for product development.? Less understood, though, is a companion enterprise, there

from the start, to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high-performance systems, from weapons systems to high tech corporations. As education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself, the goal of this human engineering project, the depersonalized accumulation of cognitive components for a 21st century militarized economy, best befits the book's original title: The Human Arsenal. This ongoing military/corporate-sponsored enterprise continues to impact education today, largely unnoticed. One example is the federally-funded Advanced Distributed Learning Initiative (ADL), which has been a major force behind the implementation of electronic learning systems, now used in all Defense Department and federal employee training. With the Defense Advanced Research Project Agency (ARPA) ADL is developing structures to capture students' soft skills, and the Army Research Laboratory is developing intelligent tutoring systems to enable instructional management of affect, engagement, and grit (perseverance). ADL through the Department of Defense has developed Experience API, a learning technology that

can monitor all student online and offline interactions and archive these in data lockers or learning record stores. ADL has already impacted thousands of school districts through nonprofits such as IMS Global and Future Ready Schools, part of an industry massively subsidized by high tech corporations and valued at \$255 billion annually. A \$90 million Advanced Research Projects Agency for Education (ARPA-ED), modeled after the military's ARPA, has been proposed to fund dramatic breakthroughs in learning and teaching. These include digital tutors as effective as personal tutors and, with the Navy's Full Spectrum Learning project, data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences. ADL is just one example of how the military/corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized, data-driven, automated, and monitored. Its promoters envision education as children interacting with online learning systems where, based on past performance, algorithms will serve up what each student needs to know next. Through this digital curriculum, students create virtual educational identities at very young ages and learning devices are watching

students as much as students are watching them. Such is the education landscape presaged by The Classroom Arsenal a quarter century ago, whose origins and trajectories need to be deeply understood now more than ever.

Burying Uncertainty K. S. Shrader-Frechette,1993-12-03 Shrader-Frechette looks at current U.S. government policy regarding the nation's high-level radioactive waste both scientifically and ethically. What should be done with our nation's high-level radioactive waste, which will remain hazardous for thousands of years? This is one of the most pressing problems faced by the nuclear power industry, and current U.S. government policy is to bury radwastes in specially designed deep repositories. K. S. Shrader-Frechette argues that this policy is profoundly misguided on both scientific and ethical grounds. Scientifically—because we cannot trust the precision of 10,000-year predictions that promise

containment of the waste. Ethically—because geological disposal ignores the rights of present and future generations to equal treatment, due process, and free informed consent. Shrader-Frechette focuses her argument on the world's first proposed high-level radioactive waste facility at Yucca Mountain, Nevada. Analyzing a mass of technical literature, she demonstrates the weaknesses in the professional risk-assessors' arguments that claim the site is sufficiently safe for such a plan. We should postpone the question of geological disposal for at least a century and use monitored, retrievable, above-ground storage of the waste until then. Her message regarding radwaste is clear: what you can't see can hurt you.

Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a

collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Judd Hoos free PDF files of magazines, brochures, and catalogs, Issuu

is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF

downloads on a specific topic. While downloading Judd Hoos free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Judd Hoos. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for

everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Judd Hoos any PDF files. With these platforms, the world of PDF downloads is just a click away.
