**Gone Pro: North Carolina** Tim W., 2014-02-17 *Gone Pro: North Carolina* provides a comprehensive look at the University of North Carolina athletes who made it to the top of their professions. The book includes all the big names from recent generations: sports superstars such as Vince Carter, Mia Hamm, Michael Jordan, B. J. Surhoff, and Lawrence Taylor. It also looks at some who were never as well known, such as Charlie Choo Choo Justice, and some who were widely recognized a generation ago, but whose stars have faded over the years. Exploring athletes' places in Carolina history, *Gone Pro* also examines their professional careers and how they fared at the highest levels of their sports. This rich history will make North Carolina residents and UNC alumni beam with pride at the amazing number of professionals who hail from the state's flagship school.

*Classic Home Video Games, 1972–1984* Brett Weiss, 2011-12-20 This reference work provides a comprehensive guide to popular and obscure video games of the 1970s and early 1980s, covering virtually every official United States release for programmable home game consoles of the pre-Nintendo NES era. Included are the following systems: Adventure Vision, APF MP1000, Arcadia 2001, Astrocade, Atari 2600, Atari 5200, Atari 7800, ColecoVision, Fairchild Channel F, Intellivision, Microvision, Odyssey, Odyssey2, RCA Studio II, Telstar Arcade, and Vectrex. Organized alphabetically by console brand, each chapter includes a history and description of the game system, followed by substantive entries for every

game released for that console, regardless of when the game was produced. Each video game entry includes publisher/developer information and the release year, along with a detailed description and, frequently, the author's critique. An appendix lists "homebrew" titles that have been created by fans and amateur programmers and are available for download or purchase. Includes glossary, bibliography and index.

**How to Dunk Like a Pro** Jason Wilhelm,2017-10-09  
Take Your Dunking Ability to a New Level! If your one of the many people who struggle to reach the rim and dunk over their opponents, don't get disheartened because what many don't realize is that dunking a basketball requires more than on court skill alone. And it is certainly not determined by either your height or your age. In fact, our ability to dunk is dictated by our muscle strength, muscle power, and our vertical jump performance. Which in itself is an extremely positive thing, because these factors are not necessarily inherited, nor are they determined at birth. Rather, each of these factors can be trained independently in the gym and on the court, allowing us to improve our vertical jump height, ensuring we can dunk with ease irrespective of either our age or our height! In the following book you will find: Successfully implemented

methods of strength training that will build the foundation for your dunking ability Power training methods to improve your muscular power Jump training methods to rapidly increase your vertical jump and dunking capacity Information pertaining to jump technique and dunking performance that have been honed through decades of work Dietary information to ensure you get the most out of your training What can you expect from this book? This book is essentially the written culmination of my many years working with basketball athletes. The results of this learning experience, and the processes I have used extensively to maximize athletic performance are summarized in this book, ready for you to apply immediately into your own training. Now I must admit that this book isn't going to do the work for you, nor is it some sort of quick fix. Because let's face it, when it comes to anything worthwhile, a quick fix doesn't exist. But what this book will give you is the information integral to improving vertical jump height and dunking ability. With this in mind, I have not only outlined in depth why each of these physical qualities are important, but also what training methods are best to improve them. This has further been summarized in a thorough 8 week training program involving strength training methods, power training methods, and jump performance training techniques that will lead you to a massive vertical jump, and some crazy dunking ability. Now don't get me wrong, this program won't be easy but it will be worth it. Through a combination of hard work, dedication, and some well established AND scientifically proven

training methods, you can see some huge improvement in your performance. While I can provide the HOW, you need to provide the DO, so don't keep waiting become an absolute beast on the court and take the first step to improving your dunking ability today! Order this book for just \$9.99!

In Jump Attack, Grover shares the revolutionary program he uses to train the pros. A fitness bible for athletes around the world, this three-phase, twelve-week program has been completely updated with new exercises and workouts as well as cutting-edge information on training, nutrition, longevity, injury prevention, and more. Devised for explosive power, quickness, endurance, and agility, this intensely challenging workout pushes athletes out of their comfort zones, tests their capacity to go harder, and turns "I can't" into "Just try and stop me." You don't have to be an elite athlete to benefit from Grover's program—but you can attain the mindset of a champion through the physical program outlined in this complete

plan. Says Grover: "This is how my pros do it. If you want to become more explosive, stronger, and faster, if you want to jump higher and improve your overall athletic performance in any sport, this is exactly how we do it today: This program is the difference between jumping and taking flight."

**See Spot Run** Kirsten Cole-MacMurray, Stephanie Nishimoto, 2011-01-19 Do you want your dog to be more active, and to run, jump, hike, and play alongside you when you exercise? Getting active begins way before you start training your dog on equipment or on agility courses. You must ramp up your daily activity, interactions, and overall health of the dog and the trainer—you! From their experiences as puppies to what they eat at every stage of their lives to what they do when they're not in training mode, your dog's lifestyle matters. Your canine companion's performance depends a lot on how they view you as their leader; how much impulse control they have, how much focus, and how they channel their energy to the job at hand. **See Spot Run** teaches you the basics of canine/owner fitness, including nutrition, getting to know fitness equipment, building a weekly program...and how to stick with the program, and more. Then, the book dives into the instructions for more than 100 sports, games, and activities, teaching you the rules and skills, how to set a training schedule, how to dive in and get your paws wet, and beyond.
