Border Jumping and Migration Control in Southern Africa

Francis Musoni, 2020-04-07 With the end of apartheid rule in South Africa and the ongoing economic crisis in Zimbabwe, the border between these Southern African countries has become one of the busiest inland ports of entry in the world. As border crossers wait for clearance, crime, violence, and illegal entries have become rampant. Francis Musoni observes that border jumping has become a way of life for many of those who live on both sides of the Limpopo River and he explores the reasons for this, including searches for better paying jobs and access to food and clothing at affordable prices. Musoni sets these actions into a framework of illegality. He considers how countries have failed to secure their borders, why passports are denied to travelers, and how border jumping has become a phenomenon with a long history, especially in Africa. Musoni emphasizes cross-border travelers' active participation in the making of this history and how clandestine mobility has presented opportunity and creative possibilities for those who are willing to take the risk.

Sailing with Noah Jeffrey P. Bonner, 2013-06-03

Written by the president of the nation's number-one zoo, *Sailing with Noah* is an intensely personal, behind-the-scenes look at modern zoos. Jeffrey P. Bonner, who was trained as an anthropologist and came to the zoo world quite by accident, shares some of the most compelling stories ever told about contemporary zoos. The stories jump between zoos in different cities and between countries on different continents. Some are fun and funny. Others are sad, even tragic. Pete Hoskins, the director of the Philadelphia Zoo, is in bed, sound asleep, when his phone rings. . . . "There's been a fire in the World of Primates," he is told. "You've got to get over here." Whatever he has been dreaming, it is nothing like the nightmare he will find now that he is awake. . . . "They're all gone. They're all gone." All of the animals in the building—the gorillas, the lemurs, the orangutans, and the gibbons—all twenty-three of them are dead. Written in a lively, accessible style, *Sailing with Noah* explores the role of zoos in today's society and their future as institutions of education, conservation, and research. Along the way, Bonner relates a variety of true stories about animals and those who care for them (or abuse them), offering his perspective on heavily publicized incidents and describing less-well-known events with compassion and humor in turn. By bringing the stories of the animals' lives before us, Bonner gives them a voice. He strongly believes that zoos must act for living things, and he argues that conservation is a shared responsibility of all

mankind. This book helps us to understand why biodiversity is important and what it means to be a steward of life on earth. From the day-to-day aspects of caring for some of the world's most exotic creatures to the role of zoos as field conservation organizations, saving wild things in wild places, this book takes the reader on an incredible journey—a journey that begins within the zoo and continues around the globe. Everyone—from zoo visitors to animal lovers to professional conservationists, the young and old alike—will be fascinated by this extraordinary book.

Valia Allori, Angelo Bassi, Detlef Dürr, Nino Zanghi, 2020-10-02 This book is a tribute to the scientific legacy of GianCarlo Ghirardi, who was one of the most influential scientists in the field of modern foundations of quantum theory. prospects for future research in the foundations of quantum physics. The themes of the contributions revolve around the physical reality of the wave function and its notorious collapse, randomness, relativity and experiments.
