Hoyle's Games Modernized - Cards - Board Games and Billiards Lawrence H. Dawson, 2013-04-16 Originally published in London in the 1920s as a revised and enlarged edition based on Hoyle's early works of the 1700s. The book is an illustrated compendium of over eighty games and their varieties including card, billiard and board games. These are fully explained with rules and advice on play. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Home Farm Books are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Rheology and Elastohydrodynamic Lubrication B.O. Jacobson, 1991-07-24 This book gives a thorough overview on recent developments in lubricant rheology, elastohydrodynamic lubrication and the effects of surface roughness and particulate contamination in the lubricant on the overall behaviour of a heavily loaded lubricated contact. One of the aims of the book is to make clear to the reader that a Newtonian model for the lubricant behaviour does not have enough degrees of freedom to be able to describe the friction - traction behaviour of heavily loaded lubricated contacts or the oil film build-up and collapse under surface asperities for rough surfaces. The book contains quite a lot of experimental data of lubricants at high pressures, both solidification pressures, compressibilities and

shear strength increase coefficients, which make it possible to estimate the friction and power loss in heavily loaded lubricated contacts for different pressures, temperatures, sliding speeds, and lubricant types. This is the first time that data of this type has been included in a textbook and it is hoped that the questions highlighted will serve to initiate and guide future research in this field.

Working with Children's Language Diana Williams,2021-09-28 This revised and updated second edition of Working with Children's Language has been created to support practitioners who work with young children with delayed language acquisition. Rooted in a developmental theory of language learning, it covers topics such as attention control and listening, the role of play, verbal comprehension and the acquisition of spoken expressive language. Each chapter offers a straightforward overview of current research relating to the specific language skill before introducing a wealth of targeted games and activities that can help support the development of those skills. Key features include: • A structured approach to language learning that can be followed as a programme or adapted for informal use by individual practitioners. • Accessible activities, games and ideas suitable for small group or individual intervention, linked to specific aims based on developmental norms. • Photocopiable and downloadable resources, including a record sheet to track progress in each skill against aims and outcomes for individual children. Clearly linking theory and practice in an engaging and easy-to-follow format, this is an invaluable resource to support children in early years settings and Key Stage 1 whose language is delayed, but who are otherwise developing normally. It is a must-have book for early years practitioners, teachers, SEND professionals and speech and language therapists with varying levels of experience.

Sport, Revolution and the Beijing Olympics Grant Jarvie,Dong-Jhy Hwang,Mel

Brennan,2008-04-01 The 2008 Olympic Games will be held in Beijing but many human rights activists support a boycott. They liken the circumstances to previous governments that used the games to glorify their regimes - most notoriously the Nazis in 1936. What has led to this perception and is it fair? Sport, Revolution and the Beijing Olympics is a cultural history of sport in China and challenges many such ingrained Western assumptions. The authors unpick the relationship of sport to imperialism and revolution, and examine its significance in both China and Taiwan at governmental and everyday levels. In the process, they successfully debunk harmful myths, such as the prevalence of drugs in Chinese sport among women athletes, and present a balanced view that is a much-needed corrective to popular understanding.

Warm Hearts and Cold Noses Ernie Smith,1987 Making the family dog your family's best friend is the premise of Ernie Smith's book. Practical solutions are given for the many problems dogs and their owners face. Feeding, housebreaking and leash training are some of the subjects covered in detail. There are also chapters on health, temperament, heredity and environment. The author has made a specialty of training family dogs and has trained dogs for movies and television. Many illustrations and an index are included.
