The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Defeat Is the Only Bad News Alison Des Forges,2011-05-17 A Rwandan proverb says “Defeat is the only bad news.” For Rwandans living under colonial rule, winning called not only for armed confrontation, but also for a battle of wits—and not only with foreigners, but also with each other. In *Defeat Is the Only Bad News* Alison Des Forges recounts the ambitions, strategies, and intrigues of an African royal court under Yuhi Musinga, the Rwandan ruler from 1896 to 1931. These were turbulent years for Rwanda, when first Germany and then Belgium pursued an aggressive plan of colonization there. At the time of the Europeans’ arrival, Rwanda was also engaged in a succession dispute after the death of one of its most famous kings. Against this backdrop, the Rwandan court became the stage for a drama of Shakespearean proportions, filled with deceit, shrewd calculation, ruthless betrayal, and sometimes murder. Historians who study European expansion typically focus on interactions between colonizers and colonized; they rarely attend to relations among the different factions inhabiting occupied lands. Des Forges, drawing on oral histories and extensive archival research, reveals how divisions among different groups in Rwanda shaped their responses to colonial governments, missionaries, and traders. Rwandans, she shows, used European resources to extend their power, even as they sought to preserve the autonomy of the royal court. Europeans, for their part, seized on internal divisions to advance their own goals. Des Forges’s vividly narrated history, meticulously edited and introduced by David Newbury, provides a deep context for understanding the Rwandan civil war a century later.

Studies in Language and Social Interaction Jennifer Mandelbaum,2003-01-30 This collection offers empirical studies and theoretical essays about human communication in everyday life. The writings come from many of the world's leading researchers and cut across academic boundaries, engaging scholars and teachers from such disciplines as communication, sociology, anthropology, linguistics, and education. Chapters emphasize empirical, qualitative studies of people's everyday uses of talk-in-interaction, and they feature work in such areas as sociolinguistics, conversation analysis, discourse analysis, and ethnography. The volume is dedicated to and highlights themes in the work of the late Robert Hopper, an outstanding scholar in communication who pioneered research in Language and Social Interaction (LSI). The contributors examine various features of human interaction (such as laughter, vocal repetition, and hand gestures) occurring naturally within a variety of settings (at a dinner table, a doctor's office, an automotive repair shop, and so forth), whereby interlocutors accomplish aspects of their interpersonal or institutional lives (resolve a disagreement, report bad medical news, negotiate a raise, and more), all of which may relate to larger social issues (including police brutality, human spirituality, death, and optimism). The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day through small and subtle ways of communicating, carefully orchestrated but commonly taken for granted. In showcasing the diversity of contemporary LSI research, this volume is appropriate for scholars and graduate students in language and social interaction, communication, sociology, research methods, qualitative research methods, discourse analysis, conversation analysis, linguistics, and related areas.

Emergency Stanley Stewart,2012-05-01 *Emergency* is a collection of true stories about events where disaster seems imminent. Yet each situation is concluded without loss of life thanks to the skill of the pilots and their crews, whose bravery and resourcefulness have earned them well-deserved commendations. Written by a British Airways First Officer, Stanley Stewart, who has spoken at first hand with the pilots and crews involved in all the incidents recorded here, the book offers a unique insight into what really happened: not the passengers eye-view, which in many cases is already documented, but the view from the flight deck of the aircraft itself.

Common Knowledge W. Russell Neuman,Marion R. Just,Ann N. Crigler,2018-12-14 Photo opportunities, ten-second sound bites, talking heads and celebrity anchors: so the world is explained daily to millions of Americans. The result, according to the experts, is an ignorant public, helpless targets of a one-way flow of carefully filtered and orchestrated communication. *Common Knowledge* shatters this pervasive myth. Reporting on a ground-breaking study, the authors reveal that our shared knowledge and evolving political beliefs are determined largely by how we actively reinterpret the images, fragments, and signals we find in the mass media. For their study, the authors analyzed coverage of 150 television and newspaper stories on five prominent issues—drugs, AIDS, South African apartheid, the Strategic Defense Initiative, and the stock market crash of October 1987. They tested audience responses of more than 1,600 people, and conducted in-depth interviews with a select sample. What emerges is

a surprisingly complex picture of people actively and critically interpreting the news, making sense of even the most abstract issues in terms of their own lives, and finding political meaning in a sophisticated interplay of message, medium, and firsthand experience. At every turn, Common Knowledge refutes conventional wisdom. It shows that television is far more effective at raising the saliency of issues and promoting learning than is generally assumed; it also undermines the assumed causal connection between newspaper reading and higher levels of political knowledge. Finally, this book gives a deeply responsible and thoroughly fascinating account of how the news is conveyed to us, and how we in turn convey it to others, making meaning of at once so much and so little. For anyone who makes the news—or tries to make anything of it—Common Knowledge promises uncommon wisdom.

Lemons Into Lemonade H. Michelle Mitchell,2016-11-19 #SurviveTrump #ThriveAnyway Donald Trump got elected much to the surprise and dismay of about 2/3 of the American People-but that is now history. What we need now is a plan to get through a Trump presidency. There are ways-good ways-to not only cope with this reality, but to also thrive in spite of it. Lemonade is made from lemons. With your own creativity thrown in, as the sugar, we can crush this current reality and make something sweet and refreshing. Dedicated to everyone who was surprised by the outcome of the 2016 US Presidential election. Like you, I was surprised and reasonably devastated by the election results of the 2016 Presidential election. I thought that the polls were right, that Hillary had it in the bag and the media only was reporting that Donald was 'close' as a ruse to keep us interested. I didn't think in a million years he'd be elected. But - I was wrong... I think there were two major things to blame, maybe more, but two big culprits here. One, we believed the polls. The Hillary supporters were lulled into a false sense of security. Maybe they didn't bother to go out and vote. Maybe not her 'supporters' per-se, because the people who were passionate about her becoming president surely did go out and vote, but others who would have preferred her over 'The Donald', but maybe weren't 'passionate' about it thought that it would be just fine and didn't vote. Two, I think that the Millennials were so disenfranchised after the mistreatment of Bernie Sanders that they chose to sit this one out. Again, all the Millennials I know voted, but if you look at the map of who they said they were going to vote for and consider the numbers they should have had in this election, Hillary should have won by a landslide. But the next generation of voters are a different breed. Once you piss them off or lose their trust, you don't get them back, not easily anyway. So I think they sat this one out because they were disillusioned by what happened just before the Democratic National convention and the controversy over how Bernie was treated. Those are just my theories. I know there are a million more, like the way news is reported through the political points of view. When I grew up, I didn't know or care what Walter Cronkite's political point of view was. We just trusted him to report the news without putting a spin on it. Maybe I was naive, but that is how I remember it. Nowadays, I instantly know the political view points of almost anyone I listen to because the ideologies are so polarized. Just to get this out of the way, I'm remaining anonymous in this book because of the other book I wrote about family dynamics and because I want to practice what I'm going to expound upon in this book and not be distracted by any type of personal attention this book might attract. I'm also not registered with either party. I'm an independent because I want to think for myself and not be labeled by some ideology that I may or may not agree with due to the ever-changing political landscape. It feels to me a bit like the altered future from Back to the Future where Biff got the sports results and got really rich and powerful. I am hoping that Doc aka Bernie, finds a way to fix everything and we wake up back on the original timeline with President Sanders about to take office. But alas... right now... we are on this timeline! I would also like to say that this book is intended for those people who did not vote for Trump, those shocked by the election result and those afraid of what it might mean for this country. If you voted for Trump, his win is not an endorsement of any bigoted position you may hold. There is no room for bigotry in this country. Our country was founded on and made strong because people came here from all over the map. I hope this helps!
