Startup CXO Matt Blumberg, 2021-06-09 One of the greatest challenges for startup teams is scaling because usually there's not a blueprint to follow, people are learning their function as they go, and everyone is wearing multiple hats. There can be lots of trial and error, lots of missteps, and lots of valuable time and money squandered as companies scale. Matt Blumberg and his team understand the scaling challenges—they've been there, and it took them nearly 20 years to scale and achieve a successful exit. Along the way they learned what worked and what didn't work, and they share their lessons learned in *Startup CXO*. Unlike other business books, *Startup CXO* is designed to help each functional leader understand how their function scales, what to anticipate as they scale, and what things to avoid. Beyond providing function-specific advice, tools, and tactics, *Startup CXO* is a resource for each team member to learn about the other functions, understand other functional challenges, and get greater clarity on how to collaborate effectively with the other functional leads. CEOs, Board members, and investors have a book they can consult to pinpoint areas of weakness and learn how to turn those into strengths. *Startup CXO* has in-depth chapters covering the nine most common functions in startups: finance, people, marketing, sales, customers, business development, product, operations, and privacy. Each functional section has a CEO to CEO Advice

summary from Blumberg on what great looks like for that CXO, signs your CXO isn't scaling, and how to engage with your CXO. Startup CXO also has a section on the future of executive work, fractional and interim roles. Written by leading practitioners in the newly emergent fractional executive world, each function is covered with useful tips on how to be a successful fractional executive as well as what to look for and how to manage fractional executives. Startup CXO is an amazing resource for CEOs but also for functional leaders and professionals at any stage of their career. —Scott Dorsey, Managing Partner, High Alpha

DARE to Say No Max Felker-Kantor, 2024-02-14 With its signature DARE to keep kids off drugs slogan and iconic t-shirts, DARE (Drug Abuse Resistance Education) was the most popular drug education program of the 1980s and 1990s. But behind the cultural phenomenon is the story of how DARE and other antidrug education programs brought the War on Drugs into schools and ensured that the velvet glove of antidrug education would be backed by the iron fist of rigorous policing and harsh sentencing. Max Felker-Kantor has assembled the first history of DARE, which began in Los Angeles in 1983 as a joint venture between the police department and the unified school district. By the mid-90s, it was taught in 75 percent of school districts across the United States. DARE received near-universal praise from parents, educators, police officers, and politicians and left an indelible stamp on many millennial memories. But the program had more nefarious ends, and Felker-Kantor complicates simplistic narratives of the War on Drugs. He shows how policing entered US schools and framed drug use as the result of personal responsibility, moral failure, and poor behavior deserving of punishment rather than something deeply rooted in state retrenchment, the abandonment of social service provisions, and structures of social and economic inequality.

The description is based on material collected in the field from speakers of different age-groups in the five Unua villages. The data corpus includes a substantial body of material: contemporary translations of the New Testament gospels; audio-recorded transcribed and glossed texts; and elicited material collected with a range of speakers. The analysis includes comparisons with other Malakula languages and is both of typological and historical-comparative interest. The data documentation is substantial and detailed.

Multi-verb constructions in Eastern Indonesia Volker Unterladstetter , Constructions with multiple verbal elements have posed a long-standing challenge to linguistic analysis. Most studies of verb serialisation have been confined to single languages rather than looking at crosslinguistic patterns. This book provides the first in-depth account into the areal characteristics of multi-verb constructions (MVCs) in Eastern Indonesia. By collating published data as well as corpus data from 32 Austronesian and Papuan languages, the study traces commonalities as well as differences in MVC use across the area. Analysis takes place on two levels: first, the morpho-syntactic behaviour of MVCs is taken into account. As this plane of analysis arguably does not provide any meaningful insights into why MVCs are construed and used the way they are, a semantic account of MVCs is presented. One of the main hypotheses advanced in this book is that the crucial driving force behind multi-verb construals is semantic interaction between the verbs, leading to four principal techniques of event formation: merging, staging, modification, and free juxtaposition. The study aims at showing that while all four techniques are, to varying degrees, in use in Eastern Indonesian languages, the morpho-syntactic output does not necessarily mirror these underlying differences in event conception. Applying insights from Davidsonian event semantics as well as from predicate decomposition, the book provides a model of event interaction that helps to explain differences in MVC behaviour such as issues in constituent order or operator assignment.
