**What You Don't Know about Leadership, But Probably Should** Jeffrey A. Kottler,2018 We live in a world of groups. Almost every facet of daily existence, whether sitting in meetings, collaborating with coworkers, attending classes or programs, contributing to community or social events, participating in family gatherings, even enjoying coffee or meals with friends, takes place in group contexts. In addition, everyone finds themselves in leadership positions at one time or another, responsible for the welfare of others. It is curious, but nevertheless commonplace, that counselors, therapists, teachers, business leaders, executives, coaches, and other helping professionals, who have been specifically trained in group leadership, often fail to apply their knowledge and skills to settings in which they might matter most. The same practitioners who guide others may not be able-or willing-to put that background to work when they find themselves supervising peers, leading meetings, or even managing conflict at the dinner table. Many, if not most, people experience required meetings and mandated group collaborations as tedious, repetitive, and often a waste of time that could be spent doing other things that feel far more productive--

**Kinethic California** Naomi Macalalad Bragin, 2024-05-13 *Kinethic California: Dancing Funk and Disco Era Kinships* documents the emergence of new forms of black social and vernacular dance invented by youth living in 1970s California, who helped build the foundations of contemporary hip hop/streetdance culture. Naomi Macalalad Bragin weaves interviews and ethnographies of first-generation (1960s-70s) dancers of strutting, boogaloo, robotting, popping, locking, waacking, and punking styles, as it advances a theory of dance as kinetic kinship formation through a focus on techniques and practices of the dancers themselves. She offers that the term given to these collective movement practices is kinethic to bring attention to motion at the core of black aesthetics that generate dances as forms of kinship beyond blood relation. Kinethics reorient dancers toward kinetic kinship in ways that give continuity to black dance lineages under persistent conditions of disappearance and loss. As dancers engage kinethics, they reinvent gestural vocabularies that describe worlds they imagine into knowing-being. The stories in *Kinethic California* attend to the aesthetics of everyday movement, seen through the lens of young artists who, from childhood, listened to their family's soul and funk records, observed the bent-leg strolls

and rhythmic handshakes of people moving through their neighborhoods, and watched each other move at house parties, school gyms, and around-the-way social clubs. Their aesthetic sociality and geographic movement provided materials for collective study and creative play. Bragin attends to such multidirectional conversations between dancer, community, and tradition, by which California dance lineages emerge and take flight.
