Kailah and Lyndsey Alice F. Belton-Terrell,2013-09-17 The girl will continue sharing spaces for now; however, they both learn that one day they will have separate rooms but it won't affect their friendship. Kailah learned that it is great to have friends. You have so much fun playing, laughing and sharing secrets; she also learned that her very best friend is her Sister! Lyndsey learned that Kailah will always be her best friend, but sometimes they both need their own space and spend time with other friends to expand their world.

My Journey to Saturn Ne'Kailah Danielle Harrison,2013-09-30 Reggie's imagination gave him the opportunity to expand his world beyond the back yard. Books open up a world of knowledge and increase a child's curiosity. Reading helps Reggie explore lands, kids and activities that exist beyond his imagination. Mommy reads to Reggie daily, he also reads on his own because there are places he wants to go all by himself, like to Saturn with his imaginary friend Icon. Reggie, Pepper and Icon want to encourage you to read to a child, because all children want to discover places and people that seem to only exist in their imagination. Learning that there are people in this world that do not look like you, speak the same language as you even dress differently than you; this helps us embrace those different, and we learn to love and respect each other no matter who we are or where we live.

Expanding Underrepresented Minority Participation Institute of Medicine,National Academy of Engineering,National Academy of Sciences,Policy and Global Affairs,Committee on Science, Engineering, and Public Policy,Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline,2011-07-29 In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. *Expanding Underrepresented Minority Participation* explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are

underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding Underrepresented Minority Participation* suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

Zoopoetics Aaron M. Moe, 2013-12-19 *Zoopoetics* assumes Aristotle was right. The general origin of poetry resides, in part, in the instinct to imitate. But it is an innovative imitation. An exploration of the oeuvres of Walt Whitman, E. E. Cummings, W. S. Merwin, and Brenda Hillman reveals the many places where an imitation of another species' poiesis (Greek, makings) contributes to breakthroughs in poetic form. However, humans are not the only imitators in the animal kingdom. Other species, too, achieve breakthroughs in their makings through an attentiveness to the ways-of-being of other animals. For this reason, mimic octopi, elephants, beluga whales, and many other species join the exploration of what zoopoetics encompasses. Zoopoetics provides further traction for people interested in the possibilities when and where species meet. Gestures are paramount to zoopoetics. Through the interplay of gestures, the human/animal/textual spheres merge making it possible to recognize how actual, biological animals impact the material makings of poetry. Moreover, as many species are makers, zoopoetics expands the poetic tradition to include nonhuman poiesis.

The Bold World Jodie Patterson, 2020-02-11 Inspired by her transgender son, activist Jodie Patterson explores identity, gender, race, and authenticity to tell the real-life story of a family's history and transformation. "A courageous and poetic testimony on family and the self, and the learning and unlearning we must do for those we love."—Janet Mock In 2009, Jodie Patterson, mother of five and beauty entrepreneur, has her world turned upside down when her determined toddler, Penelope, reveals, "Mama, I'm not a girl. I am a boy." The Pattersons are a tribe of unapologetic Black matriarchs, scholars, financiers, Southern activists, artists, musicians, and disruptors, but with Penelope's revelation, Jodie realizes her existing definition of family isn't wide enough for her child's needs. In *The Bold World*, we witness Patterson reshaping her own attitudes, beliefs, and biases, learning from her children, and a whole new community, how to meet the needs of her transgender son. In doing so, she opens the minds of those who raised and fortified her, all the while challenging cultural norms and gender expectations. Patterson finds that the fight for racial equality in which her ancestors were so prominent helped pave the way for the current gender revolution. From Georgia to South Carolina, Ghana to Brooklyn, Patterson learns to remove the division between me and you, us and them, straight and queer—and she reminds us to celebrate her uncle Gil Scott Heron's prophecy that the revolution will not be televised. It will happen deeply, unequivocally, inside each and every one of us. Transition, we learn, doesn't just belong to the transgender person. Transition, for the sake of knowing more and becoming more, is the responsibility of and gift to all. *The Bold World* is the result, an intimate and exquisite story of authenticity, courage, and love. Praise for *The Bold World* "In *The Bold World*, Jodie Patterson makes a case for respecting everyone's gender identity by way of showing how she came to accept her son, Penelope. In tying that struggle to the struggle for race rights in this country during her own childhood, she paints a vivid picture of the permanent work of social justice."—Andrew Solomon, bestselling author of *The*

Lifewave Steven Haltiwanger, David Schmidt, 2019-09-12 Imagine a product that can activate your stem cells, resetting them to a younger, healthier state. This would represent a whole new level of vitality with improvements to your energy, sleep, reduction in pain, reduction in the appearance of lines and wrinkles and support of faster wound healing, just to name a few of the benefits. Introducing the LifeWave X39 patch: The first product ever that is designed to activate your body's own stem cells. How does X39 accomplish this? Using our proprietary and patented form of phototherapy, X39 elevates the peptide GHK- Cu. This is a naturally occurring peptide in your body that declines significantly with age. In fact, after the age of 60 your levels of GHK-Cu have dropped by more than 60%.

Tell Us a Story Shirley Motley Portwood, 2000 Supplemented by recollections from the present era, *Tell Us a Story* is a colorful mosaic of African American autobiography and family history set in Springfield, Illinois, and in rural southern Illinois, Missouri, and Arkansas from the 1920s through the 1950s. Shirley Motley Portwood shares rural, African American family and community history through a collection of vignettes about the Motley family. Initially transcribed accounts of the Motleys' rich oral history, these stories have been passed among family members for nearly fifty years. In addition to her personal memories, Portwood presents interviews with her father, three brothers, and two sisters plus notes and recollections from their annual family reunions. The result is a composite view of the Motley family. A historian, Portwood enhances the Motley family story by investigating primary data such as census, marriage, school, and land records, newspaper accounts, city directories, and other sources. The backbone of this saga, however, is oral history gathered from five generations, extending back to Portwood's grandparents, born more than one hundred years ago. Information regarding two earlier generations--her great-grandfather and great-great-grandparents, who were slaves--is based on historical research into state archives, county and local records, plantation records, and manuscript censuses. A rich source for this material--the Motley family reunions--are week-long retreats where four generations gather at the John Motley house in Burlington, Connecticut, the Portwood home in Godfrey, Illinois, or other locations. Here the Motleys, all natural storytellers, pass on the family traditions. The stories, ranging from humorous to poignant, reveal much about the culture and history of African Americans, especially those from nonurban areas. Like many rural African Americans, the Motleys have a rich and often joyful family history with traditions reaching back to the slave past. They have known the harsh poverty that made even the necessities difficult to obtain and the racial prejudice that divided whites and blacks during the era of Jim Crow segregation and inequality; yet they have kept a tremendous faith in self-improvement through hard work and education.

On the Sidelines Guy Harrison (College teacher), 2021-08 2022 Outstanding Book Award in the Communication and Sport Division from the National Communication Association When sports fans turn on the television or radio today, they undoubtedly find more women on the air than ever before. Nevertheless, women sportscasters are still subjected to gendered and racialized mistreatment in the workplace and online and are largely confined to anchor and sideline reporter positions in coverage of high-profile men's sports. In *On the Sidelines* Guy Harrison weaves in-depth interviews with women sportscasters, focus groups with sports fans, and a collection of media products to argue that gendered neoliberalism--a cluster of exclusionary twenty-first-century feminisms--maintains this status quo. Spinning a cohesive narrative, Harrison shows how sportscasting's dependence on gendered neoliberalism broadly places the onus on women for their own success despite systemic sexism and racism. As a result, women in the industry are

left to their own devices to navigate double standards, bias in hiring and development for certain on-air positions, harassment, and emotional labor. Through the lens of gendered neoliberalism, *On the Sidelines* examines each of these challenges and analyzes how they have been reshaped and maintained to construct a narrow portrait of the ideal neoliberal female sportscaster. Consequently, these challenges are taken for granted as natural, sustaining women's marginalization in the sportscasting industry.

The Next Big Story Soledad O'Brien, Rose Marie Arce, 2010-11-02 From top CNN anchor and special correspondent Soledad O'Brien comes a highly personal look at her biggest reporting moments from Hurricane Katrina, the tsunami in Southeast Asia, the devastating Haiti earthquake, and to the historic 2008 U.S. elections and high profile interviews with everyday Americans. Drawing on her own unique background as well as her experiences at the front lines of the most provocative issues in today's society, and from her work on the acclaimed documentaries *Black in America* and *Latino in America*, O'Brien offers her candid, clear-eyed take on where we are as a country and where we're going. What emerges is both an inspiring message of hope and a glimpse into the heart and soul of one of America's most straight-talking reporters.

The Black Man's Burden William Henry Holtzclaw, 1915

The World According to Fannie Davis Bridgett M. Davis, 2019-01-29 As seen on the Today Show: This true story of an unforgettable mother, her devoted daughter, and their life in the Detroit numbers of the 1960s and 1970s highlights the outstanding humanity of black America (James McBride). In 1958, the very same year that an unknown songwriter named Berry Gordy borrowed \$800 to found Motown Records, a pretty young mother from Nashville, Tennessee, borrowed \$100 from her brother to run a numbers racket out of her home. That woman was Fannie Davis, Bridgett M. Davis's mother. Part bookie, part banker, mother, wife, and granddaughter of slaves, Fannie ran her numbers business for thirty-four years, doing what it took to survive in a legitimate business that just happened to be illegal. She created a loving, joyful home, sent her children to the best schools, bought them the best clothes, mothered them to the highest standard, and when the tragedy of urban life struck, soldiered on with her stated belief: Dying is easy. Living takes guts. A daughter's moving homage to an extraordinary parent, *The World According to Fannie Davis* is also the suspenseful, unforgettable story about the lengths to which a mother will go to make a way out of no way and provide a prosperous life for her family -- and how those sacrifices resonate over time.

Advancing the Science of Climate Change National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, America's Climate Choices: Panel on Advancing the Science of Climate Change, 2011-01-10 Climate change is occurring, is caused largely by human activities, and poses significant risks for--and in many cases is already affecting--a broad range of human and natural systems. The compelling case for these conclusions is provided in *Advancing the Science of Climate Change*, part of a congressionally requested suite of studies known as America's Climate Choices. While noting that there is always more to learn and that the scientific process is never closed, the book shows that hypotheses about climate change are supported by multiple lines of evidence and have stood firm in the face of serious debate and careful evaluation of alternative explanations. As decision makers respond to these risks, the nation's scientific enterprise can contribute through research that improves understanding of the causes and consequences of climate change and also is useful to decision makers at the local, regional, national, and international levels. The book identifies decisions being made in 12 sectors, ranging from agriculture to transportation, to identify decisions being made in response to climate change. *Advancing the Science of Climate Change* calls for a single federal entity or program to coordinate a

national, multidisciplinary research effort aimed at improving both understanding and responses to climate change. Seven cross-cutting research themes are identified to support this scientific enterprise. In addition, leaders of federal climate research should redouble efforts to deploy a comprehensive climate observing system, improve climate models and other analytical tools, invest in human capital, and improve linkages between research and decisions by forming partnerships with action-oriented programs.

The Fiscal Impact of Foreign Aid in Rwanda: a Theoretical and Empirical Analysis. Kene Ezemenari Ephraim Kebede and Sajal Lahiri, 2008 Abstract: The inflow of large quantities of foreign aid into Rwanda since 1994 can have potential adverse effects such as aid dependency via a significant negative effect on tax efforts and on public investments. This paper carries out a theoretical and empirical study to examine these issues. The theoretical part develops a model in which the recipient government decides on the optimal level of tax and optimally allocates total government revenue between current expenditure and public investment. The theoretical model makes it possible to empirically test whether an increase in aid is likely to reduce the optimal tax rate and the proportion of public expenditure allocated to public investment. The econometric analysis uses time series data on Rwanda to show, in line with other studies in the literature, a negative relationship between increased aid and the tax rate; but the magnitude of the effects are extremely small. In the case of Rwanda, reforms to the tax administration and expansion of the tax base have had mitigating effects. As far as the effect on public investment, the overall effect was negative in the past; however, since 1995 the direction of this effect has changed.

The Nacirema Society Requests the Honor of Your Presence at a Celebration of Their First One Hundred Years Pearl Cleage, 2013-12-01 THE STORY: In the winter of 1964, ten years after the Montgomery bus boycott, Dr. Martin Luther King, Jr., is planning a massive voter registration drive that promises to put the city back at the center of the Civil Rights Movement.
