**The Man in the High Castle** Philip K. Dick, 2011 Slavery is back. America, 1962. Having lost a war, America finds itself under Nazi Germany and Japan occupation. A few Jews still live under assumed names. The 'I Ching' is prevalent in San Francisco. Science fiction meets serious ideas in this take on a possible alternate history.

**Crown, Church and Estates** R.J.W. Evans, T.V. Thomas, 1991-11-12 This book deals with a turning-point in European history: the dramatic struggle between the Protestant Reformation and the Catholic Counter-Reformation, and between princely rulers and landed nobles in sixteenth and seventeenth-century central and eastern Europe. It brings together the results of the latest research by leading scholars from North America and Europe and it throws new light on the victory of the Church and the rulers over Protestantism and the nobility which had such profound long-term consequences.

*Registrum* Catholic Church. Pope (1073-1085 : Gregory VII), 1990 -- Robert Somerville, Columbia University

**The Pope's Body** Agostino Paravicini-Bagliani, 2000-07 In contrast to the role traditionally fulfilled by secular rulers, the pope has been perceived as an individual person existing in a body subject to decay and death, yet at the same time a corporeal representation of Christ and the Church, eternity and salvation. Using an array of evidence from the eleventh through the fifteenth centuries, Agostino Paravicini-Bagliani addresses this paradox. He studies the rituals, metaphors, and images of the pope's body as they developed over time and shows how they resulted in the expectation that the pope's body be simultaneously physical and metaphorical. Also included is a particular emphasis on the thirteenth century when, during the pontificate of Boniface VIII (1294-1303), the papal court became the focus of medicine and the natural sciences as physicians devised ways to protect the pope's health and prolong his life. Masterfully translated from the Italian, this engaging history of the pope's body provides a new perspective for readers to understand the papacy, both historically and in our own time.

Lost in Change Svenja Kranich, Tine Breban, 2021-06-15 While research on language change has formulated robust empirical generalisations about processes and motivations underlying the emergence and spread of linguistic elements, their decline and loss is less well understood. So far a systematic investigation into the processes and motivations of decline and loss in language change is lacking. This book is a first step towards remedying this state of affairs. It brings together a varied set of empirical investigations into decline and loss, spanning morphology, syntax and the lexicon, in different languages. Their authors apply diverse methodologies and represent different theoretical approaches. On the basis of this broad span of studies, authors and editors propose generalisations related to decline and loss and assess similarities and differences with processes and motivations of emergence and spread. The book aims to inspire and provide hypotheses for further studies of decline and loss. It will appeal to historical linguists and others interested in language change.

**The Court Book of Mende and the Secular Lordship of the Bishop** Jan K. Bulman, 2008-01-01 In this study, Jan K. Bulman examines the interrelationships between the written records of the ecclesiastical court, the preservation of historical memory, and the defense of episcopal seigneurial rights.

Ramla: City of Muslim Palestine, 715-1917 Andrew Petersen, Denys Pringle, 2021-07-29 This book presents a comprehensive overview of the history, archaeology and architecture of the city of Ramla from the time of its foundation as the capital of Umayyad Palestine around 715 until the end of Ottoman rule in 1917.

Würzburger Abendblatt, 1870

**Learning as Shared Practice in Monastic Communities, 1070-1180** Micol Long, 2021-10-11 In this study, Micol Long looks at Latin letters written in Western Europe between 1070 and 1180 to reconstruct how monks and nuns learned from each other in a continuous, informal and reciprocal way during their daily communal life.

*The Medieval Papacy* Geoffrey Barraclough, 1979 The medieval papacy is treated as a historical phenomenon developing and changing in response to changing historical circumstances.

*Designing Interior Architecture* Sylvia Leydecker, 2013-05-28 Designing interior spaces is a task that is equally relevant as architecture, landscape architecture, and urban design for those working professionally in the built environment. In this comprehensive work, an international and interdisciplinary team of authors presents the essential aspects of the various fields of contemporary interior architecture and design. The project examples are illustrated with brilliant photographs and plans. They have been selected according to consistent criteria for all chapters of the book and represent the essential building types, including exhibition stand design, as well as a broad range of today's design approaches. The authors place the collaboration between the various design disciplines at the center of focus. The appendix contains information for further research. All in all, *Designing Interior Architecture* is a fundamental reference work for all those professionally engaged with the design.

**Obedience to Authority** Stanley Milgram, 2017-07-11 A part of Harper Perennial's special "Resistance Library" highlighting classic works that illuminate our times: A special edition reissue of Stanley Milgram's landmark examination of humanity's susceptibility to authoritarianism. "The classic account of the human tendency to follow orders, no matter who they hurt or what their consequences." — Washington Post Book World In the 1960s, Yale University psychologist Stanley Milgram famously carried out a series of experiments that forever changed our perceptions of morality and free will. The subjects—or "teachers"—were instructed to administer electroshocks to a human "learner," with the shocks becoming progressively more powerful and painful. Controversial but now strongly vindicated by the scientific community, these experiments attempted to determine to what extent people will obey orders from authority figures regardless of consequences. "Milgram's experiments on obedience have made us more aware of the dangers of uncritically accepting authority," wrote Peter Singer in the New York Times Book Review. With an introduction from Dr. Philip Zimbardo, who conducted the famous Stanford Prison Experiment, *Obedience to Authority* is Milgram's fascinating and troubling chronicle of his classic study and a vivid and persuasive explanation of his conclusions.

*Similar Languages, Varieties, and Dialects* Marcos Zampieri, Preslav Nakov, 2021-09-02 Studying language variation requires comprehensive interdisciplinary knowledge and new computational tools. This essential reference introduces researchers and graduate students in computer science, linguistics, and NLP to the core topics in language variation and the computational methods applied to similar languages, varieties, and dialects.

**Hidden Cities** Fabrizio Nevola, David Rosenthal, Nicholas Terpstra, 2022-03-02 This groundbreaking collection explores the convergence of the spatial and digital turns through a suite of smartphone apps (Hidden Cities) that present research-led itineraries in early modern cities as public history. The Hidden Cities apps have expanded from an initial case example of Renaissance Florence to a further five historic European cities. This collection considers how the medium structures new methodologies for site-based historical research, while also providing a platform for public history experiences that go beyond typical heritage priorities. It also presents guidelines for user experience design that reconciles the interests of researchers and end users. A central section of the volume presents the underpinning original scholarship that shapes the locative app trails, illustrating how historical research can be translated into public-facing work. The final section examines how history, delivered in the format of geolocated apps, offers new opportunities for collaboration and innovation: from the creation of museums without walls, connecting objects in collections to their original settings, to informing decision-making in city tourism management. Hidden Cities is a valuable resource for upper-level undergraduates, postgraduates, and scholars across a variety of disciplines including urban history, public history, museum studies, art and architecture, and digital humanities. The Open Access version of this book, available at [www.taylorfrancis.com](http://www.taylorfrancis.com), has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Knowledge, Science, and Literature in Early Modern Germany Gerhild Scholz Williams, Stephan K. Schindler, 1996 Focusing on knowledge, science and literature in early modern Germany, this collection presents 12 essays on emerging epistemologies regarding: the transcendent nature of the Divine; the natural world; the body; sexuality; intellectual property; aesthetics; demons; and witches.

**Byzantine Court Culture from 829 to 1204** Henry Maguire, 2004 The imperial court in Constantinople is central to the outsider's vision of Byzantium. However, in spite of its fame in literature and scholarship, there have been few attempts to analyze the court in its entirety as a phenomenon. These studies provide a unified composition by presenting Byzantine courtly life in all its interconnected facets.
