Bankruption John Waupsh,2016-10-28 Community banking can flourish in the face of fintech and global competition with a fresh approach to strategy Bankruption + Website offers a survival guide for community banks and credit unions searching for relevance amidst immense global competition and fintech startups. Author John Waupsh is the Chief Innovation Officer at Kasasa, where he helps spearhead financial product development and implementation across hundreds of institutions. In this guide, he draws on more than a decade in the industry to offer clear, practical advice for competing with the megabanks, direct banks, non-banks, and financial technology companies. The discussion separates futurist thinking from today's realities, and dispels common myths surrounding the U.S. community banking model in order to shed light on the real challenges facing community banking institutions. It follows with clear solutions, proven strategies, and insight from experts across banking and fintech. All arguments are backed by massive amounts of data, and the companion website provides presentation-ready visualizations to help you kickstart change within your team. In the U.S. and around the globe, fintech companies and non-banks alike are creating streams of banking services that are interesting, elegant, and refreshing—and they're winning the hearts and minds of early adopters. Not a one-size-fits-all approach, this book offers many different tactics for community banks and credit unions to compete and flourish in the new world. Analyze fintech's threat to the community banking model Learn where community banking must improve to compete Disprove the myths to uncover the real challenges banks face Adopt proven strategies to bring your organization into the future Community banks and credit unions were once the go-to institutions for local relationship banking, but their asset share has been on the decline for three decades as the big banks just got bigger. Now, fintech companies are exploiting inefficiencies in the traditional banking model to streamline service and draw even more market share, as community banking executives are left at a loss for fresh tactics and forward-looking strategy. Bankruption + Website shows how community banks can be saved, and provides a proven path to success.

Encyclopedia of Ancient Deities Charles Russell Coulter,Patricia Turner,2021-12-06 Throughout history, humans have pondered the question of their existence. In nearly every

society, part of the answer has included some form of god or goddess. For the Mayans, one such deity was Ajtzak, who tried to create humans from wood; for the Yorubas of Africa, Shango controlled the thunder and lightning. The Chinese of the Shang dynasty era worshipped Shang Ti. Evil deities were also part of the answer, as in the case of the Kuvera, the Hindu chief of evil in the Vedic period, and Tu, the Persian or Islamic demon of fatal accidents. All of the known ancient gods, many heretofore obscure or known only from mythological literature, are included in this exhaustive reference work. The focus is on their origins, histories, and functions. The people who believed in each deity are identified, along with alternate names or spellings both old and modern. The descriptions that follow are of the functions, origins and physical nature of the deities. Extensive cross references are provided for alternate spellings and names.

Climate Crisis: Adaptive Approaches and Sustainability Uday Chatterjee,Rajib Shaw,Suresh Kumar,Anu David Raj,Sandipan Das,2024-01-01 This book aims to contribute to the discourse on climate crisis by bringing together high-quality empirical research on adaptive approaches and sustainability case studies from across the world. The book is divided into six sections. The introductory section has two chapters which sets the ground of the book as it discusses the framing of climate crisis and the different approaches towards it. It also situates the book within the global discourse. The first chapter seeks the traditional approaches to bridge the gap in the new climate science, while the second chapter delivers the ultimate reasons for temperature change, global warming and its consequences (extreme weather events) in a comprehensive way. It is hoped that the book as a whole will provide a timely synthesis of a rapidly growing and important field of climate science but will also bring forward new and stimulating ideas that will shape a coherent and fruitful vision for future work for the community of Undergraduates, Postgraduates, Ph.D. Scholars and Researchers in the fields of environmental sciences, humanistic and social sciences and geography. In addition, policy and decision makers, environmentalists, NGOs, corporate sectors, social scientists, and government organizations will find this book to be of great value. We believe that a diverse group of academics, scientists, geographers, environmentalists, environmental regulators, social scientists, and sustainable scientists with a common interest within the earth environmental sciences and humanistic and social sciences will find this book to be a comprehensive source for reference. Also, we strongly deemed that it will also provide some support for various levels of organizations and administrations for developing and achieving UN Sustainable Development Goals by 2030 in purview of climate change.
