Ambient Intelligence—Software and Applications—13th International Symposium on Ambient Intelligence Vicente

Julián,João Carneiro,Ricardo S. Alonso,Pablo Chamoso,Paulo

Novais,2023-01-01 This book presents the latest research on

Ambient Intelligence including software and applications.

Ambient Intelligence (AmI) is a paradigm emerging from Artificial Intelligence, where computers are used as proactive tools assisting people with their day-to-day activities, making everyone's life more comfortable. The inclusion of computational power and communication technologies in everyday objects is growing, and their embedding into our environments should be as invisible as possible. In order for AmI to be successful, human interaction with computing power and embedded systems in the surroundings should be smooth and happen without people actually noticing it. The only awareness people should have arises from AmI: more safety, comfort and wellbeing, emerging in a natural and inherent way. ISAmI is the International Symposium on Ambient Intelligence, aiming to bring together researchers from various disciplines that constitute the scientific field of AmI to present and discuss the latest results, new ideas, projects and lessons learned.

Cosmetic and Pharmaceutical Applications of Polymers T. Cheng, C.G. Gebelein, Victor C. Yang, 2012-12-06 Polymers continue to show almost amazing versatility. We have always known that polymers could be used for trinkets, toys and dishes. Now, however, we are no longer surprised to encounter these adaptable materials in almost every place we look. We find them in our cars, tools, electronic devices, building materials, etc. The use of polymeric materials in medicine is also well documented in previous books by one of the Editors (Gebelein) and by others. Likewise, the use of polymeric materials in pharmaceutical applications, especially in controlled release systems, is also well

established. Nevertheless, the use of these ubiquitous chemicals is far less obvious in the field of cosmetics, although modern cosmetic preparations rely heavily on polymers and this trend is certain to increase. This book brings together much of the basic information on polymers in cosmetics and compares this usage with similar applications in pharmaceutical and medical applications. Cosmetics, like medicine and pharmacy, dates back to antiquity. We can find uses of perfumes, balms and ointments in various old books, such as the Bible. For example, the use of ointments and balms is noted more than thirty eight times, and perfumes and related materials are cited at least twenty nine times in the Bible.

Dedicatory Inscriptions and Donor Portraits in Thirteenth-century Churches of Greece Sophia Kalopissi-Verti, 1992
Following the reconstruction of the Byzantine Empire in 1261 there was a great increase in the building of churches in Greece. This volume catalogues the dedicatory inscriptions (45) and the other portraits (10) with full descriptions, illustrations and transcriptions, setting them in context with an introductory discussion.

Navigating With(out) Instruments Traci Kato-Kiriyama, 2021-12
With their second book, *Navigating With(out) Instruments*, Traci Kato-Kiriyama uses her present-political unrest, family love and loss, her own cancer diagnosis-to join the traumas of the past generations with the hope of the future ones. Often seamless, often with a loud bang, Kato-Kiriyama moves from genre to genre, from poetry to essays to plays and to letters, framed by the history of US colonialism and war mongering, to urge readers to protect and to share their legacies, both personal and communal, as a means of global survival.
