Middle of Diamond India Shashank Mani,2023-09-15 Middle of Diamond India proposes a revolutionary idea - that India has long ignored its largest and most talented segment, citizens in the Tier 2 and Tier 3 districts, its Middle. The book reveals the hidden stories of those in its Middle who have been ignored owing to their location and language. By examining India's revolutionary past, its culture, its citizens, its innovators, and its spirit, the book illuminates this Diamond shaped India. Replete with characters, anecdotes, insights, research and accounts of an annual pilgrimage on a special train-Jagriti Yatra, and an enterprise ecosystem established in Deoria district, the book outlines a new vision of India focussed on its rising Middle. It proposes a Banyan Revolution over the coming twenty-five years of Amrit Kaal, using the tool of enterprise or Udyamita that can ignite a national renaissance. The book argues that by recognizing and awakening the entrepreneurial vitality of those in small towns and districts, we can create meaning for millions of citizens and define a new modernity for India.

The Lion that Didn't Roar Nigel Davidson,2016-10-06 In 2017 it will be Australia's turn to chair the Kimberley Process Certification Scheme (KP), an international organisation set up to regulate the trade in diamonds. Diamonds are a symbol of love, purchased to celebrate marriage, and it is therefore deeply ironic that the diamond trade has become linked with warfare and human rights violations committed in African producer countries such as Sierra Leone, the Democratic Republic of Congo and, more recently, Zimbabwe and Angola. In their quest for diamonds, or by using diamonds to purchase weapons, armed groups in these countries have engaged in recruiting child soldiers, amputating limbs, and committing rape and murder. In response to the problem, the international community, non-governmental organisations and key industry players such as De Beers combined forces to create the Kimberley Process in 2002. The KP uses an export certificate system to distinguish the legitimate rough diamond trade from so-called 'blood diamonds', which are also known as 'conflict diamonds'. This book considers the extent to which the KP, supported by other agencies at the international and national levels, has been effective in achieving its mandate. In so doing, it presents an original model derived from the domain of regulatory theory, the Dual Networked Pyramid, as a means of describing the operation of the system and suggesting possible improvements that might be made to it.

Geometric Complexity Theory IV: Nonstandard Quantum Group for the Kronecker Problem Jonah Blasiak, Ketan D. Mulmuley, Milind Sohoni, 2015-04-09 The Kronecker coefficient is the multiplicity of the λ -irreducible in the restriction of the μ -irreducible via the natural map π , where V and W are n -vector spaces and π is a linear map. A fundamental open problem in algebraic combinatorics is to find a positive combinatorial formula for these coefficients. The authors construct two quantum objects for this problem, which they call the nonstandard quantum group and nonstandard Hecke algebra. They show that the nonstandard quantum group has a compact real form and its representations are completely reducible, that the nonstandard Hecke algebra is semisimple, and that they satisfy an analog of quantum Schur-Weyl duality.

Quality Analysis of Additively Manufactured Metals Javad Kadkhodapour, Siegfried Schmauder, Felix Sajadi, 2022-11-30 Quality Analysis of Additively Manufactured Metals: Simulation Approaches, Processes, and Microstructure Properties provides readers with a firm understanding of the failure and fatigue processes of additively manufactured metals. With a focus on computational methods, the book analyzes the process-microstructure-property relationship of these metals and how it affects their quality while also providing numerical, analytical, and experimental data for material design and investigation optimization. It outlines basic additive manufacturing processes for metals, strategies for modeling the microstructural features of metals and how these features differ based on the manufacturing process, and more. Improvement of additively manufactured metals through predictive simulation methods and microdamage and micro-failure in quasi-static and cyclic loading scenarios are covered, as are topology optimization methods and residual stress analysis techniques. The book concludes with a section featuring case studies looking at additively manufactured metals in automotive, biomedical and aerospace settings. Provides insights and outlines techniques for analyzing why additively manufactured metals fail and strategies for avoiding those failures Defines key terms and concepts related to the failure analysis, quality assurance and optimization processes of additively manufactured metals Includes simulation results, experimental data and case studies

CryptoDad J. Christopher Giancarlo, 2021-10-26 An insider's account of the rise of digital money and cryptocurrencies Dubbed CryptoDad for his impassioned plea to Congress to acknowledge and respect cryptocurrencies as the inevitable product of a fast-growing technological wave and a free marketplace, Chris Giancarlo is considered one of the most influential individuals in financial regulation. CryptoDad: The Fight for the Future of Money describes Giancarlo's own reckoning with the future of the global economy—at the intersection of markets, technology, and public policy—and lays out the fight for a Digital Dollar. CryptoDad is Giancarlo's own personal story, detailing his forays into the world of Wall Street to his tenure as the 13th Chairman of the United States Commodity Futures Trading Commission (CFTC), where he pushed for the agency to recognize the digitization of markets. Anna Hazare Prateeksha M. Tiwari, 2014-02-10 Indians have seen many revolutions some of which were respected the world over. This latest revolution would transform India; and the world shall bow before its amazing power and people, yet again. This finely written book gives the details of the life and struggle of this 73-year-old man who has caught the bull by the horn, literally! He has used peaceful tactics to shake all those who are ruling or planning to rule the nation. His thoughts are pure, so corruption does not stand a chance in front of him. The politicians and bureaucrats are afraid of this frail man who has opened a Pandora's box through his hunger strike. This is a moment of reckoning for the Indians. Mirror is in front of us and we must recognize what we are. Anna has shown us the stiff realities of India. Corruption is the order of the day; and Anna has picked up the broom to clean up this mess by implementing Jan Lokpal Bill which is an anti-corruption bill. If you are an Indian, and love your nation, do read this book. If you are not, do read it to visualize and predict how quickly this new revolutionary would succeed in taming the dragon called 'Corruption'.
